**On the Origin of Myths in Catastrophic Experience, vol. 1: Preliminaries** Marinus Anthony van der Sluijs,2019-01-01

Creation myths around the world reveal an intricate network of recurrent motifs. Many of these are counterintuitive and not widely known, describing a time when the sky was low, the stars did not yet shine, multiple suns appeared, the moon was brighter than the sun, no land existed, deities and mortals maintained frequent contact, a 'world axis' in the form of a tree, ladder or giant man connected the earth with the sky, a devastating flood or fire ended the old order, and so forth. The present work, in multiple volumes, aims to find an origin for this cross-culturally and internally consistent body of traditions in a series of extraordinary natural events relating especially to the earth's transition from the last glacial period to the Holocene. This first volume sets the stage for the interdisciplinary hypothesis. Essential lines of research receive a historical introduction: comparative mythology, catastrophism and the study of the mythical world axis in relation to the earth's rotation. Various astronomical and meteorological interpretations that are not strictly catastrophist are explored for several types of myths about the sun, the moon and the world axis, but leave many of the most intriguing traditions unexplained. It is argued that a structural core of the worldwide mythology of 'creation and destruction', in which the cosmic axis takes pride of place, points to a specific period of dramatic natural circumstances in real prehistoric time. A new synopsis is provided of this universal mythological substrate. It emerges that the mythical world axis cannot have been based on a single object seen or imagined at one of the poles, as has usually been supposed. This surprising conclusion paves the way for the innovative geomagnetic theory proposed in volume 2.

*Pan-African Chronology II* Everett Jenkins, Jr.,2011-02-14 This continuation volume of the Pan-African Chronology set covers the most significant events in the African diaspora from the end of the American Civil War through the pre-World War I years. This was a time of great change for black Americans--Reconstruction, the founding of the NAACP, the formation of the separate but equal doctrine, and the migration of blacks from the rural South to Northern cities. The eradication of slavery as a legalized institution was finally realized in the Americas, while the struggle to end it in Asia was also taking place. European colonialism in Africa was accelerated, ironically coinciding with humanitarian efforts to end the slave trade on the African continent. These events and many others are covered here.

*Flammable Cities* Greg Bankoff,Uwe Lübken,Jordan Sand,2012-01-19 In most cities today, fire has been reduced to a sporadic and isolated threat. But throughout history the constant risk of fire has left a deep and lasting imprint on almost every dimension of urban society. This volume, the first truly global study of urban conflagration, shows how fire has shaped cities throughout the modern world, from Europe to the imperial colonies, major trade entrepôts, and non-European capitals, right up to such present-day megacities as Lagos and Jakarta. Urban fire may hinder commerce or even spur it; it may break down or reinforce barriers of race, class, and ethnicity; it may serve as a pretext for state violence or provide an opportunity for displays of state benevolence. As this volume demonstrates, the many and varied attempts to master, marginalize, or manipulate fire can turn a natural and human hazard into a highly useful social and political tool.

**The Prehistories of Baseball** Seelochan Beharry,2016-03-09 Baseball's roots lie deep in our ancestral past. The ancient arts of throwing (distance warfare), hitting (close quarters combat), and running (attack and retreat) were woven into the earliest forms of baseball. Early humans recognized the importance of the sun and sought to placate it with sacrificial offerings, imitating its movements and deifying it. Myths and relics of these foundational practices and beliefs were carried westward across the Old World by Indo-European peoples. Games for the early British and Continental Europeans (notably the Celts and Druids) served military, religious, social and educational needs. As the Celts and Druids came under the control of the Roman Empire, and later the Christian Church, their customs and practices, including games, fell out of favor. Despite persecution, some folk games survived the millennia under such names as stool-ball, tut-ball, and base-ball. Descendants of these peoples brought their variant games to the New World where the standardization of various informal rules led to their rapid spread. Baseball, with its underlying beliefs, superstitions and practices, still brings us together with familiar and comforting rituals as we assemble under the sun.
