MEDINFO 2021: One World, One Health – Global Partnership for Digital Innovation P. Otero,P. Scott,S.Z. Martin,2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

Blending Technologies in Second Language Classrooms Don Hinkelman,2018-02-01 This book analyses the classroom blending of face-to-face and online technologies in the teaching and learning of second languages. Its theoretical framework integrates the rapidly changing and developing fields of both applied linguistics and computer-assisted language learning (CALL). It examines such themes as the normalization of the computer and the rise of mobile devices, the development of open educational resources, flipped learning, gamification, and the increased focus on communication and problem-solving tasks in class. The author illustrates how the design or ‘bricolage’ of blended learning is part of a radical shift in our conceptualisation of the learning environment. Building on the framework established in its first edition, this book will appeal to teachers-in-training, scholars and practitioners of second language education.

The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization.
