Peter J Cooper

When Bombs Are Falling - Growing Up in the 1930s and 40s Joseph Proctor, 2012 Life was not easy when Joseph Proctor was born into a working class family on Tyneside in the early 1930s. This was an age of unemployment and very low wages. The electronic age had not been born and there was no television, no computers, no Ipods, mobile phones, or electronic games. Children made their own amusement and it was a time of contentment and innocence. Children were children until they left school. This book gives us some idea of what it was like growing up in the 1930s, through WW2 and on into the 1950s. Vastly different to what life is like for children today.

London: Bombed Blitzed and Blown Up Ian Jones, 2016-10-31 When it comes to being bombed, London is unique. Although it cannot claim to be the most bombed capital city in terms of the weight of explosive detonated it has endured the most varied and unrelenting attack since the discovery of explosives. From the first Irish Republican bomb in 1867, London and its population have been under almost constant assault. Terrorism features in virtually every decade from the 1860s to the present and has caused much damage, particularly during the late 1980s and early 1990s. However, by far the greatest destruction was from the air. The Zeppelin and Gotha bomber raids in the First World War being but a foretaste of what would happen in the Second. Then the capital was devastated, firstly by the Luftwaffes aeroplanes and then Hitlers vengeance weapons, the V-1s and V-2s. After the Second World War the

bombers returned, in the form of the IRA and then the home-grown terrorists of 2005. Written by a former Explosives Officer who worked for the Counter Terrorism Command of the Metropolitan Police, this is the most comprehensive and record of Britains capital under attack that has ever been compiled.

Bombs Away! Martin W. Bowman, 2010-01-01 This is a unique selection of wide-ranging experiences of British and Commonwealth Bomber Command aircrew during World War II. Their endearing bravery and fortitude and sometimes their despondency and cynicism, shows through in these stirring, daring, often irreverent, humorous and sometimes sardonic but memorable stories. All reflect the ethos, camaraderie, fear and bravery of the largely ordinary men, most of whom were plucked from 'civvy street' and thrust into a frightening, bitter conflict which was made even more dangerous by the lethal advance of technology. Death would normally come from an anonymous assassin, either in the black of night, or from behind a cloud or out of the sun, or simply from the Flak gunner on the ground. And, if all this was not enough, the often unmerciful weather was no respecter of mortality. There was no escaping the all-embracing shock wave that rippled through the bomber squadrons after a heavy mauling over enemy territory. Nothing could be more poignant than the vacuous places at tables in the depleted mess halls, the empty locker of the departed, or the dog pining by the barracks for its missing master. Each man had to deal with tragedy in his own inimitable way. Some hid their feelings better

than others did only for the pain to resurface months or even years later. Some who had survived the physical pressures and who completed their tours then succumbed to the mental torture that had eaten away at their psyche during the incessant and interminable onslaught day after day, night after night. There was little respite. The valorous men of Bomber Command were, in turn, the Light Brigade, the stop gap, the riposte, the avengers, the undefeated. Always, they were expendable.

Bombs Away John Steinbeck, 2009-07-08 A magnificent volume of short novels and an essential World War II report from one of America's great twentieth-century writers A Penguin Classic On the heels of the enormous success of his masterwork *The Grapes of Wrath* and at the height of the American war effort John Steinbeck, one of the most prolific and influential literary figures of his generation, wrote *Bombs Away*, a nonfiction account of his experiences with U.S. Army Air Force bomber crews during World War II. Now, for the first time since its original publication in 1942, Penguin Classics presents this exclusive edition of Steinbeck's introduction to the then-nascent U.S. Army Air Force and its bomber crew--the essential core unit behind American air power that Steinbeck described as the greatest team in the world. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across

genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The Association of Small Bombs Karan Mahajan, 2016 After witnessing his two friends killed by a small bomb that detonated in a Delhi marketplace, Mansoor Ahmed becomes involved with a charismatic young activist, whose allegiances and beliefs are more changeable than he could have imagined.

Fallout Lesley M.M. Blume, 2021-08-10 The picture does not tell the whole story -- Scoop the world -- MacArthur's closed kingdom -- Six survivors -- Some events at Hiroshima -- Detonation -- Aftermath.

Bombs on Trains Lyndsey Norton, 2012-04-16 This is the story of Detective Sergeant Rebecca Castle and her struggle to stop terrorists from destroying the Eurostar, the Channel Tunnel, and the Royal Train, as she discovers the high cost of promotion along the way. From the battleground of Basra to the Tunnel in Kent, with the aid of the SAS and MI5, this tale takes her through the bloody extermination of soldiers, the kidnap of her husband, and the power of having the whole resources of the UK in her hands to stop Abdullah Razzac Fakeesh from achieving his goal.

You Only Blow Yourself Up Once J. Frank Durham, 2003-11 Following the Japanese attack on Pearl Harbor, the U.S. Navy started a crash program, gathering information and educating personnel to deal with enemy bombs, land mines,

and other explosive ordnance. Figuring lawyers make the best cannon fodder, recent law school graduate J. Frank Durham was among early volunteers for this dangerous and highly-classified work. Graduating with a perfect grade from the navy's new Bomb Disposal School, he was retained on staff to help the operation expand, then dispatched to Guadalcanal, where Americans were fighting the pivotal battle of World War Two. While learning how to handle explosive devices, Durham endured bombing, shelling, and an unexpected encounter with the enemy, but tales of suspense and danger are balanced by a humorous perspective on everyday life as an enlisted man. He describes unofficial enterprises, manufacturing souvenirs from brass shells in the captured Japanese ammo dump, and making moonshine from anything available, to sell to the troops. Eleanor Roosevelt's visit to the field hospital inspired a pithy comment about a painful loss from a wounded marine, and a classic riposte from the First Lady. Excerpts from captured Japanese diaries provide rare insight into the other side of the conflict.

Bombs Away Harry Turtledove, 2016-06-28 In his acclaimed novels of alternate history, Harry Turtledove has scrutinized the twisted soul of the twentieth century, from the forces that set World War I in motion to the rise of fascism in the decades that followed. Now, this masterly storyteller turns his eyes to the aftermath of World War II and asks: In an era of nuclear posturing, what if the Cold War had suddenly turned hot? *Bombs Away* begins with President Harry Truman in desperate consultation with General

Douglas MacArthur, whose control of the ground war in Korea has slipped disastrously away. MacArthur recognizes a stark reality: The U.S. military has been cut to the bone after victory over the Nazis—while China and the USSR have built up their forces. The only way to stop the Communist surge into the Korean Peninsula and save thousands of American lives is through a nuclear attack. MacArthur advocates a strike on Chinese targets in Manchuria. In actual history, Truman rejected his general's advice; here, he does not. The miscalculation turns into a disaster when Truman fails to foresee Russia's reaction. Almost instantly, Stalin strikes U.S. allies in Europe and Great Britain. As the shock waves settle, the two superpowers are caught in a horrifying face-off. Will they attack each other directly with nuclear weapons? What countries will be caught in between? The fateful global drama plays out through the experiences of ordinary people—from a British barmaid to a Ukrainian war veteran to a desperate American soldier alone behind enemy lines in Korea. For them, as well as Truman, Mao, and Stalin, the whole world has become a battleground. Strategic strikes lead to massive movements of ground troops. Cities are destroyed, economies ravaged. And on a planet under siege, the sounds and sights of nuclear bombs become a grim harbinger of a new reality: the struggle to survive man's greatest madness. Praise for Bombs Away "A fascinating and compelling story of real people caught in forces beyond their control . . . [Harry Turtledove is] the unrivaled monarch of alternate history."—Analog "Turtledove is an

undisputed centerpiece of the alternate-history genre, and now, to his already grand display, he's adding the ambitious tale of a WWII that could have happened."—Booklist "This is Turtledove at his best."—SFRevu "Alternate-world warrior extraordinaire Turtledove delivers the opening barrage of a new speculative conflict."—Kirkus Reviews

Bombs Away! John R. Bruning, 2011-05-22 **Bombs Away!** covers strategic bombing in Europe during World War II, that is, all aerial bombardment of a strategic nature which took place between 1939 and 1945. In addition to American (U.S. Army Air Forces) and British (RAF Bomber Command) strategic aerial campaigns against Germany, this book covers German use of strategic bombing during the Nazi's conquest of Europe: the Battle of Britain, Operation Barbarossa, and the V 1 and V 2, where the Luftwaffe targeted Warsaw and Rotterdam (known as the Rotterdam Blitz). In addition, the book covers the blitzes against London and the bombing of other British industrial and port cities, such as Birmingham, Liverpool, Southampton, Manchester, Bristol, Belfast, Cardiff, and Coventry bombed during the Battle of Britain. The twin Allied campaigns against Germany—the USAAF by day, the RAF by night—built up into massive bombing of German industrial areas, notably the Ruhr, followed by attacks directly on cities such as Hamburg, Kassel, Pforzheim, Mainz, Cologne, Bremen, Essen, Düsseldorf, Hanover, Dortmund, Frankfurt, and the still controversial fire-bombing of Hamburg and Dresden. In addition to obvious targets like aircraft and tank

manufacturers, ball bearing factories and plants that manufactured abrasives and grinding wheels were high priority targets. Petroleum refineries were a key target with USAAF aircraft based in North Africa and later Italy, bombing the massive refinery complexes in and around Ploesti, Romania, until August 1944 when the Soviet Red Army captured the area. Other missions included industrial targets in southern Germany like Regensburg and Schweinfurt. Missions to the Nazi capital, Berlin, started in 1940 and continued through March 1945. Throughout the war there were 314 air raids on Berlin. All of this is covered in detail with authoritative text and hundreds of archival photographs, many rare or never before published.

From Bouncing Bombs to Concorde Robert Gardner, John John, 2006-06-22 George Edwards' name is synonymous with the Vickers Viscount, the world's first turboprop airliner; the controversial TSR2 project and the legendary Anglo-French Concorde. During the Second World War, it was Edwards who made the Dam Busters' bouncing bombs bounce.

Bombs and Lambs Margaret Monkman, 2009-06 Several years ago, author Margaret Monkman was among the thousands of children evacuated from London at the start of World War II. This book is her extraordinary memoir written in the form of a child's journal, the author's journal as if she had kept one at the time.

IRA, The Bombs and the Bullets A. R.

Oppenheimer, 2008-10-16 In this groundbreaking title, A. R. Oppenheimer tells how the Irish Republican Army became the most adept and experienced insurgency group the world has ever seen through their bombing expertise – and how, after generations of conflict, it all came to an end. The book is a comprehensive account of more than 150 years of Irish republican strategic, tactical, and operational details, and an analysis of the IRA's mission, doctrine, targeting, and acquisition of weapons and explosives. As a leading expert on non-conventional weapons and explosives, Oppenheimer vividly presents the story behind the bombs – those who built and deployed them; those who had to deal with and dismantle them; and those who suffered or died from them. He analyses where, how, and why the IRA's 19,000

bombs were built, targeted and deployed, and explores what the IRA was hoping to accomplish in its unrivaled campaign of violence and insurgency through covert acquisition, training, intelligence and counter-intelligence. Beginning with the Fenian 'Dynamiters' in the second half of the nineteenth century, Oppenheimer fully describes and assesses the impact of the pre-1970s bombing campaigns in Northern Ireland and England and the evolution of strategies and tactics during the Troubles. He concludes with the decommissioning of an arsenal big enough to arm several battalions – which included an entire home-crafted missile system, an unsurpassed range of improvised explosive devices (IEDs), and enough explosives to blow up several urban centres. The author scrutinises the level of deadly improvisation that became the hallmark of the Provisional IRA's expertise and the ingenuity in its pioneering IED timing, delay and disguise technologies, and follows the arms race it carried on with the British Army and security services in a long war of mutual assured disruption. He also provides an insight into the bombing equipment and guns in the vast IRA inventory held at Irish Police HQ in Dublin.

Dropping of the Atomic Bombs Mary

Meinking, 2015-08-01 This title examines the dropping of atomic bombs during World War II, focusing on their development and testing, the bombing missions, and the bombs' destruction and legacy. Compelling narrative text and well-chosen historical photographs and primary sources make this book perfect for report writing. Features

include a glossary, a selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABD0.

Bombs and Barbed Wire Jeff Steel, 2021-07-07 His hatred of Nazism made him leave his six-month marriage to Miranda on hold. Over Germany his Halifax bomber is shot down by a night fighter: He has ten seconds to act or he will never see her again. Ambrose Adlam did not even want to go to war. Hitler's war came looking for him. The war enveloped him, it took over his world; there was no escape. To do nothing was not an option. Ambrose joined RAF ground crew. That was not enough. He volunteered for active service as a Flight Engineer in Halifax bombers. The RAF high command forgot to tell him that his chance of survival was minimal. Ambrose found out the hard way as his bomber plummeted to earth in flames. Parachuting into a duck pond in Nazi Germany, he narrowly escaped death. On the run, he is pursued by German forces. They shot him. He survived. An odyssey through the monstrous world of Luftwaffe prisoner of war camps brought him to the eastern fringe of the Third Reich. The camp was called Stalag Luft III. Beneath the exterior calm of the camp routine, an ambitious plot was brewing. The prisoners were organising a mass breakout. There were hundreds involved. As a non-officer he would not be one to break free ... but there was a lot that he could do to support the Great Escape. This was his war, his mission in life and his purpose.

But would he ever see Miranda again? A gripping true story of love and war constructed from meticulous research, family records and eye-witness accounts.

Bombs and Babies Peter J Cooper, 2017-03 This book reproduces and expands upon the author's mother's diary that she kept from 1942 through 1945 while she lived in England. For most of that time she resided in eastern Surrey about 20 miles from the southern outskirts of London. As part of 'Bomb Alley' her area of the county experienced air raids as well as V1 and V2 attacks. She was a war bride, having been married in 1940 to a Canadian army officer who served on the staff of the 1st Canadian Army in England, France and Holland. The author has extensively annotated the diary entries and added considerable historical background in relation to both domestic and military matters. The book describes in detail what life was like for a woman starting a family and keeping house in the English countryside during World War 2, and how different were lifestyles then from what they are today. In revisiting the circumstances surrounding his and his sister's birth, the journey for the author was one of personal revelation as well as historical interest.

PANTELLERIA - More bombs than stones Gaetano Schilirò, 2016-11-22 PANTELLERIA costituisce l'unico caso al mondo in cui un'isola fortificata si sia arresa esclusivamente sotto il peso schiacciante di una enorme forza aerea nemica, quella statunitense. Su questo martoriato lembo di terra italiana nel 1943 furono sganciate oltre

seimila tonnellate di bombe dal cielo, senza contare le cannonate sparate dal mare dalla Mediterranean Fleet britannica schierata tutt'intorno!

"In Case Atom Bombs Fall" Michael Scheibach, 2015-03-10 With the very real possibility of nuclear war looming on the horizon from 1945 to the early 1960s, both federal and local governments took on the responsibility of educating Americans on how to survive the expected blasts, residual fallout, and radiation poisoning. Duck and cover drills, bomb shelters, and evacuation plans became an integral part of every citizen's daily life. This book provides a sampling of civil defense publications issued by government agencies and organizations during this era. Arranged thematically, the book includes sections covering the impact and power of the atomic bomb, radioactive fallout, women and the home, the importance of being prepared, civil defense in schools, fallout shelters, evacuation plans, and, finally, the call for "peace or ... else."

As The Bombs Fell Otto Schmalz, 2018-12-03 You almost never get to hear the other side of the story. What was it like to be a child living in Germany as the country descended into war? What did kids do while their dads were away fighting and the rest of the family was living in either privation or terror, or both? As the Bombs Fell is a treasure-trove of information about life as a child in Nazi Germany, told by a man who actually lived the experience. Otto Schmalz allows us to see, through the innocent eyes of a child, the

realities of German life in several different circumstances – the regimentation and camaraderie of the Jungvolk and the boys camp that children were sent to to get them out of harm's way in the cities, the pastoral and relatively idyllic life of the agrarian countryside even though there was a war on, the sheer terror of living in a bombed-out city that continues to experience nightly raids. Hannover was a strategic centre and as such received the attention of nearly one million Allied bombs of every kind. His charming yet nerve-wracking tale is enhanced with numerous historical photos, of Otto, his family and friends, and of the destruction wreaked upon his city as he paints another fascinating yet seldom-seen up-close picture of many German lives in war time. As the Bombs Fell is a straightforward telling of the other side of the story of the Second World War, with the author's insights, as he's learned, into human nature.
