**Body Magic** John Fisher,2014-08-20 Would you believe that you could ask a full-grown man to hold a penny for you and then tell him to drop it and finds he can't, hard as he may try? In what is undoubtedly the most original magic book of our time, John Fisher shows the reader how, with minimal practice, he can use the marvels of the human body to entertain and mystify friends and family, small and large audiences. This book is first of all a delight to read because of the instant education it provides us with about the unknown powers we have in our hands, our eyes, our noses, and our incredible nervous system. In each case, Mr. Fisher shows the easy-to-grasp principle first and then how to put the principle to work in actual tricks. Most magic books require a great deal of study and dexterity. This one enables you to entertain people even before you have finished the book. Moreover, you never have to worry about being prepared, because you always have with you all the miraculous things you need—your hands, your eyes, and the rest of your body.

**Into the Magic Shop** James R. Doty, MD,2016-02-02 The award-winning New York Times bestseller about the extraordinary things that can happen when we harness the power of both the brain and the heart Growing up in the high desert of California, Jim Doty was poor, with an alcoholic father and a mother chronically depressed and paralyzed by a stroke. Today he is the director of the Center for Compassion and Altruism Research and Education (CCARE) at Stanford University, of which the Dalai Lama is a founding benefactor. But back then his life was at a dead end until at twelve he wandered into a magic shop looking for a plastic thumb. Instead he met Ruth, a woman who taught him a series of exercises to ease his own suffering and manifest his greatest desires. Her final mandate was that he keep his heart open and teach these techniques to others. She gave him his first glimpse of the unique relationship between the brain and the heart. Doty would go on to put Ruth’s practices to work with extraordinary results—power and wealth that he could only imagine as a twelve-year-old, riding his orange Sting-Ray bike. But he neglects Ruth’s most important lesson, to keep his heart open, with disastrous results—until he has the opportunity to make a spectacular charitable contribution that will virtually ruin him. Part memoir, part science, part inspiration, and part practical instruction, Into the Magic Shop shows us how we can fundamentally change our lives by first changing our brains and our hearts.

**A Cultural History of Hair in the Renaissance** Edith Snook,2020-12-10 In the period 1450 to 1650 in Europe, hair was braided, curled, shaped, cut, colored, covered, decorated, supplemented, removed, and reused in magic, courtship, and art, amongst other things. On the body, Renaissance men and women often considered hair a signifier of order and civility. Hair style and the head coverings worn by many throughout

the period marked not only the wearer's engagement with fashion, but also moral, religious, social, and political beliefs. Hair established individuals' positions in the period's social hierarchy and signified class, gender, and racial identities, as well as distinctions of age and marital and professional status. Such a meaningful part of the body, however, could also be disorderly, when it grew where it wasn't supposed to or transgressed the body's boundaries by being wild, uncovered, unpinned, or uncut. A natural material with cultural import, hair weaves together the Renaissance histories of fashion, politics, religion, gender, science, medicine, art, literature, and material culture. A necessarily interdisciplinary study, A Cultural History of Hair in the Renaissance explores the multiple meanings of hair, as well as the ideas and practices it inspired. Separate chapters contemplate Religion and Ritualized Belief, Self and Society, Fashion and Adornment, Production and Practice, Health and Hygiene, Sexuality and Gender, Race and Ethnicity, Class and Social Status, and Cultural Representations.
