Artificial Intelligence for Sustainable Finance and Sustainable Technology Abdalmuttaleb M. A. Musleh Al-Sartawi, 2022-01-01 This book shows latest research on artificial intelligence for sustainable technology. ICGER 2021 was organized by the Accounting, Finance and Banking Department at Ahlia University, Bahrain, and was conducted on the 15th and 16th of September. The strategic partners included the University of Jordan, the Bahrain Economists Society, the Association of Chartered Certified Accountants: ACCA, Al-Barka Banking Group and the International Computer Auditing Education Association: ICAEA . The theme of the ICGER 2021 centered around artificial intelligence for sustainable finance and sustainable technology. Accordingly, the papers presented at the conference provided a holistic view of sustainable finance, sustainability, AI, financial technology, cybersecurity, blockchain, CSR, and governance. This book, unlike ever before, brings together intelligence applications of new technologies and the sustainability requirements in the era of the digital economy, with special attention given to the opportunities, challenges, for education, business growth, and economic progression of nations which will help societies (economists, financial managers, engineers, ICT specialists, digital managers, data managers, policymakers, regulators, researchers, academics, and students) to better understand, use, and control AI applications and financial technologies to develop future strategies and to achieve sustainable development goals.

International Business In The Middle East Ashok Kapoor, 2019-04-11 This book, designed for

academic and business communities, discusses the dimensions of business development in the Middle East. It identifies distinguishing features, calls for attention to the human resources needs of an operation and the special requirements of host governments.

Business Politics in the Middle East Steffen Hertog, Giacomo Luciani, Marc Valeri, 2013-04-25
Although most Arab countries remain authoritarian, many have undergone a restructuring of state-society relations in which lower- and middle-class interest groups have lost ground while big business has benefited in terms of its integration into policy-making and the opening of economic sectors that used to be state-dominated. Arab businesses have also started taking on aspects of public service provision in health, media and education that used to be the domain of the state; they have also become increasingly active in philanthropy. The 'Arab Spring,' which is likely to lead to a more pluralistic political order, makes it all the more important to understand business interests in the Middle East, a segment of society that on the one hand has often been close to the ancien regime, but on the other will play a pivotal role in a future social contract. Among the topics addressed by the authors are the role of business in recent regime change; the political outlook of businessmen; the consequences of economic liberalisation on the composition of business elites in the Middle East; the role of the private sector in orienting government policies; lobbying of government by business interests and the mechanisms by which governments seek to keep businesses dependent on them.

Public Relations Planning Edward T. Vieira, Jr., 2018-10-03 Public Relations Planning provides students with an in-depth understanding of the steps involved in planning and executing a successful PR campaign. Taking a strategic approach to the subject, the author brings years of practical experience to the project, helping students see how it all fits together in reality. The book goes

beyond an introductory discussion of the theory of PR planning, incorporating material from cutting-edge research in the field. A discussion of the psychological aspects of communication, material on in-house/employee communication, as well as a chapter dedicated to discussing how social media strategies fit into a PR campaign, give students a real edge when it comes to executing an effective campaign. Plenty of global examples and a companion website featuring PowerPoint slides, a test bank, and answer key for end-of-chapter questions round out this excellent resource for students of public relations and corporate communication.

Doing Business in the Middle East Pawan S. Budhwar,Vijay Pereira,2023-05-04 The Middle East has for a long time been at the centre of global trade as well as political interest. Demographic and social change shifts in global economic power, rapid urbanisation, climate change and resource scarcity, and significant technological development make this region both complex and hugely important. Doing Business in the Middle East highlights both the opportunities and constraints confronting foreign investors in the region and proposes strategies on how best to overcome them. The book explores the existing and emerging political and legal frameworks, sociocultural patterns, national infrastructures, regulatory environment, conflict resolution and how to negotiate in the Middle East. It also provides useful insights into how to approach advertising and marketing, promotion and distribution, and also at the strategies for investing in the region and appropriate modes of entry. With a number of features such as case studies, examples of effective and ineffective practices, clear takeaways, and a note on a future agenda on each given topic, this book is highly practical. Based on robust research, this comprehensive guide to doing business in the Middle East is an ideal reference tool for potential foreign investors, those who are already doing business or intend to do so in the region, and for a range of business and policy decision-makers. The book is

also suitable for students and researchers in the fields of international management and business, international and strategic HRM, cross-cultural management, and business communication.

Public Relations in the Gulf Cooperation Council Countries Talal M Almutairi, Dean Kruckeberg, 2019-04-05 The Arab world has engaged in public relations for thousands of years, and the public relations literature provides multiple examples extending from ancient times. However, modern public relations is much more vaguely defined. This is partly because the research surrounding public relations practice in the Middle East remains sparse, especially in the Gulf Cooperation Council (GCC) countries. This book presents a clear picture of contemporary PR practice in this region, providing a background on the evolution of public relations in each GCC country. It shows how environmental factors (historical, cultural, socio-political, and economic) influence practice in the region. It also contributes to public relations scholarship, education, and practice worldwide by providing new perspectives to those unfamiliar with its practice in this region. This book will benefit scholars and practitioners alike through its informed analysis of the strengths and weaknesses of practice in the GCC countries, as well as being of great benefit to the development of professional practice in the region.

Doing Business in the Middle East Pete W. Moore, 2004-10-14 Is business the solution to the problems of the Middle East? Some economists and policymakers argue that unleashing the Arab private sector is the key to sustainable growth and more liberal politics. Pete Moore's book is the first to examine relations between state authority and elite business representation in the region. By analysing the Kuwait and Jordan cases, he considers why organised business in Kuwait has been able to coordinate policy reform with state officials, while their Jordanian counterparts have generally failed. The author concludes that unleashing the private sector alone is insufficient to

change current political and economic arrangements, and that successful economic adjustment requires successful political adjustment.

Middle East Review ,1993

The Gulf Crisis Khalid Al-Jaber,Sigurd Neubauer,2018-10-31 The Gulf Crisis marks a clear dividing line in the GCC's history reflecting a change in the political, economic, security, social and media realities of the intra-GCC relationship. The question on everyone's mind: will this Crisis be the final nail in the coffin of the Gulf Cooperation Council after nearly four decades?

Digital Resistance in the Middle East Deborah L. Wheeler,2017-06-26 This book argues that Internet diffusion and use in the Middle East enables meaningful micro-changes in citizens' lives, even in states where no Arab Spring revolution occurred. Using ethnographic evidence and taking a comparative perspective, it presents a grass roots look at how new media use fits into the practice of everyday life. It explores why citizens use social media to digitally route around state and other forms of power at work in their lives. This increase in citizen civic engagement, supported by new media use, offers the possibility of a new order of things, from redefining patriarchal power relations at home, to reconfigurations of citizens' relationships with the state, broadly defined. The author argues that new media channels offer pathways to empowerment widely and cheaply in the Middle East.

Future of the Middle East - United Pan-Arab States Sam A. Cohen,2014-08-27 The multiple crises permeating the Middle East, are teaching both the Arabs and Jews that they must strive to live

together. For the Arabs, many elements including language, religion, history, and culture are forcing them towards democracy, more unity, less conflict and greater cohesion. For Israel, it is proving impossible to survive as an Island in a turbulent sea of Arabs and Moslems. Time has come for all to start looking in the same direction and coalesce under the same banner. A united Pan-Arab States is becoming inevitable.

The Economics of Renewable Energy in the Gulf Hisham M. Akhonbay, 2018-09-27 The Cooperation Council for the Arab States of the Gulf (GCC) has been at the epicenter of global energy markets because of its substantial endowment of hydrocarbons. Yet countries in the region have also stated their intent to be global leaders in renewable energy. This collection explores the drivers for the widespread adoption of renewable energy around the GCC, the need for renewable energy and the policy-economic factors that can create success. All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various reasons including: a growing demand for electricity because of increasing populations, an increasing government fiscal deficit due to inefficient subsidies, the need to diversify the economy and global pressure to meet climate change requirements. However, the decision of when and by how much to introduce renewable energy is fraught with complications. In this book, a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to success, whether it be the declining cost of producing energy from hydrocarbons, an infrastructure which needs to be updated, social acceptance, lack of financing and even harsh weather. Weighing up all these factors, the book considers the route forward for renewable energy in the Gulf region. The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area. It will be of great interest to academic researchers

and policy makers alike, particularly those working in the areas of energy economics, public policy and international relations.

The End of Ambition Steven A. Cook, 2024 In *The End of Ambition*, Steven A. Cook charts the course of the United States' encounter with the Middle East from the mid-twentieth century through the present day. Looking back, Cook makes a bold claim: the US was--despite setbacks and moral costs--successful. That record of achievement began to unravel in the early 1990s when policymakers embarked upon a set of overly ambitious policies to remake the Middle East. Cook highlights that calls to withdraw from the region are rash given the important interests the US maintains in the region. Yet, he also underscores how those interests are changing and explores alternatives to America's current approach to the Middle East against the backdrop of political uncertainty in the United States and a changing global order.

Sustaining Conflict Katherine Natanel, 2016-03-29 *Sustaining Conflict* develops a groundbreaking theory of political apathy, using a combination of ethnographic material, narrative, and political, cultural, and feminist theory. It examines how the status quo is maintained in Israel-Palestine, even by the activities of Jewish Israelis who are working against the occupation of Palestinian territories. The book shows how hierarchies and fault lines in Israeli politics lead to fragmentation, and how even oppositional power becomes routine over time. Most importantly, the book exposes how the occupation is sustained through a carefully crafted system that allows sympathetic Israelis to “knowingly not know,” further disconnecting them from the plight of Palestinians. While focusing on Israel, this is a book that has lessons for how any authoritarian regime is sustained through apathy.

The Girl From Kathmandu Cam Simpson, 2018-04-17 New York Times Book Review Editor's

Choice The shocking story of the massacre of a group of Nepalese men working as Defense contractors for the United States Government during the Iraq War, and the widow who dedicated her life to finding justice for her husband and the other victims—a riveting tale of courageous heroes, corporate war profiteers, international business, exploitation, trafficking, and human rights in the age of global capitalism that reveals how modern power truly works. In August of 2004, twelve men left their village in Nepal for jobs at a five-star luxury hotel in Amman, Jordan. They had no idea that they had actually been hired for sub-contract work on an American military base in Iraq. But fate took an even darker turn when the dozen men were kidnapped and murdered by Islamic extremists. Their gruesome deaths were captured in one of the first graphic execution videos disseminated on the web—the largest massacre of contractors during the war. Compounding the tragedy, their deaths received little notice. Why were these men, from a remote country far removed from the war, in Iraq? How had they gotten there? Who were they working for? Consumed by these questions, award-winning investigative journalist Cam Simpson embarked on a journey to find answers, a decade-long odyssey that would uncover a web of evil spanning the globe—and trigger a chain of events involving one brave young widow, three indefatigable human rights lawyers, and a formidable multinational corporation with deep governmental ties. A heart-rending, page-turning narrative that moves from the Himalayas to the Middle East to Houston and culminates in an epic court battle, *The Girl from Kathmandu* is a story of death and life—of the war in Iraq, the killings of the twelve Nepalese, a journalist determined to uncover the truth, and a trio of human rights lawyers dedicated to finding justice. At its heart is one unforgettable young woman, Kamala Magar, who found the courage to face the influential men who sent her husband to his death—a model of strength hope, bravery, and an unbreakable spirit who reminds us of the power we all have to make

a difference.
