Medical-Surgical Nursing - E-Book Donna D. Ignatavicius, Cherie R.

Rebar, Nicole M. Heimgartner, 2023-08-29 Learn the clinical judgment skills you need to succeed on the Next-Generation NCLEX® Exam and in medical-surgical nursing practice with Iggy's trendsetting, concept-based approach! From a team of nursing experts led by Donna Ignatavicius, *Medical-Surgical Nursing: Concepts for Clinical Judgment and Collaborative Care*, 11th Edition provides a solid foundation in medical-surgical nursing care that is patient-centered, evidence-based, and collaborative. In each chapter, content is organized by the most important concepts of care followed by commonly occurring exemplars for each concept. This perennial bestseller helps you learn to think like a nurse and learn how to apply your knowledge in the classroom, simulation laboratory, and clinical settings. UNIQUE! Unparalleled focus on clinical judgment and systems thinking ensures alignment with the NCSBN Clinical Judgment Measurement Model and emphasizes the six cognitive skills that you'll need in order to develop effective clinical judgment, to succeed when taking the Next-Generation NCLEX® Exam (NGN), and to enter clinical practice as a safe, competent, compassionate generalist nurse. UNIQUE! Data-driven Concept and Exemplar selections provide a strong foundation in professional nursing concepts and health and illness concepts, with application in each chapter. UNIQUE! Exceptional emphasis on NGN preparation includes chapter-opening Learning Outcomes and chapter-ending Get Ready for the Next-Generation NCLEX Examination! sections, plus NCLEX Examination Challenge questions and Mastery and NGN Questions, with an answer key including rationales on the Evolve website. Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a

common healthcare language, instead of using nursing-specific diagnostic language. Emphasis on patient safety highlights safety and evidence-based practice with Nursing Safety Priority boxes, as well as Drug Alert, Critical Rescue, and Action Alert boxes. Focus on care coordination and transition management addresses the continuity of care between acute care and community-based care. Direct, easy-to-read writing style features concise sentences and straightforward vocabulary, making this one of the most readable medical-surgical nursing textbooks available. Sherpath (sold separately) for Ignatavicius et al. Medical-Surgical Nursing, 11th Edition provides an interactive, adaptive learning experience!

The Bicycling Big Book of Training Danielle Kosecki, Editors of Bicycling Magazine, 2015-02-24 The Bicycling Big Book of Training is an encouraging, focused training book that will speak to beginner and intermediate cyclists without making them feel like novices. It covers all the information the reader needs to begin an effective training regimen. The book is divided into five sections that are then broken into miniguides for various cycling training disciplines. Cyclists will learn about how the body becomes fit and how that fitness translates to on-the-bike performance, while discovering the components of a successful training plan, including nutrition. Furthermore, riding disciplines such as road racing, endurance events, cyclocross, mountain biking, and track are discussed at length so readers can figure out which activities are right for them. The Bicycling Big Book of Training is an excellent guide for anyone who wants to learn more about cycling and take their performance to the next level.

M-Health Robert Istepanian, Swamy Laxminarayan, Constantinos S. Pattichis, 2007-01-04 M-health can be defined as the 'emerging mobile communications and network technologies for healthcare systems.' This book paves the path toward understanding the future of m-health technologies and

services and also introducing the impact of mobility on existing e-health and commercial telemedical systems. M-Health: Emerging Mobile Health Systems presents a new and forward-looking source of information that explores the present and future trends in the applications of current and emerging wireless communication and network technologies for different healthcare scenarios. It also provides a discovery path on the synergies between the 2.5G and 3G systems and other relevant computing and information technologies and how they prescribe the way for the next generation of m-health services. The book contains 47 chapters, arranged in five thematic sections: Introduction to Mobile M-health Systems, Smart Mobile Applications for Health Professionals, Signal, Image, and Video Compression for M-health Applications, Emergency Health Care Systems and Services, Echography Systems and Services, and Remote and Home Monitoring. This book is intended for all those working in the field of information technologies in biomedicine, as well as for people working in future applications of wireless communications and wireless telemedical systems. It provides different levels of material to researchers, computing engineers, and medical practitioners interested in emerging e-health systems. This book will be a useful reference for all the readers in this important and growing field of research, and will contribute to the roadmap of future m-health systems and improve the development of effective healthcare delivery systems.

Living and Dying in Brick City Sampson Davis, Lisa Frazier Page, 2014-02-11
An urgent picture of medical care in our cities, written by an emergency room physician (and co-author of the New York Times bestseller *The Pact*) who grew up in the very neighborhood he is now serving “A pull-no-punches look at health care from a seldom-heard sector . . . *Living and Dying* isn’t a sky-is-

falling chronicle. It's a real, gutsy view of a city hospital."—Essence In this book, Dr. Sampson Davis looks at the healthcare crisis in the inner city from a rare perspective: as a doctor who works on the front line of emergency medical care in the community where he grew up, and as a member of that community who has faced the same challenges as the people he treats every day. He also offers invaluable practical advice for those living in such communities, where conditions like asthma, heart disease, stroke, obesity, and AIDS are disproportionately endemic. Dr. Davis's sister, a drug addict, died of AIDS; his brother is now paralyzed and confined to a wheelchair as a result of a bar fight; and he himself did time in juvenile detention—a wake-up call that changed his life. He recounts recognizing a young man who is brought to the E.R. with critical gunshot wounds as someone who was arrested with him when he was a teenager during a robbery gone bad; describes a patient whose case of sickle-cell anemia rouses an ethical dilemma; and explains the difficulty he has convincing his landlord and friend, an older woman, to go to the hospital for much-needed treatment. With empathy and hard-earned wisdom, *Living and Dying in Brick City* is an important resource guide for anyone at risk, anyone close to those at risk, and anyone who cares about the fate of our cities.

Technology for Adaptive Aging National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Steering Committee for the Workshop on Technology for Adaptive Aging, 2004-04-25 Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and learning, employment, health, living

environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.

Mobile Technology for Adaptive Aging National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, 2020-10-25 To explore how mobile technology can be employed to enhance the lives of older adults, the Board on Behavioral, Cognitive, and Sensory Sciences of the National Academies of Sciences, Engineering, and Medicine commissioned 6 papers, which were presented at a workshop held on December 11 and 12, 2019. These papers review research on mobile technologies and aging, and highlight promising avenues for further research.

Ethics, Conflict and Medical Treatment for Children E-Book Dominic Wilkinson, Julian Savulescu, 2018-08-05 What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the

harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.

Morgan and Mikhail's Clinical Anesthesiology Cases John F.

Butterworth, David C. Mackey, John D. Wasnick, 2020-05-25 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. A new, clinically relevant, case-based review of anesthesiology-based on most widely-read text in the field Essential for written and oral board preparation, this new companion to Morgan and Mikhail's Clinical Anesthesiology, Sixth Edition is packed with informative clinical case vignettes. 300 succinct case descriptions emphasize common medical issues faced in clinical practice. Each case is followed by a series of board-style question and answers. The book reveals how experienced clinicians use critical thinking in their clinical decision making. With

case-based learning now pervasive in training for all medical specialties, especially anesthesiology, this unique resource fills a void in medical publishing. The cases are conveniently organized to match the content of the parent textbook to facilitate side-by-side study. Morgan and Mikhail's Clinical Anesthesiology Cases is also valuable as a quick clinical refresher before starting a busy day in the operating room. Features: • 300 case descriptions of common perioperative issues • Includes access to online videos demonstrating key procedures • Covers perioperative problems commonly faced in anesthetic practice • Each case is accompanied by board-style Q&As • Organized by subspecialty, disease, procedure, and patient age for easy correlation to real life cases • Ideal for preparation for written and oral board certification, maintenance of certification activities, and ongoing learning for anesthesiologists, nurse anesthetists, and anesthesiologist assistants
