Karjaluoto, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and

branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

Personal Account Tony Comper, Bruce Dowbiggin, 2020-11-03 After nearly four decades at Bank of Montreal, former President and CEO Tony Comper shares leadership lessons from his experience at the helm of one of the world's largest financial institutions. Anthony "Tony" Comper likes to say that he can sum up his remarkable career in Canadian banking in 25 stories. In a business often filled with big personalities and memorable characters, Tony's motto is *Festina Lente* – make haste slowly. In *Personal Account: 25 Tales* about Leadership, Learning, and Legacy from a Lifetime at Bank of Montreal, Comper chronicles how he guided the bank's software evolution on real-time banking and the introduction of ABMs. He also saw BMO evolve from traditional lender to facilitator in the market, partnering with businesses to create a more vibrant source of capital. That innovation included Tony's role in integrating women and new Canadians into BMO while fighting anti-Semitism in the community. He was also critical in creating new banking models for the Indigenous community. A first-person analysis of the major transitions in his almost four decades at the bank. A memoir of turbulent, challenging times. An

Impact of Mobile Payment Applications and Transfers on Business Opati, Thaisaiyi Zephania, Gachukia, Martin Kang'ethe, 2019-12-20 Consumers continue to rely heavily on their phones to complete such tasks as transferring funds between banks or accounts, depositing or withdrawing funds, paying bills, and purchasing items. Mobile money users are oftentimes more financially resilient and can protect themselves better against economic and other shocks. Moreover, mobile money can increase the velocity of money in circulation because it reduces the transactions and time costs of making retail payments. As such, understanding the impact of mobile payments is imperative for businesses and the economy. *Impact of Mobile Payment Applications and Transfers on Business* is a pivotal reference source that provides vital research on mobile money transfer and its impact in social, corporate, and micro- and macro-policies concerning the aggregate economy and individual households as a whole within an economy. It covers the impact, innovations, business-to-business transformations, regulatory framework, challenges, and ethical issues surrounding mobile money transfers around the world. This book is ideally designed for economists, financial analysts, business managers, leaders, scholars, practitioners, researchers, and students in fields that include management, finance, economics, commerce, and

leadership.
