Building a TypePad Blog People Want to Read Scott McNulty, 2010-07-21 Today, it seems everyone—from multinational corporations to your kid's second-grade teacher—has a blog. They all have one, in part, because they have information they want to share with others—from customers and clients to neighbors and parents. But to actually build a good blog—to create a blog people want to read—takes thought, planning, and some effort. From picking the right TypePad plan and working with domains to managing posts and building a community, creating a successful blog involves making critical decisions at each step. In this book by blogger extraordinaire Scott McNulty, you'll learn how to: Set up your account and work with blog-specific settings. Customize your blog to fit your personal or business needs. Manage your site with TypePad's Dashboard. Monitor and make sense of traffic. Work with pages and—of course—publish your posts. Deal with comments, manage trackbacks, and handle comment spam. Find a stock theme—or customize one yourself. Work with images and photos.

The Launch Pad Randall Stross, 2012-09-27 Number of teams that applied to Y Combinator's summer 2011 batch: 2,089 Teams interviewed: 170 Minutes per interview: 10 Teams accepted and funded: 64 Months to build a viable startup: 3 Possibilities: BOUNDLESS Investment firm Y Combinator is the most sought-after home for startups in Silicon Valley. Twice a year, it funds dozens of just-founded startups and provides three months of guidance from Paul Graham, YC's impresario, and his partners, also entrepreneurs and mostly YC alumni. The list of YC-funded success stories includes Dropbox (now valued at \$5 billion) and Airbnb (\$1.3 billion). Receiving an offer from YC creates the opportunity of a lifetime — it's like American Idol for budding entrepreneurs. Acclaimed journalist Randall Stross was granted unprecedented access to Y Combinator's summer 2011 batch of young companies, offering a unique inside tour of the world of software startups. Most of the founders were male programmers in their mid-twenties or younger. Over the course of the summer, they scrambled to heed Graham's seemingly simple advice: make something people want. We watch the founders work round-the-clock, developing and retooling products as diverse as a Web site that can teach anyone programming, to a Wikipedia-like site for rap lyrics, to software written by a pair of attorneys who seek to "make attorneys obsolete." Founders are guided by Graham's notoriously direct form of tough-love feedback. "Here, we don't fire you," he says. "The market fires you. If you're sucking, I'm not going to run along behind you, saying, 'You're sucking, you're sucking, c'mon, stop sucking.'" Some teams would even abandon their initial idea midsummer and scramble to begin anew. The program culminated in "Demo Day," when founders pitched their startup to several hundred top angel investors and venture capitalists. A lucky few attracted capital that gave their startup a valuation of multiple millions of dollars. Others went back to the drawing board. This is the definitive story of a seismic shift that's occurred in the business world, in which coding skill trumps employment experience, pairs of undergraduates confidently take on Goliaths, tiny startups working out of an apartment scale fast, and investors fall in love.

Digital Anthropology Heather A. Horst, Daniel Miller, 2013-08-01 Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

Arts Based Health Care Research: A Multidisciplinary Perspective Kathryn Hinsliff-Smith,Julie McGarry,Parveen Ali,2022-08-08 This book, written by academics across a range of disciplines, including healthcare and social sciences discusses the increasing use of the arts in healthcare research, which often stems from the recognition that for some topics of investigation, or when dealing with sensitive issues, the usual qualitative or quantitative paradigms are not appropriate. While there is undoubtedly a place for such approaches, arts-based research paradigms (ABR) offers, not only additional study and data-collection tools, but also provides a new and enjoyable experience for those involved. The use of the arts as a medium to improve health and wellbeing was well documented by the World Health Organisation (WHO) in 2019, with over 3,000 studies conducted around the globe on the value of the arts in the prevention of ill health and promotion of health across the life span. This book examines how the arts, in a variety of forms, can be used by those working directly in healthcare settings as well as those involved in research across all health or patient settings. Covering a range of ABR genres, including literature (such as narrative and poetic inquiry); performance (music, dance, play building); visual arts (drawing and painting, collage, installation art, comics); and audio-visual and multimethod approaches, this user- friendly book will appeal to nurses, researchers in nursing and allied healthcare professions, as well professionals in the social sciences, psychosociology, psychology, literature and arts.

Making Sense of Culture Norhayati Zakaria,2019-05-29 This book lies within two interdisciplinary fields that should be bridged: cross-cultural management and international human resource management. The consequences of globalization lead to a more extensive recruitment process of global talents to fit the different work structures and competitive work environment of tomorrow. The emergence of self-initiated expatriates (SIEs) further intensify the challenges faced by multinational organizations because people are searching for better career prospects and they are willing to re-locate in order to obtain competitive salary or compensation packages. With the emergence of SIEs, multinational corporations need to acknowledge the influence of culture on management practices because the expatriates will bring their own cultural baggage and uniqueness to the company's doorsteps. By integrating both fields, this book provides a valuable understanding in order to educate SIEs on the richness of cultural behaviors. Indeed, the complexities of human behaviours opens up the window of opportunities to recognize that we are all human beings with unique characteristics, personality and attitudes. It is until and when we equally acknowledge that culture is an essence of humankind and that culture continues to shape people with a magical touch of diversity and uniqueness, only then will the global world greet people inclusively by embracing 'tolerance, appreciation, and happiness!' Culture has a paramount impact on how leaders manage their colleagues and teams in the workplace. One's attitudes, values, beliefs and perceptions all matter when people work with culturally diverse colleagues. Cultural differences cannot be ignored as a work structure that thrives only in a monoculture environment is hardly in existence for multinational corporation of today. Instead, the multi-cultured environment takes priority with the soaring number of demands for global talents and workforces that need to be recruited. It is clearly established in the field of international human resources that there are increasing trends and phenomenon of burgeoning SIEs in newly occupied cosmopolitan cities in the world such as Dubai, Qatar, Jeddah, Kuala Lumpur, Hong Kong, Shanghai, Tokyo, and many others. At the end, one key question matters for the journey of cultural sense making to begin: What is it like to experience the forces and effects of culture in the workplace when one is an expatriate?

An Analysis of Air Force Master Planning and the Effect of Space Programs on Land Development Joe B. Hollingsworth,1965 The United States Air Force has a mission in space. This mission is to conduct operations in space for the advancement of men's knowledge and capabilities. Therefore, future missions of many Air Force bases will require the consideration of space support facilities. City planning as a profession is developing rapidly. The 'state of the art' as practiced in the civilian community is more advanced than as practiced by the Air Force. The techniques, procedures, and standards used by the city planning profession in developing civilian master plans can be of assistance to Air Force master planning. They are required tools for successful development. Land use standards, in particular, are needed to permit personnel responsible for Air Force planning to check existing facilities for adequacy and to allow computation of total land requirements for new bases and facilities. The air Force lacks trained professional planners. To overcome this shortage, there is a need for an adequate Air Force manual on master planning encompassing the latest techniques, procedures and standards. They must be prepared with the thought in mind that most persons using them for the development of an Air Force base master plan are not formally educated city planners. (Author).

Little Yellow House Carissa Halton,2018-09-27 Essays detailing one Edmonton woman’s experiences moving to a tough neighborhood in the inner city. “Ma’am, you sound like a very reasonable person. Can I advise you to just move?” Carissa Halton and her young family move into a neighbourhood with a tough reputation. As they make their home in one of the oldest parts of the city, she reflects on the revitalization that is slowly changing the view from her little yellow house. While others worry about the area’s bad reputation, she heads out to meet her neighbours, and through

them discovers the innate beauty of her community. Halton introduces us to a cast of diverse characters in her Alberta Avenue neighbourhood—including cat rescuers, tragic teens, art evangelists, and crime fighters—and invites us to consider the social and economic forces that shape and reshape our cities. “Halton clearly delights in interacting with people from all walks of life; her interest and empathy sparkle throughout. Her tone is factual, nonjudgmental, and often wryly funny. Little Yellow House is a balanced presentation of a diverse community in transition, complete with faults and growing pains.” —Rachel Jagareski, Foreword Review “It’s books like this that remind us all . . . that community is more than about special events that happen once a year. It’s about connecting to people often and throughout the year. Doing so can and does result in some wonderful experiences.” —Scott Hayes, St. Albert Gazette “An excellent resource for communities wanting to create change. It can also be a starting point for discussion with students.” —Judith Kulig, Alberta Views Magazine “In these stark and endearing personal essays, the author celebrates her life and lives fearlessly and fully with three children and a husband, despite a dystopian backdrop. Halton writes with humour, empathy, and spiritual maturity, and she doesn’t judge the inner city world outside her yellow house.” —Linda Alberta, Prairie Books Now

At Liberty to Die Howard Ball, 2013-07 Over the past hundred years, average life expectancy in America has nearly doubled, due largely to scientific and medical advances, but also as a consequence of safer working conditions, a heightened awareness of the importance of diet and health, and other factors. Yet while longevity is celebrated as an achievement in modern civilization, the longer people live, the more likely they are to succumb to chronic, terminal illnesses. In 1900, the average life expectancy was 47 years, with a majority of American deaths attributed to influenza, tuberculosis, pneumonia, or other diseases. In 2000, the average life expectancy was nearly 80 years, and for too many people, these long lifespans included cancer, heart failure, Lou Gehrig's Disease, AIDS, or other fatal illnesses, and with them, came debilitating pain and the loss of a once-full and often independent lifestyle. In this compelling and provocative book, noted legal scholar Howard Ball poses the pressing question: is it appropriate, legally and ethically, for a competent individual to have the liberty to decide how and when to die when faced with a terminal illness? At Liberty to Die charts how, the right of a competent, terminally ill person to die on his or her own terms with the help of a doctor has come deeply embroiled in debates about the relationship between religion, civil liberties, politics, and law in American life. Exploring both the legal rulings and the media frenzies that accompanied the Terry Schiavo case and others like it, Howard Ball contends that despite raging battles in all the states where right to die legislation has been proposed, the opposition to the right to die is intractable in its stance. Combining constitutional analysis, legal history, and current events, Ball surveys the constitutional arguments that have driven the right to die debate--Provided by publisher.
