*More Brilliant than the Sun* Kodwo Eshun,2020-02-04 The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

*Cyberspace* Phil Williams, Dighton Fiddner, Army War College (U.S.). Strategic Studies Institute, 2016 This volume has three parts: the first focuses on cyberspace itself; the second on some of the major forms of malevolence or threats that have become one of its defining characteristics; and the third on possible responses to these threats. One of the most significant features of cyberspace, however, is that it is becoming a risky place for the entire spectrum of users: nation-states, nongovernmental and transnational organizations, commercial enterprises, and individuals. Yet it is a space of opportunities -- for benevolent, neutral, and malevolent actors. Moreover, the authors identify and assess the challenges and threats to security that can arise in cyberspace because of its unique nature. In the final section, the authors discuss a variety of responses, with some suggesting that the most favored options being pursued by the United States are poorly conceived and ill-suited to the tasks at hand--Publisher's web site.

Playing the Past Zach Whalen, Laurie N. Taylor, 2008 *Playing the Past* brings together a group of interdisciplinary scholars to examine the complementary notions of history and nostalgia as they are expressed through video games and in gaming culture. The scope of these related concepts moves from the personal to the cultural, and essays in this collection address video game nostalgia as both an individual and societal phenomenon, connecting the fond memories many of us have of classic gaming to contemporary representations of historical periods and events in video games. From Ms. Pac-Man and Space

Invaders to Call of Duty and JFK: Reloaded, the games many of us have played since childhood inform how we see the world today, and the games we make and play today help us communicate ideas about real world history. By focusing on specific games, historical periods and media ecologies, these essays collectively take an in depth look at the related topics of nostalgia for classic gaming, gaming and histories of other media, and representations of real history in video games.

**Cybersexualities** Jenny Wolmark, 1999 Cyberspace, the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology. This is the first anthology of the key essays on these potent metaphors. Divided into three sections (Technology, Embodiment and Cyberspace; Cybersubjects: Cyborgs and Cyberpunks; Cyborg Futures), the book addresses different aspects of the human-technology interface. This is an invaluable guide for students studying any aspects of contemporary theory and culture.\* Brings together in a unique collection the work of key authors in feminist and cyber theory\* Demonstrates the wide range of contemporary critical work\* Challenges constructions of gender, race and class\* An extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory\* Brief section introductions

**Minds Make Societies** Pascal Boyer, 2018-05-08 A scientist integrates evolutionary biology, genetics, psychology, economics, and more to explore the development and workings of human societies. "There is no good reason why human societies should not be described and explained with the same precision and success as the rest of nature." Thus argues evolutionary psychologist Pascal Boyer in this uniquely innovative book. Integrating recent insights from evolutionary biology, genetics, psychology, economics, and other fields, Boyer offers precise models of why humans engage in social behaviors such as forming families, tribes, and nations, or creating gender roles. In fascinating, thought-provoking passages, he explores questions such as: Why is there conflict between groups? Why do people believe low-value information such as rumors? Why are there religions? What is social justice? What explains morality? Boyer provides a new picture of cultural transmission that draws on the pragmatics of human communication, the constructive nature of memory in human brains, and human motivation for group formation and cooperation. "Cool and captivating...It will change forever your understanding of society and culture."—Dan Sperber, co-author of *The Enigma of Reason* "It is highly recommended...to researchers firmly settled within one of the many single disciplines in question. Not only will they encounter a wealth of information from the humanities, the social sciences and the natural sciences, but the book will also serve as an invitation to look beyond the

horizons of their own fields.”—Eveline Seghers, *Evolutionary Studies in Imaginative Culture*

*A LUDIC SOCIETY* Natalie Denk, 2021-09-09 Contemporary game scholarship offers a broad palette of theories and methods inherited from such fields as sociology and communication studies, experimental sciences, literary analysis, educational sciences and cultural critique. At large, this inherently interdisciplinary research aims for a holistic perspective on the 'LUDIC SOCIETY'. With that in mind, this book is organized into four sections that present related and often intertwined ideas and observations about the ways we manifest ourselves in games and play, how games represent us in the present and in the past, how games and play change us, and what it all may mean for contemporary society. This book invites readers to engage with the key challenges of a ludic society, explore new perspectives and initiate fruitful discussions. It is aimed at both passionate game scholars and all those who want to get a first taste of the multifaceted research field of game studies.
