Improving Intergroup Relations Walter G. Stephan, Cookie White Stephan, 2001-07-27 This book is intended both as supplementary reading for courses and as a practical guidebook for individuals and programs interested in reducing prejudice and improving intergroup relations. It provides the only comprehensive review and compilation of techniques of improving intergroup relations. There's a huge amount of literature on the causes and nature of prejudice, reflecting great interest in the topic, but the literature on prejudice reduction is more scattered, spread across a range of theoretical and applied sources. This book brings these literatures together with an emphasis on helping to elucidate what works and why.

**Innovative CSR** Céline Louché, Samuel Idowu, Walter Filho, 2017-09-08 By and large, corporations of the 21st century have come to realise that their obligations to societies in terms of corporate social responsibility are fourfold: economic, ethical, altruistic and strategic. Meeting these four responsibilities is crucial to their survival in their various markets and industries; it also requires them to rewrite their previously less socially responsible business models in order to do so. All indications continue to suggest that it is those organisations that are perceived to be socially responsible by stakeholders in modern markets that survive and prosper. Corporations have equally realised that by being innovative in all things – including their CSR activities and initiatives – they will add value to the so-called bottom line, to the positive contributions they make to society and to how they are perceived by their key stakeholders. However, many criticisms have been made of CSR in its current form, often related to the lack of value that it generates within the enterprise and the fact that it offers only a partial and short-term response to the full challenges of sustainable development. The time has come to shift the CSR focus away from risk management towards a more progressive and entrepreneurial approach that seeks to create value and identify sustainable opportunities for strategic innovation. This book aims to explore, inspire and support creative, innovative and strategic CSR. Innovation in this book means new products, services and technologies and, in addition, new organisational and institutional systems, structures and new business models that empower the organisation to advance strategically in an ever more competitive business world. Both research and practice show that CSR has mainly been approached in terms of value protection and risk management, where the main objective has been to protect companies' existing assets or avoid scandals. Therefore, in many cases where CSR remains at the forefront of business activity, it does not lead to fundamental changes and is not yet integrated as a strategic component where it could create value, generate new ideas and open new opportunities. How do corporate entities shift their attention from risk management to value creation? This is the key question that this book attempts to answer, both theoretically and empirically as well as through real case studies and experiences. With contributions from a crème de la crème of scholars from 12 countries, Innovative CSR gathers together a cornucopia of innovative practices that will be essential reading for academics and practitioners alike.

**Community Seed Banks** Ronnie Vernooy, Pitambar Shrestha, Bhuwon Sthapit, 2015-05-15 Community seed banks first appeared towards the end of the 1980s, established with the support of international and national non-governmental organizations. This book is the first to provide a global review of their development and includes a wide range of case studies. Countries that pioneered various types of community seed banks include Bangladesh, Brazil, Ethiopia, India, Nepal, Nicaragua, the Philippines and Zimbabwe. In the North, a particular type of community seed bank emerged known as a seed-savers network. Such networks were first established in Australia, Canada, the UK and the USA before spreading to other countries. Over time, the number and diversity of seed banks has grown. In Nepal, for example, there are now more than 100 self-described community seed banks whose functions range from pure conservation to commercial seed production. In Brazil, community seed banks operate in various regions of the country. Surprisingly, despite 25 years of history and the rapid growth in number, organizational diversity and geographical coverage of community seed banks, recognition of their roles and contributions has remained scanty. The book reviews their history, evolution, experiences, successes and failures (and reasons why), challenges and prospects. It fills a significant gap in the literature on agricultural biodiversity and conservation, and their contribution to food sovereignty and security.

*Human Pharmacology* Theodore M. Brody, Joseph Larner, Kenneth P. Minneman, 1998 Unique among pharmacology textbooks, HUMAN PHARMACOLOGY: MOLECULAR TO CLINICAL organizes drugs of a class according to the characteristics of the class, with individual drugs discussed in relation to other drugs of the class. This approach helps students understand strengths and weaknesses of drugs, both in comparison with each other and in certain clinical conditions. The standard format allows for quick reference, and the more than 400 full-color illustrations focus on processes and mechanisms. Material is current, with changes reflecting today's pharmacotherapy. Unique New Horizons section discusses drugs being evaluated by the FDA for use in the next two to three years. Hundreds of color-coded boxes and tables allow for rapid access, and summary tables are now more cramable. Superb index gives user quick access to specific information. Hundreds of excellent color illustrations describe important processes, structures, and interactions. USMLE-type questions at the ends of chapters allow for on-going self-assessment.
