Red Water, Black Gold Margaret A. Bickers,2014-11-15 Red Water, Black Gold: The Canadian River in Texas 1920–1999 tells the story of the Canadian River in the Texas Panhandle. It is a tale of grand designs, high hopes, deep holes, politics, fishing, follies, foibles, and environmental change. Although efforts had been made to tap the Canadian River’s waters before 1920, the discovery of oil in the Panhandle gave new urgency to the search for permanent water supplies. Additionally, the spread of groundwater irrigation amid the discovery of the limits of Ogallala Aquifer spurred regional interests to tap the Canadian. But overestimates of the river’s flow and unfamiliarity with the critical role groundwater played in maintaining that flow led to complications and frustrations, culminating in a lawsuit over the location of the banks of a seemingly waterless river. This book is a valuable addition to the water history of Texas and the American West and to the growing body of worldwide regional water histories. Combining traditional historical sources with hydrology, climatology, and geology, Red Water, Black Gold complicates the traditional story of top-down water management as well as telling the thus-far untold story of the Canadian River in Texas.

Black, White and Gold Hank Nelson,2016-07-19 Australian goldminers were among the first white men to have sustained contact with Papua New Guineans. Some Papua New Guineans welcomed them, worked for them, traded with them and learnt their skills and soon were mining on their own account. Others met them with hostility, either by direct confrontation or by stealthy ambush. Many of the indigenous people and some miners were killed. The miners were dependent on the local people for labourers, guides, producers of food and women. Some women lived willingly in the miners’ camps, a few were legally married, and some were raped. Working conditions for Papua New Guineans on the claims were mixed; some being well treated by the miners, others being poorly housed and fed, ill-treated, and subject to devastating epidemics. Conditions were rough, not only for them but for the diggers too. This book, republished in its original format, shows the differences in the experience of various Papua New Guinean communities which encountered the miners and tries to explain these differences. It is a graphic description of what happens when people from vastly different cultures meet. The author has drawn on documentary sources and interviews with the local people to produce, for the first time, a lively history.

**Black's Gold** Lori Power,2021-04-12 There be gold on that there island. In 1767, privateer Mackenzie McGuire seizes a Spanish galleon and wins more than a superior ship—the logbook contains half a treasure map for a tiny island off Nova Scotia. But he needs to know how to get past the deadly booby traps. Staying clear of English patrols, he sneaks into Halifax to obtain the keys to these traps, written on the map's other half. Part of a mother-daughter team, Flora works the Halifax waterfront to survive, picking pockets. In rolling one ruffian, they wind up with more than coins. When her mother dies and Flora is pursued, her path crosses McGuire's. She's admired him from afar. Now, with her new piece of information, can she bargain for what she really wants in life?

**Black Gold** Charles More,2009-04-20 This book charts the story of the raw material that shaped the world's history in the twentieth century, and with it the development of modern Britain. Ranging from the first explorations, through oil-fuelled wars and environmental crises, this book examines the strategic, economic and social importance of oil. Until the discovery of North Sea oil in the 1970s, Britain had virtually no known oil reserves yet by the early twentieth century British companies were producing oil across the Middle East, Russia and America. How did that happen and why have British companies remained internationally important ever since? How have British domestic and foreign policies been dictated by oil? And how have the government and oil companies reacted to the growing importance of environmental issues? From Suez and the 1973 Arab oil embargo to the wrecking of the Torrey Canyon and climate change, this is a comprehensive survey of modern Britain, oil and world history.

*City of Black Gold* Arbella Bet-Shlimon,2019 Kirkuk is Iraq's most multilingual city, for millennia home to a diverse population. It was also where, in 1927, a foreign company first struck oil in Iraq. Over the following decades, Kirkuk became the heart of Iraq's booming petroleum industry. City of Black Gold tells a story of oil, urbanization, and colonialism in Kirkuk—and how these factors shaped the identities of Kirkuk's citizens, forming the foundation of an ethnic conflict. Arbella Bet-Shlimon reconstructs the twentieth-century history of Kirkuk to question the assumptions about the past underpinning today's ethnic divisions. In the early 1920s, when the Iraqi state was formed under British administration, group identities in Kirkuk were fluid. But as the oil industry fostered colonial power and Baghdad's influence over Kirkuk, intercommunal violence and competing claims to the city's history took hold. The ethnicities of Kurds, Turkmens, and Arabs in Kirkuk were formed throughout a century of urban development, interactions between communities, and political mobilization. Ultimately, this book shows how contentious politics in disputed areas are not primordial traits of those regions, but are a modern phenomenon tightly bound to the society and economics of urban life.
