Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris, 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

The Alpha-Nina M.K. Williams, 2022-03-01 Continue the time-travel adventure series from M.K. Williams and cross back over the Plain with The Alpha-Nina There is no such thing as a coincidence in an infinite multiverse. Each action happens, it is inevitable. It was bound to occur, somewhere, sometime. Or, more elegantly put: It is destiny. While Nina Marks may have found her way back home after being kidnapped across the multiverse, her alter-egos are now in danger. The technology needed to travel the multiverse exists in at least 4 known universes, and perhaps more. How can Nina, now stuck in Universe Alpha keep all the infinite universes safe from those looking to exploit this technology? And, if the weight of protecting parallel universes wasn't enough on her shoulders, she is the primary suspect in the disappearance of Dr. Parker Lovett. Can Nina exonerate herself without exposing the secrets of The Portal? Can she trust her alter-egos to keep watch on their entry point to the multiverse? Can she just get through the first week at her new job without having to worry about the fate of all people living across the infinite universes? Read The Alpha-Nina, the second book in The Feminina Series, and the anxiously awaited sequel to The Infinite-Infinite to find out.

The Book Itch Vaunda Micheaux Nelson, 2015-11-01 In the 1930s, Lewis's dad, Lewis Michaux Sr., had an itch he needed to scratch—a book itch. How to scratch it? He started a bookstore in Harlem and named it the National Memorial African Bookstore. And as far as Lewis Michaux Jr. could tell, his father's bookstore was one of a kind. People from all over came to visit the store, even famous people—Muhammad Ali, Malcolm X, and Langston Hughes, to name a few. In his father's bookstore people bought and read books, and they also learned from each other. People swapped and traded ideas and talked about how things could change. They came together here all because of his father's book itch. Read the story of how Lewis Michaux Sr. and his bookstore fostered new ideas and helped people stand up for what they believed in.

Forward Me Back to You Mitali Perkins, 2019-04-02 The award-winning author of *You Bring the Distant Near* explores identity, homecoming, and the legacy of assault in this personal and ambitious new novel. Katina King is the reigning teen jujitsu champion of Northern California, but she's having trouble fighting off the secrets in her past. Robin Thornton was adopted from an orphanage in India and is reluctant to take on his future. If he can't find his roots, how can he

possibly plan ahead? Robin and Kat meet in the most unlikely of places—a summer service trip to Kolkata to work with survivors of human trafficking. As bonds build between the travelmates, Robin and Kat discover that justice and healing are tangled, like the pain of their pasts and the hope for their futures. You can't rewind life; sometimes you just have to push play. In turns heart wrenching, beautiful, and buoyant, Mitali Perkins's new novel focuses its lens on the ripple effects of violence—across borders and generations—and how small acts of heroism can break the cycle.

Building a National Strategy for Digital Preservation ,2002 The United States Congress in December 2000 appropriated funds to the Library of Congress (LC) to spearhead an effort to develop a national strategy for the preservation of digital information. LC staff scheduled a series of conversations with representatives from the technology, business, entertainment, academic, legal, archival, and library communities, and asked the Council on Library and Information Resources to commission background papers for these sessions and to summarize the meetings. The resulting papers, along with an integrative essay by Amy Friedlander, are presented in this document. Contents include: Summary of Findings (Amy Friedlander); Preserving Digital Periodicals (Dale Flecker); E-Books and the Challenge of Preservation (Frank Romano); Archiving the World Wide Web (Peter Lyman); Preservation of Digitally Recorded Sound (Samuel Brylawski); Understanding the Preservation Challenge of Digital Television (Mary Ide, Dave MacCarn, Thom Shepard, and Leah Weisse); and Digital Video Archives: Managing through Metadata (Howard D. Oer Andrew Wesolek, Anne Langley, Jonathan Lashley, 2018-10 For many of us, the drive to affect positive change--however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and Yagan;

2017). Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have projected that the cost of attending college would keep 2.4 million low-to-moderate income, college-qualified high school graduates from completing a college degree (Advisory Committee on Student Financial Assistance, 2006). During that same period, college students in the United States saw expenses related to tuition and fees increase by 63 percent, school housing costs (excluding board) increase by 51 percent, textbook prices increase by 88 percent (Bureau of Labor, 2016). Because few students can afford a college education by salary alone, 44.2 million Americans have sought financial aid via student loans. As a result, total student loan debt is now topping \$1.45 trillion in the United States (Board of Governors of the Federal Reserve System, 2017), and student loan delinquency rates are averaging 11.2 percent (Federal Reserve Bank of New York, 2017). The burden of a student's financial decisions extends beyond the mere individual: society will inevitably carry the weight of this debt for years to come.

The Readies Bob Brown, 2015-02-13 In 1930, Bob Brown predicted that the printed book was bound for obsolescence. The time has come, he insisted, to rid the reader of the cumbersome book. He invented a machine that would allow one to read books and any text extremely fast and in a hyper abbreviated form. He called these abbreviated texts, with em dashes replacing words: readies. He envisioned sending the condensed texts through wireless networks. *The Readies*, describes these eponymously named abbreviated texts and his plans for a reading machine, but since he printed only 150 copies, the volume is practically unknown outside of a small circle of scholars. With this new edition, Craig Saper hopes to introduce Bob Brown's Roving Eye Press books to a new generation of readers.
