**Intracellular Calcium, 2 Volume Set** Anthony K. Campbell,2014-12-15

Thousands of imaginative scientists, over more than a century, have revealed the fascinating story of intracellular calcium, through a pathway of ingenious invention and discovery. Intracellular Calcium, the definitive book on this topic, reveals: The pathway of discovery and invention of intracellular calcium over more than 100 years. The evidence for intracellular calcium as a universal switch in all animal, plant, fungal and microbial cells How the components required for calcium signalling are named and classified. The ingenious technology, which has been developed to study intracellular calcium. How calcium is regulated inside cells and how it works to trigger an event. The role of intracellular calcium in disease, cell injury and cell death. How many drugs work through the calcium signalling system. How intracellular calcium is involved in the action of many natural toxins. How the intracellular calcium signalling system has evolved over 4000 million years, showing why it was crucial to the origin of life. A key principle presented throughout the book is the molecular variation upon which the intracellular calcium signalling system depends. This variation occurs within the same cell type and between cells with different functions, providing the invisible matrix upon which Darwin and Wallace's Natural Selection depends. Featuring more than 100 figures, including detailed chemical structures as well as pictures of key pioneers in the field, a bibliography of more than 1500 references, as well as detailed subject and organism indices, this definitive work provides a unique source of scholarship for teachers and researchers in the biomedical sciences and beyond.

New Religions [2 volumes] Eugene V. Gallagher,Lydia Willsky-Ciollo,2021-02-15 A valuable resource for students and general audiences, this book provides a unique global perspective on the history, beliefs, and practices of emergent faith communities; new religious traditions; and

religious movements worldwide, from the 19th century to the present. *New Religions: Emerging Faiths and Religious Cultures in the Modern World* provides insightful global perspectives on the emergent faith communities and new traditions and movements of the last two centuries. Readers will gain access to the information necessary to explore the significance, complexities, and challenges that modern religious traditions have faced throughout their history and that continue to impact society today. The work identifies the themes and issues that have often brought new religions into conflict with the larger societies of which they are a part. Coverage includes new religious groups that emerged in America, such as the Seventh-day Adventists, the Latter-day Saints, and the Jehovah's Witnesses; alternative communities around the globe that emerged from the major Western and Eastern traditions, such as Aum Shinrikyo and Al-Qaeda; and marginalized groups that came to a sudden end, such as the Peoples Temple, Heaven's Gate, and the Branch Davidians. The entries highlight thematic and broader issues that run across the individual religious traditions, and will also help students analyze and assess the common difficulties faced by emergent religious communities.

*Farming Futures* C. Shambu Prasad,Ajit Kanitkar,Deborah Dutta,2023-04-27

This book studies the management challenges and possibilities in sustaining farmer producer organisations (FPOs). It goes beyond the conventional metrics of cost-benefit analysis by drawing on 15 case studies of diverse FPOs spread across India to fill a significant knowledge-practice gap in the domain of producer collectives. The book explores issues of ownership and governance, studies the empirical basis for policy decisions on FPOs, and provides actionable insights and knowledge, keeping in mind the complexity of the institutional design of an FPO. It also discusses the envisioned role of civil society organisations in supporting FPOs and looks at the kind of institutional innovations that are needed to create a cohesive ecosystem for FPOs. A unique collaborative project jointly authored by academics and

development practitioners, the book will be of use to students and researchers of agricultural economics, environment and business, agricultural development, environmental economics, rural studies, entrepreneurship, and South Asian studies. It will also be of interest to development professionals, civil society organisations, and policymakers.
