*A Death in the Rainforest* Don Kulick, 2019-06-18  
“Perhaps the finest and most profound account of ethnographic fieldwork and discovery that has ever entered the anthropological literature.” —The Wall Street Journal “If you want to experience a profoundly different culture without the exhausting travel (to say nothing of the cost), this is an excellent choice.” —The Washington Post  
As a young anthropologist, Don Kulick went to the tiny village of Gapun in New Guinea to document the death of the native language, Tayap. He arrived knowing that you can’t study a language without understanding the daily lives of the people who speak it: how they talk to their children, how they argue, how they gossip, how they joke. Over the course of thirty years, he returned again and again to document Tayap before it disappeared entirely, and he found himself inexorably drawn into their world, and implicated in their destiny. Kulick wanted to tell the

story of Gapuners—one that went beyond the particulars and uses of their language—that took full stock of their vanishing culture. This book takes us inside the village as he came to know it, revealing what it is like to live in a difficult-to-get-to village of two hundred people, carved out like a cleft in the middle of a tropical rainforest. But *A Death in the Rainforest* is also an illuminating look at the impact of Western culture on the farthest reaches of the globe and the story of why this anthropologist realized finally that he had to give up his study of this language and this village. An engaging, deeply perceptive, and brilliant interrogation of what it means to study a culture, *A Death in the Rainforest* takes readers into a world that endures in the face of massive changes, one that is on the verge of disappearing forever.

### **Governing Africa's Forests in a Globalized World**

Laura A. German, Alain Karsenty, Anne-Marie Tiani, 2009-12 Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and sustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization,

livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority, corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

Arthur Mikael Lindnord, 2017-09-09 The epic true story of an extreme athlete, a stray dog, and how they found each other—now a major motion picture from Lionsgate starring Mark Wahlberg and Simu Liu. “A miraculous tale.”—Washington Post “Like all great tales, this one had an intriguing start: a small good deed with enormous consequences for the dog and his rescuers, the basis for a heroic and heartwarming story.”—Forbes When you're racing 435 miles through the jungles and mountains of South America, the last thing you need is a stray dog tagging along. But that's exactly what happened to Mikael Lindnord, captain of a Swedish adventure racing team, when he threw a scruffy but dignified mongrel a meatball one afternoon. When the team left the next day, the dog followed. Try as they might, they couldn't lose him—and soon Mikael realized that he didn't want to. Crossing rivers, battling illness and injury, and struggling through some of the toughest terrain on the planet, the team and the dog walked, kayaked, cycled, and climbed together toward the finish line, where Mikael decided he would save the dog, now named Arthur, and bring him back to his family in Sweden, whatever it took. Illustrated with candid photographs, Arthur provides a testament to the amazing bond between dogs and people.
