Black Heart Phillip M. Richards,2006 Black Heart is a provocative and polemical critique of African American literary studies at the beginning of the twenty-first century. Through a series of sharp and insightful essays on a wide range of critical thinkers, Phillip M. Richards traces what he sees as an erosion of moral reflection in African American literary culture - a process that has left contemporary black academic criticism socially, politically, and culturally hollow. Exploring the work of Henry Louis Gates, Jr., Michael Dyson, Karla Holloway and others, Black Heart sets forth the rhetorical strategies of present-day African American critical writing, and probes the ethical dimensions of its institutional life in the academy, the media, and the public sphere. Richards undertakes to recover the procedures by which cultural and moral value may be recovered for black literary culture and to establish the possibilities for a new humanism in African American writing and literary culture.

P.,SHARMA, ASHOK,2023-10-01 The study of heat treatment has assumed great significance because of the vital role heat treatment plays in achieving the designed characteristics in a given material. This comprehensive and well-organized text skilfully blends the theoretical and practical aspects of heat treatment. It discusses, in rich detail, about heat treatment of commercial steels, cast irons and non-ferrous metals and alloys. The book also offers an in-depth analysis of topics such as nature of metals and alloys; principles of heat treatment of steels; heat treatment processes; possible defects, causes and remedies in heat treatment. This third edition of the successful text has gone through considerable modification on the basis of responses received. A new chapter on "Transforming the Heat Treatment Industry: The Role of Digitization" has been added for latest trends in technology. Multiple choice questions and other pedagogically arranged questions are reorganized to help students assess their subject knowledge. Designed primarily as a text for undergraduate and postgraduate students of Metallurgy, the book is also useful for undergraduate students of mechanical, production, and chemical engineering. Besides, it meets the requirements of students of AMIE/AMIIM, and of diploma level courses in metallurgical and mechanical engineering. Furthermore, the book can serve as an invaluable reference for practising engineers.
