Hossein Baharvand,Nasser Aghdami

Organizing for Sustainability Jan Jonker, 2021 This upper-level Open Access textbook aims to educate students and professionals on how to develop business models that have a positive impact on people, society, and the social and ecological environment. It explores a different view of how to organize value creation, from a focus on an almost exclusively monetary value creation to one that creates positive impact through multiple values. The book offers students and entrepreneurs a structured approach based through the Business Model Template (BMT). It consists of three stages and ten building blocks to facilitate the development of a business model. Users, be they students or practitioners, need to choose from one of the three offered business model archetypes, namely the platform, community, or circular business models. Each archetype offers a dedicated logic for value creation. The book can be used to develop a business model from scratch (turning an idea into a working prototype) or to transform an existing business model into one of the three archetypes.

Throughout the book extra sources, links to relevant online video clips, assignments and literature are offered to facilitate the development process. This book will be of interest to students studying the development of business models, sustainable management, innovation, and value creation. It will also be of interest executives, and professionals such as consultants or social entrepreneurs seeking further education.-- Provided by publisher.

Taxocracy Scott Hodge, 2024-04-09 Taxocracy: What You Don't Know About Taxes and How They Rule Your Daily Life won't help you lower your tax bill, but it will help you understand how politicians use taxes to influence our lives, how taxes harm the economy, and why we need a simpler tax system. Did you ever wonder why the costs of

health care, housing, and college tuition keep going up? Or how your neighbor could afford that fancy electric car? Or why there are so many hard seltzers on the market? Your first guess might not be “taxes,” but they play a big role. We live in a world ruled by taxes—a taxocracy. History is full of misguided tax policies that led to “see-through” buildings, tax-free attics, three-wheeled cars, women in children’s clothing, and baked chips to go along with our hard seltzer. Written by former Tax Foundation CEO Scott Hodge, *Taxocracy: What You Don’t Know About Taxes and How They Rule Your Daily Life* uses amusing lessons from past tax policies gone wrong to explore how the US tax code caused serious consequences, affecting how we get our health insurance, the price of a college education, what car we buy, where we bank, and, in some cases, even when we die. *Taxocracy* outlines economic principles for designing a tax code that doesn’t rule our daily lives—a tax code that promotes economic growth, free-enterprise, and takes the politics out of tax policy.

Hematopoietic Stem Cell Transplantation for the Pediatric Hematologist/Oncologist Valerie I.

Brown, 2017-12-22 This volume provides a comprehensive and state-of-the-art review on pediatric hematopoietic stem cell transplantation (HSCT). The book covers such topics as graft versus host disease (GVHD), HSC mobilization, stem cell selection, and HSCT-relevant laboratory assays and techniques. The text is specially formatted so that the scientific basis of HSCT and ethical considerations are integrated into the relevant clinical framework. Each chapter also includes diagrams, illustrations, and tables that summarize key points and concepts that can be used as a quick visual reference for the reader. Written by experts in the field, *Hematopoietic Stem Cell Transplantation for the Pediatric Hematologist/Oncologist*

is a valuable resource on pediatric HSCT suited for pediatric hematologists-oncologists, fellows, advanced practitioners, clinical nurses, and other referring physicians.

Advances in Stem Cell Research Hossein

Baharvand,Nasser Aghdami,2012-05-26 *Advances in Stem Cell Research* discusses recent advances in stem cell science, including therapeutic applications. This volume covers such topics as biomanufacturing iPS cells for therapeutic applications, techniques for controlling stem cell fate decisions, as well as current basic research in such areas as germ line stem cells, genomics and proteomics in stem cell research. It is a useful book for biology and clinical scientists, especially young

investigators and stem cell biology students who are newly entering the world of stem cells research. The editors hope that the new knowledge and research outlined in this book will help contribute to new therapies for a wide variety of diseases that presently afflict humanity.

World Economic Outlook, April 2019 International Monetary Fund. Research Dept.,2019-04-09 After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

Practical Ship Design D.G.M. Watson, 2002-02-22

The ever-growing demand for commercial activities at sea has meant that ships are rapidly developing and that the rules governing their construction and operation are changing. *Practical Ship Design* records these changes, their outcomes and the reasoning behind them. It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority. It provides coverage of cargo ships and passenger ships, tugs, dredgers and other service craft. It also includes concept design, detail design, structural design, hydrodynamics design, the effect of regulations, the preparation of specifications and matters of costs and economics. Drawing on the author's extensive practical experience, *Practical Ship Design* is likely to interest everybody involved in the design, construction, repair and operation of ships. Students and the most experienced professionals will all benefit from the book's vast store of design data and its conclusions and recommendations.

Advanced Macroeconomics Filipe R.
Campante, Federico Sturzenegger, Andrés
Velasco, 2021-10-11 Macroeconomic policy is one of the
most important policy domains, and the tools of
macroeconomics are among the most valuable for policy
makers. Yet there has been, up to now, a wide gulf
between the level at which macroeconomics is taught at
the undergraduate level and the level at which it is
practiced. At the same time, doctoral-level textbooks are
usually not targeted at a policy audience, making advanced
macroeconomics less accessible to current and aspiring
practitioners. This book, born out of the Masters course the
authors taught for many years at the Harvard Kennedy
School, fills this gap. It introduces the tools of dynamic
optimization in the context of economic growth, and then
applies them to a wide range of policy questions - ranging
from pensions, consumption, investment and finance, to
the most recent developments in fiscal and monetary

policy. It does so with the requisite rigor, but also with a light touch, and an unyielding focus on their application to policy-making, as befits the authors' own practical experience. *Advanced Macroeconomics: An Easy Guide* is bound to become a great resource for graduate and advanced undergraduate students, and practitioners alike.

Atlas of Echocardiography in Pediatrics and Congenital Heart Diseases Maryam Moradian,Azin

Alizadehasl,2021-01-04 This atlas provides a practical guide to the diagnosis of congenital heart disease using echocardiography in both adults and children. A plethora of high-quality echocardiography images provide practical examples of how to diagnose a range of conditions correctly, including aortic stenosis, tricuspid atresia, coronary artery fistula and hypoplastic left heart syndrome. *Atlas of Echocardiography in Pediatrics and Congenital Heart Diseases* describes the diagnostic management of a range of congenital heart diseases successfully in both adults and children. Therefore it provides a valuable resource for both practicing cardiologists who regularly treat these patients and for trainees looking to develop their diagnostic skills using echocardiography.

The European Blood and Marrow Transplantation Textbook for Nurses Michelle Kenyon,Aleksandra Babic,2018-03-14 This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive

introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.
