Oxford Weather and Climate Since 1767 Stephen Burt,Tim Burt,2019-05-30 The British have always been obsessed by the weather. Thomas Hornsby, who founded the Radcliffe Observatory in Oxford in 1772, began weather observations at the site. They continue daily to this day, unbroken since 14 November 1813, the longest continuous series of single-site weather records in the British Isles, and one of the longest in the world. Oxford Weather and Climate since 1767 represents the first full publication of this newly-digitised record of English weather, which will appeal to interested readers and climate researchers alike. The book celebrates this unique and priceless Georgian legacy by describing and explaining how the records were (and still are) made, examines monthly and seasonal weather patterns across two centuries, and considers the context of long-term climate change. Local documentary sources and contemporary photographs bring the statistics to life, from the clouds of 'smoak' from the Great Fire of London in 1666 to the most recent floods. This book explores all the weather extremes, from bitter cold winters to hot, dry summers, bringing to life the painstaking measurements made over the last 250 years.

**Black Entertainers in African American Newspaper Articles: An annotated bibliography of the Chicago defender, the Afro-American (Baltimore), the Los Angeles sentinel, and the New York Amsterdam news, 1910-1950** Charlene B. Regester, 2002 All forms of American entertainment have been influenced by the participation of African Americans, and some forms have been invented by them, yet for much history that influence and those inventions went undocumented in the white press. For the first half of the twentieth century, the best coverage of blacks in entertainment-especially the developing motion picture industry-was in the newspapers published and circulated by the African American community. This annotated bibliography offers easy access to that coverage in four of the most influential black newspapers in the period from 1910 to 1950: the Chicago Defender, the Afro-American (Baltimore), the Los Angeles Sentinel and the New York Amsterdam News. The chronological arrangement allows the reader to trace developments in entertainment from the early days of motion pictures to mid-century. Quotations from the articles offer a taste of each newspaper's style, and extensive indexing provides quick access to names, titles, and subjects, making the book an invaluable aid to researchers.
