**Interactive Collaborative Learning** Michael E. Auer, David Guralnick, James Uhomoibhi, 2016-12-31 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning, held 21-23 September 2016 at Clayton Hotel in Belfast, UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general, but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning, with a focus on collaborative learning. Today the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings, and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

Advertising is explored as a creative communication message from a brand, created by advertising agencies and distributed across different media to target the right consumers. The book provides an understanding of the benefits of advertising, its role in the economy and, even more so, acknowledges that advertisements are not only about selling but also about effectively communicating a message. The creative and conceptual approach towards the communication process is discussed, and insight is presented into the dynamics within the industry and the different stakeholders involved, while recognising how different creative elements in advertisements are consciously selected to make them appealing. Finally, it considers how to analyse and measure an advert's effectiveness and looks ahead to future ideas and technologies arising in advertising. Effectively combining theory with practical insight, each chapter begins with learning objectives and ends with key learnings. International case studies feature throughout, including insights from British Gas, WPP, Audi and KFC, as well as other examples from smaller organisations and the non-profit sector.
