Redefining Geek Cassidy Puckett,2022-04-20 Take a moment to imagine a geek. A computer geek. Do you see thick glasses and pocket protectors? A face illuminated by a glowing screen, surrounded by empty cans of energy drinks? Bill Gates? Whatever trope comes to mind, it's likely a white or Asian man. As Cassidy Puckett shows in Define Geek, these are not just innocent assumptions. They are tied to underlying ideas about who is naturally good at tech, and they keep many would be techies, particularly girls and people of color, from achieving or even pursuing opportunities in tech. But Puckett is not just here to show us that anybody can be good at tech; she tells us how we can get there. Puckett spent six years teaching technology classes to first generation, low-income middle school students in Oakland, California, and during that time, she uncovered five technology learning habits that will set up all young people for success. She shows how to measure and build these habits, and she demonstrates that many teens currently unrepresented in STEM already use these habits; they are more ready for advanced technological skill development than assumptions about instinct might suggest. Redefining instinct reframes the goals of STEM education and challenges our stereotypes about natural technological ability. Our so-called leaky STEM pipeline is readily addressed by Puckett's five techie habits of mind--

The Heart of the Mission Cary Cordova,2017-05-04 An illustrated, in-depth examination of the avant-garde and politically radical Latino art of San Francisco's Mission District In The Heart of the Mission, Cary Cordova combines urban, political, and art history to examine how the Mission District, a longtime bohemian enclave in San Francisco, has served as an important place for an influential and largely ignored Latino arts movement from the 1960s to the present. Well before the anointment of the Mission School by art-world arbiters at the dawn of the twenty-first century, Latino artists, writers, poets, playwrights, performers, and filmmakers made the Mission their home and their muse. The Mission, home to Chileans, Cubans, Guatemalans, Mexican Americans, Nicaraguans, Puerto Ricans, and Salvadorans never represented a single Latino identity. In tracing the experiences of a diverse group of Latino artists from the 1940s to the turn of the century, Cordova connects wide-ranging aesthetics to a variety of social movements and activist interventions. The book begins with the history of the Latin Quarter in the 1940s and the subsequent cultivation of the Beat counterculture in the 1950s, demonstrating how these decades laid the groundwork for the artistic and political renaissance that followed. Using oral histories, visual culture, and archival research, she analyzes the Latin jazz scene of the 1940s, Latino involvement in the avant-garde of the 1950s, the Chicano movement and Third World movements of the 1960s, the community mural movement of the 1970s, the transnational liberation movements in Nicaragua and El Salvador, and the AIDS activism of the 1980s. Through these different historical frames, Cordova links the creation of Latino art with a flowering of Latino politics.

The 9/11 Generation Sunaina Marr Maira,2016-09-01 Explores how young people from communities targeted in the War on Terror engage with the “political,” even while they are under constant scrutiny and surveillance Since the attacks of 9/11, the banner of national security has led to intense monitoring of the politics of Muslim and Arab Americans. Young people from these communities have come of age in a time when the question of political engagement is both urgent and fraught. In The 9/11 Generation, Sunaina Marr Maira uses extensive ethnography to understand the meaning of political subjecthood and mobilization for Arab, South Asian, and Afghan American youth. Maira explores how young people from communities targeted in the War on Terror engage with the “political,” forging coalitions based on new racial and ethnic categories, even while they are under constant scrutiny and surveillance, and organizing around notions of civil rights and human rights. The 9/11 Generation explores the possibilities and pitfalls of rights-based organizing at a moment when the vocabulary of rights and democracy has been used to justify imperial interventions, such as the U.S. wars in Iraq and Afghanistan. Maira further reconsiders political solidarity in cross-racial and interfaith alliances at a time when U.S. nationalism is understood as not just multicultural but also post-racial. Throughout, she weaves stories of post-9/11 youth activism through key debates about neoliberal democracy, the “radicalization” of Muslim youth, gender, and humanitarianism.

Organizing Locally Bruce Fuller,2015-04-14 We love the local. From the cherries we buy, to the grocer who sells them, to the school where our child unpacks them for lunch, we express resurgent faith in decentralizing the institutions and businesses that arrange our daily lives. But the fact is that huge, bureaucratic organizations often still shape the character of our jobs, schools, the groceries where we shop, and even the hospitals we entrust with our lives. So how, exactly, can we work small, when everything around us is so big, so global and standardized? In Organizing Locally, Bruce Fuller shows us, taking stock of America’s rekindled commitment to localism across an illuminating range of sectors, unearthing the crucial values and practices of decentralized firms that work. Fuller first untangles the economic and cultural currents that have eroded the efficacy of—and our trust in—large institutions over the past half century. From there we meet intrepid leaders who have been doing things differently. Traveling from a charter school in San Francisco to a veterans service network in Iowa, from a Pennsylvania health-care firm to the Manhattan branch of a Swedish bank, he explores how creative managers have turned local staff loose to craft inventive practices, untethered from central rules and plain-vanilla routines. By holding their successes and failures up to the same analytical light, he vividly reveals the key cornerstones of social organization on which motivating and effective decentralization depends. Ultimately, he brings order and evidence to the often strident debates about who has the power—and on what scale—to structure how we work and live locally. Written for managers, policy makers, and reform activists, Organizing Locally details the profound decentering of work and life inside firms, unfolding across postindustrial societies. Its fresh theoretical framework explains resurging faith in decentralized organizations and the ingredients that deliver vibrant meaning and efficacy for residents inside. Ultimately, it is a synthesizing study, a courageous and radical new way of conceiving of American vitality, creativity, and ambition.
