Steel on Steel Stephen Baines,2014-11-01 The inside story of the privatisation of the freight arm of Queensland Rail and one of the most extraordinary transformations of a company in the history of Australian business. An icon that touched every part of life in the state, Queensland Rail (QR) was famously and audaciously catapulted into the private sector in 2010 after more than 140 years of government ownership. CEO Lance Hockridge and state Treasurer Andrew Fraser oversaw the privatisation, which simultaneously involved a massive de-merger from the passenger rail business and a \$4. billion initial public offering – all executed in the face of unprecedented outrage and opposition. Authored by Stephen Baines, who was involved in the intense negotiations with the government at all levels, *Steel on Steel* captures the story of Australia's ultimate corporate soap opera, as powerful forces and big name stars clambered onto the stage, and the daily media smorgasbord of rumour, intrigue, speculation and high farce spooked Australian investors. In the end, Aurizon, as it is now known, was saved by seasoned international investors who enthusiastically embraced the new listing and turned the government-owned railroad into a private engine of prosperity and growth.

Legal Geography Tayanah O'Donnell, Daniel F. Robinson, Josephine Gillespie, 2019-12-06 This book is the first legal geography book to explicitly engage in method. It complements this by also bringing together different perspectives on the emerging school of legal geography. It explores human-environment interactions and showcases distinct environmental legal geography scholarship. *Legal Geography: Perspectives and Methods* is an innovative book concerned with a new relational and material way of examining our legal-spatial world. With chapters examining natural resource management, Indigenous knowledge and political ecology scholarship, the text introduces legal geography's modes of analysis and critique. The book explores topics such as Indigenous environmental rights, the impacts of extractive industries, mediation of climate change, food, animal and plant patents, fossil fuels, mining and coastal environments based on empirical, jurisdictional and methodological insights from Australia, New Zealand and the Asia-Pacific to demonstrate how space and place are invoked in legal processes and contestations, and the methods that may be employed to explore these processes and contestations. This book examines the role of legal geographies in the 21st century beyond the simple "law in action", and it will thus appeal to students of socio-legal studies, human geography, environmental studies, environmental policy, as well as politics and international relations.

Macroeconomics Douglas McTaggart, Christopher Findlay, Michael Parkin, 2012-10-04 High quality, engaging content for students...ultimate flexibility for educators The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content – your way. *Economics* 7th edition provides a streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. By leaving the more technical content and application until later, students can enjoy the more exciting policy material from the beginning and engage with the content early. Through compelling examples, clear explanations and the latest instructive on-line

resources, the text draws students into the content and reinforces learning through practice and solving problems which are relevant to them. The authors train students to think about issues in the way real economists do, and learn how to explore difficult policy problems and make more informed decisions by offering a clear introduction to theory and applying the concepts to today's events, news, and research.

Economics Douglas McTaggart, Christopher Findlay, Michael Parkin, 2015-05-20 High quality, engaging content for students...ultimate flexibility for educators The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content – your way. Economics 7th edition provides a streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. Designed for Digital Jeanne W. Ross, Cynthia M. Beath, Martin Mocker, 2021-09-21 One of Forbes's Top Ten Technology Books of the Year How to redesign 'big, old' companies for digital success—featuring a survey of 300+ business leaders and 30+ global organizations, including Amazon, Uber, LEGO, Toyota North America, Philips, and USAA. Most established companies have deployed such digital technologies as the cloud, mobile apps, the internet of things, and artificial intelligence. But few established companies are designed for digital. This book offers an essential guide for retooling organizations for digital success through 5 key building blocks: • Shared Customer Insights • Operational Backbone • Digital Platform • Accountability Framework • External Developer Platform In the digital economy, rapid pace of change in technology capabilities and customer desires means that business strategy must be fluid. As a result, business design has become a critical management responsibility. Effective business design enables a company to quickly pivot in response to new competitive threats and opportunities. Most leaders today, however, rely on organizational structure to implement strategy, unaware that structure inhibits, rather than enables, agility. In companies that are designed for digital, people, processes, data, and technology are synchronized to identify and deliver innovative customer solutions—and redefine strategy. Digital design, not strategy, is what separates winners from losers in the digital economy. *Designed for Digital* offers practical advice on digital transformation, with examples that include Amazon, BNY Mellon, DBS Bank, LEGO, Philips, Schneider Electric, USAA, and many other global organizations. Drawing on 5 years of research and in-depth case studies, the book is an essential guide for companies that want to disrupt rather than be disrupted in the new digital landscape.

The Lyceum Magazine Ralph Albert Parlette, 1918

Sustainable Energy - without the hot air David JC MacKay, 2016-05-14 The enlightening, best-selling book on understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from – and where it could come from – but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. *Sustainable Energy - without the hot air* addresses the energy crisis

objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale – for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book – it's an honest, realistic, and humorous discussion of all our energy options.

Midori Haus Chie Kawahara, 2017-11-18 Managing a major remodel of your home involves learning various aspects of a construction project: permitting; hiring contractors; clarifying what you really mean and want; managing a budget; overseeing quality, avoiding regrets; doing what's right for yourself and standing up for yourself. It's a big job. The learning curve is high and often we homeowners don't get to apply the skills we learned again. In this book, the stories of a couple going through this learning curve is told through the lens of a novice just like a conversation with a homeowner over a cup of tea. What they thought they wanted (a brand new house in modern minimalist style with solar panels and recycled materials) is very different than what they ended up with (remodel of a 90-year-old house in the classic Arts and Crafts style to meet the stringent international building standard called Passive House). What caused this shift? How did they choose the contractor? How did they navigate out of overwhelm of green building choices? How did they manage the relationships? What would they do differently? Was it worth it? This book chronicles the journey by a couple from choosing the location through living in the house after the renovation completion. It wasn't all about finding smart people and following expert guidance. When expert opinions diverged and they got stuck in analysis paralysis they had to trust their judgment and chose what they felt was right for them. After all, they'll be living in the house for years after the experts are gone. Reviews for MIDORI HAUS: Chie Kawahara is a storyteller. Her book, *Midori Haus*, tells a compelling story in a conversational style about a couple who wanted to remodel an older home that would use as little energy as possible—and was comfortable and healthy to live in. Anyone who has an interest in green building—doing right for oneself and the planet—will find a friend in this book. -Jim Gunshinan, Editor, Home Energy Magazine “Midori Haus serves as a journey of adapting, learning, greening, nurturing, and caring for an old house by renewing the house to address current and future environmental challenges. The narrative is delightfully educational – the design process of achieving the passive house standard will be better understood through these stories and conversations.” -Alison G. Kwok, Ph.D., AIA, CPHC, University of Oregon The international Passive House standard has gained a deserved reputation as the fastest growing building energy efficiency standard in the world. Unsurprisingly, publications about it have mostly been by and for industry professionals. *Midori Haus* represents an alternative, introducing readers to Passive House through the eyes of a homeowner undertaking a remodeling project. Chie Kawahara takes readers along on her journey of discovery and remodeling triumph. She makes the process understandable and accessible and readers are given practical tools they can use on their own Passive House projects. There's nothing like a good case study told by the people involved to bring abstract concepts to life. *Midori Haus* doesn't disappoint. -Elrond Burrell, Architect, CPHD, blogger In this delightful book, Chie

Kawahara describes the process she and her husband went through to purchase a 1920s bungalow and turn it into a state-of-the-art, healthy, green, Passive House. This account of their experiences is highly instructional for anyone considering buying and renovating a house, and it's a wonderful read! -Alex Wilson, Founder, BuildingGreen, Inc.

Aimms Optimization Modeling Johannes Bisschop, 2006 The AIMMS Optimization Modeling book provides not only an introduction to modeling but also a suite of worked examples. It is aimed at users who are new to modeling and those who have limited modeling experience. Both the basic concepts of optimization modeling and more advanced modeling techniques are discussed. The Optimization Modeling book is AIMMS version independent.

IPC Green Inventory World Intellectual Property Organization, 2017 This brochure explains how the IPC Green Inventory can give direct access to the latest patent information about technologies in a number of fields including alternative energy production, energy conservation, transportation, waste management, and agriculture and forestry

Different Histories, Shared Futures Mobo Gao, Justin O'Connor, Baohui Xie, Jack Butcher, 2023-02-13 This book delves into the Australia-China relationship, which is currently at its worst since 1972, when the two countries first established a diplomatic relationship. Australia is seen by the US as its front-line ally in its fight in containing China. Derived from an international symposium organized by the editorial team and held in Adelaide, South Australia in September 2021, these essays are an attempt to offer some understanding and explanations for the deterioration of Sino-Australian ties. It is also an attempt to explore the ways by which the two countries can reach some common ground for the future. Despite our very different pasts, can we seek out a shared future together, a future that avoids a war, hot or cold, between a rising power of China and the incumbent US hegemon?

The Engaging Realm of Kindle Books: A Thorough Guide Unveiling the Advantages of E-book Books: A Realm of Ease and Flexibility E-book books, with their inherent portability and ease of access, have liberated readers from the constraints of hardcopy books. Gone are the days of lugging cumbersome novels or carefully searching for specific titles in shops.
