*In the Blink of an Eye* Stefana Sabin, 2021-08-12 From monocles to pince-nez and goggle-eyes, a cultural and technological history of glasses in fact and fiction. This book examines those who wore glasses through history, art, and literature, from the green emerald through which Emperor Nero watched gladiator fights to Benjamin Franklin's homemade bifocals, and from Marilyn Monroe's cat-eye glasses to the famed four-eyes of Emma Bovary and Harry Potter. Spectacles are objects that seem commonplace, but *In the Blink of an Eye* shows that because they fundamentally changed people's lives, glasses were the wellspring of a quiet social, cultural, and economic revolution. Indeed, one can argue that modernity itself began with the paradigm shift that transformed poor eyesight from a severely limiting disease—treated with pomades and tinctures—into a minor impairment that can be remedied with mechanisms constructed from lenses and wire.

Blink Once Cylin Busby, 2012-09-04 West is a high school senior who has everything going for him until an accident leaves him paralyzed. Strapped down in his hospital bed, slipping in and out of consciousness, West is terrified and alone. Until he meets Olivia. She's the girl next door-sort of. A patient in the room next to his, only Olivia can tell what West is thinking, and only Olivia seems to know that the terrible dreams he's been having are not just a result of his medication. Yet as West comes to rely on Olivia—to love her, even—certain questions pull at him: Why has Olivia been in the hospital for so long? And what does it mean that she is at the center of his nightmares? But the biggest question of all comes when West begins to recover and learns that the mysterious girl he's fallen in love with has a secret he could never have seen coming.

The Machine Never Blinks Ivan Greenberg, Everett Patterson, Joseph Canlas, 2020-05-06 This graphic history traces spying and surveillance from legends to the present. In *The Machine Never Blinks*, the story of surveillance is presented from its earliest days, to help you more fully understand today's headlines about every-increasing, constant, and unrelenting monitoring and global data collection. It's a threat to your rights, privacy, dignity, and sanity. This book spans surveillance from the Trojan Horse, through 9/11 and to the so-called War on Terror, which enabled the exponential growth of government and corporate intercepts and databases. It also explains spying as entertainment (reality TV) and convenience (smart speakers). Take a look around... Who's watching you right now?

**Ice Blink** Scott Cookman, 2008-04-21 Absorbing, artfully narrat[es] a possible course of events in the expedition's demise, based on the one official note and bits of debris (including evidence of cannibalism) found by searchers sent to look for Franklin in the 1850s. Adventure readers will flock to this fine regaling of the enduring mystery surrounding the best-known disaster in Arctic exploration.--Booklist A great Victorian adventure story rediscovered and re-presented for a more enquiring time.--The Scotsman A vivid, sometimes harrowing chronicle of miscalculation and overweening Victorian pride in untried technology. a work of great compassion.--The Australian It has been called the greatest disaster in the history of polar exploration. Led by Arctic explorer Sir John Franklin, two state-of-the-art ships and 128 hand-picked men----the best and the brightest of the British empire----sailed from Greenland on July 12, 1845 in search of the elusive Northwest Passage. Fourteen days later, they were spotted for the last time by two whalers in Baffin Bay. What happened to these ships----and to the 129 men on board----has remained one of the most enduring mysteries in the annals of exploration. Drawing upon original research, Scott Cookman provides an unforgettable account of the ill-fated Franklin expedition, vividly reconstructing the lives of those touched by the voyage and its disaster. But, more importantly, he suggests a human culprit and presents a terrifying new explanation for what triggered the deaths of Franklin and all 128 of his men. This is a remarkable and shocking historical account of true-life suspense and intrigue.

**Blink & Caution** Tim Wynne-Jones, 2011-03-08 Two street kids get tangled in a plot over their heads - and risk an unexpected connection - in this heart-pounding thriller by Tim Wynne-Jones. (Age 14 and up) Boy, did Blink get off on the wrong floor. All he wanted was to steal some breakfast for his empty belly, but instead he stumbled upon a fake kidnapping and a cell phone dropped by an abducted CEO, giving Blink a link to his perfect blonde daughter. Now Blink is on the run, but it's OK as long as he's smart enough to stay in the game and keep Captain Panic locked in his hold. Enter a girl named Caution. As in Caution: Toxic. As in Caution: Watch Your Step. She's also on the run, from a skeezy drug-dealer boyfriend and from a nightmare in her past that won't let her go. When she spies Blink at the train station, Caution can see he's an easy mark. But there's something about this naïve, skinny street punk, whom she only wanted to rob, that tugs at her heart, a heart she thought deserved not to feel. Charged with suspense and intrigue, this taut novel trails two deeply compelling characters as they forge a blackmail scheme that is foolhardy at best, disastrous at worst - along with

a fated, tender partnership that will offer them each a rare chance for redemption.

Blink Malcolm Gladwell, 2007-04-03 From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of blink: the election of Warren Harding; New Coke; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of thin-slicing--filtering the very few factors that matter from an overwhelming number of variables.

**In the Blink of an Eye** Pat Milton, 1999 Like the sinking of the Titanic, the crash of TWA Flight 800 just off Long Island, New York, in the early evening of July 17, 1996, captured the world's imagination. Associated Press reporter Pat Milton has covered the story from day one and was granted unprecedented access to the FBI investigation--the largest and most complex in the agency's history. Initially suspecting that a crime had been committed, James Kallstrom, the head of the FBI's New York office, led the two-year investigation from the start. In the Blink of an Eye offers a rare look at the efforts of several government agencies--which often had different missions--to find the truth about the most mysterious and disturbing disaster in aviation history. Commercial jets don't just fall out of the sky. So what happened? Was TWA's Flight 800 the first plane to be downed by enemy action within the United States? On the night of the crash, President Clinton told his national security advisors to ready a plan to retaliate if the destruction of Flight 800 proved to be a state-sponsored terrorist attack. If a bomb or missile had caused the disaster, Kallstrom was determined to find the perpetrators before they struck again. If it wasn't either of these, he was no less determined to preclude the sort of conspiracy theorizing that followed the Warren Commission report on the assassination of JFK. As Kallstrom and his agents tried to piece together the sequence of events that preceded the explosion of Flight 800's center fuel tank, the victims' families also had to come to terms with the tragedy. Their anguish was as much on Kallstrom's mind as the details of the mystery itself. In this vivid account, Pat Milton takes us inside the homes and lives of the victims' families as well as inside the investigation, and as close to the real cause of the crash as we'll ever come.

In the Blink of an Eye Andrew Parker, 2016-06-02 The Cambrian explosion is the big bang of evolution--a period of less than five million years during which life on Earth rapidly developed both armaments and defenses. Animals suddenly became both hunters and the hunted, and the number of animal groups with hard body parts mushroomed from three to 38. But why did the explosion happen when it did? Ground-breaking and accessible, this book unravels the evidence demonstrating that this was the period when the eye evolved, leading to an evolutionary scramble for survival.

*I Miss You When I Blink* Mary Laura Philpott, 2020-04-07 NATIONAL BESTSELLER A charmingly relatable and wise memoir-in-essays by acclaimed writer and bookseller Mary Laura Philpott, "the modern day reincarnation of...Nora Ephron, Erma Bombeck, Jean Kerr, and Laurie Colwin—all rolled into one" (The Washington Post), about what happened after she checked off all the boxes on a successful life's to-do list and realized she might need to reinvent the list—and herself. Mary Laura Philpott thought she'd cracked the code: Always be right, and you'll always be happy. But once she'd completed her life's to-do list (job, spouse, house, babies—check!), she found that instead of feeling content and successful, she felt anxious. Lost. Stuck in a daily grind of overflowing calendars, grueling small talk, and sprawling traffic. She'd done everything "right" but still felt all wrong. What's the worse failure, she wondered: smiling and staying the course, or blowing it all up and running away? And are those the only options? Taking on the conflicting pressures of modern adulthood, Philpott provides a "frank and funny look at what happens when, in the midst of a tidy life, there occur impossible-to-ignore tugs toward creativity, meaning, and the possibility of something more" (Southern Living). She offers up her own stories to show that identity crises don't happen just once or only at midlife and reassures us that small, recurring personal re-inventions are both normal and necessary. Most of all, in this "warm embrace of a life lived imperfectly" (Esquire), Philpott shows that when you stop feeling satisfied with your life, you don't have to burn it all down. You can call upon your many selves to figure out who you are, who you're not, and where you belong. Who among us isn't trying to do that? "Be forewarned that you'll laugh out loud and cry, probably in the same essay. Philpott has a wonderful way of finding humor, even in darker moments. This is a book you'll want to buy for yourself and every other woman you know" (Real Simple).

**In the Blink of an Eye** Andrew Parker, 2003 This title is a stunning exploration of the 'Cambrian Explosion' - the 'Big Bang' of evolution; a period of five million years, 'the blink of an eye' in geological terms, which saw the emergence of many new classifications, the first rudimentary eyes and the start of predation.
