History of the Colony of New Haven Edward Rodolphus Lambert,1838

The Making of Zombie Wars Aleksandar Hemon,2015-05-05 The seriously, seriously funny roller-coaster ride of sex and violence that Aleksandar Hemon has long promised Script idea #142: Aliens undercover as cabbies abduct the fiancée of the main character, who has to find a way to a remote planet to save her. Title: Love Trek. Script idea #185: Teenager discovers his girlfriend's beloved grandfather was a guard in a Nazi death camp. The boy's grandparents are survivors, but he's tantalizingly close to achieving deflowerment, so when a Nazi hunter arrives in town in pursuit of Grandpa, he has to distract him long enough to get laid. A riotous Holocaust comedy. Title: The Righteous Love. Script idea #196: Rock star high out of his mind freaks out during a show, runs offstage, and is lost in streets crowded with his hallucinations. The teenage fan who finds him keeps the rock star for himself for the night. Mishaps and adventures follow. This one could be a musical: Singin' in the Brain. Josh Levin is an aspiring screenwriter teaching ESL classes in Chicago. His laptop is full of ideas, but the only one to really take root is *Zombie Wars*. When Josh comes home to discover his landlord, an unhinged army vet, rifling through his dirty laundry, he decides to move in with his girlfriend, Kimmy. It's domestic bliss for a moment, but Josh becomes entangled with a student, a Bosnian woman named Ana, whose husband is jealous and violent. Disaster ensues, and as Josh's choices move from silly to profoundly absurd, *The Making of Zombie Wars* takes on real consequence.

How the Body Shapes the Way We Think Rolf Pfeifer, Josh Bongard, 2006-10-27 An exploration of embodied intelligence and its implications points toward a theory of intelligence in general; with case studies of intelligent systems in ubiquitous computing, business and management, human memory, and robotics. How could the body influence our thinking when it seems obvious that the brain controls the body? In **How the Body Shapes the Way We Think**, Rolf Pfeifer and Josh Bongard demonstrate that thought is not independent of the body but is tightly constrained, and at the same time enabled, by it. They argue that the kinds of thoughts we are capable of have their foundation in our embodiment—in our morphology and the material properties of our bodies. This crucial notion of embodiment underlies fundamental changes in the field of artificial intelligence over the past two decades, and Pfeifer and Bongard use the basic methodology of artificial intelligence—understanding by building—to describe their insights. If we understand how to design and build intelligent systems, they reason, we will better understand intelligence in general. In accessible, nontechnical language, and using many examples, they introduce the basic concepts by building on recent developments in robotics, biology, neuroscience, and psychology to outline a possible theory of intelligence. They illustrate applications of such a theory in ubiquitous computing, business and management, and the psychology of human memory. Embodied intelligence, as described by Pfeifer and Bongard, has important implications for our understanding of both natural and artificial intelligence.
