Life and Moral Education in Greater China John Chi-Kin Lee,Stephen Yam-wing Yip,Raymond Ho-Man Kong,2021-03-30 Arguing for life, moral and values education as a bedrock for the original goals of school education, this monograph explores how life and values education is conceptualised and imparted in Greater China. Under a globalized, transnational, and technological world, where there has been an increase in people's mobility, in information and cultural exchanges, there is also a growing emphasis on personal and professional ethics. Against this context, life, moral and values education has gained attention for its impact on shaping students' characters as future citizens. However, the cultivation of these values is made deeply diversified and complex by varying interpretations of life education and values education across societies, given that different societies are influenced by different socio-cultural traditions, educational ideologies and religious beliefs. The means and approaches towards life education also vary vastly from formal school subjects, school-based programmes as well as teachers and peers' role modelling, community services, extra-curricular activities, school discipline, charity work, pastoral care, and school ethos. Recognising this inherent diversity and complexity in the approach to and the dissemination of life education, the contributors to this volume survey the practice of life education in Greater China so far, suggesting that life education is most effective when it is diversified, dynamic and developmental across contexts. This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China.

Ben Cao Gang Mu, Volume I, Part A Shizhen Li,2024-01-09 Volume I is divided into two parts. Part A of volume 1 in the Ben cao gang mu series offers a translation of chapters 1 and 2 and portions of chapter 3. Chapters 1 and 2 are devoted to introducing the history of materia medica. Chapter 3 is devoted to pharmaceutical drugs for diseases. Chapter 3 is continued, along with chapter 4, in part B of volume I. The Ben cao gang mu is a sixteenth-century Chinese encyclopedia of medical matter and natural history by Li Shizhen (1518-1593). The culmination of a sixteen-hundred-year history of Chinese medical and pharmaceutical literature, it is considered the most important and comprehensive book ever written in the history of Chinese medicine and remains an invaluable resource for researchers and practitioners. This nine-volume series reveals an almost two-millennia-long panorama of wide-ranging observations and sophisticated interpretations, ingenious manipulations, and practical applications of natural substances for the benefit of human health. Paul U. Unschuld's annotated translation of the Ben cao gang mu, presented here with the original Chinese text, opens a rare window into viewing the people and culture of China's past.

The Birth of Chinese Feminism Lydia H. Liu,Rebecca E. Karl,Dorothy Ko,2013-03-26 He-Yin Zhen (ca. 1884-1920?) was a theorist who figured centrally in the birth of Chinese feminism. Unlike her contemporaries, she was concerned less with China's fate as a nation and more with the relationship among patriarchy, imperialism, capitalism, and gender subjugation as global historical problems. This volume, the first translation and study of He-Yin's work in English, critically reconstructs early twentieth-century Chinese feminist thought in a transnational context by juxtaposing He-Yin Zhen's writing against works by two better-known male interlocutors of her time. The editors begin with a detailed analysis of He-Yin Zhen's life and thought. They then present annotated translations of six of her major essays, as well as two foundational tracts by her male contemporaries, Jin Tianhe (1874-1947) and Liang Qichao (1873-1929), to which He-Yin's work responds and with which it engages. Jin, a poet and educator, and Liang, a philosopher and journalist, understood feminism as a paternalistic cause that liberals like themselves should defend. He-Yin presents an alternative conception that draws upon anarchism and other radical trends. Ahead of her time, He-Yin Zhen complicates conventional accounts of feminism and China's history, offering original perspectives on sex, gender, labor, and power that remain relevant today.

The Routledge Companion to Yan Lianke Riccardo Moratto,Howard Yuen Fung Choy,2022-03-10 Yan Lianke is one of the most important, prolific, and controversial writers in contemporary China. At the forefront of the "mythorealist" Chinese avant-garde and using absurdist humor and grotesque satire, Yan's works have caught much critical attention not only in the Chinese mainland, Hong Kong, and Taiwan but also around the world. His critiques of modern China under both Mao-era socialism and contemporary capitalism draw on a deep knowledge of history, folklore, and spirituality. This companion presents a collection of critical essays by leading scholars of Yan Lianke from around the world, organized into some of the key themes of his work: Mythorealism; Absurdity and Spirituality; and History and Gender, as well as the challenges of translating his work into English and other languages. With an essay written by Yan Lianke himself, this is a vital and authoritative resource for students and scholars looking to understand Yan's works from both his own perspective and those of leading critics.

Books of Fate and Popular Culture in Early China ,2017-11-06 Books of Fate and Popular Culture in Early China is a comprehensive introduction to the manuscripts known as daybooks, examples of which have been found in Warring States, Qin, and Han tombs (453 BCE-220 CE). Their main content concerns hemerology, or "knowledge of good and bad days." Daybooks reveal the place of hemerology in daily life and are invaluable sources for the study of popular culture. Eleven scholars have contributed chapters examining the daybooks from different perspectives, detailing their significance as manuscript-objects intended for everyday use and showing their connection to almanacs still popular in Chinese communities today as well as to hemerological literature in medieval Europe and ancient Babylon. Contributors include: Marianne Bujard, László Sándor Chardonnens, Christopher Cullen, Donald Harper, Marc Kalinowski, Li Ling, Liu Lexian, Alasdair Livingstone, Richard Smith, Alain Thote, and Yan Changgui.

Post-colonial Chinese Literatures In Singapore And Malaysia Yoon Wah Wong,2002-09-30 This is the first book to present in English a history of post-colonial and diasporic Chinese literatures in Singapore and Malaysia. The 12 essays collected in it provide an in-depth study of the emergence of the new Chinese literatures by looking at the origins, the themes, the major authors and their works, and how the creativity is closely connected with the experience of immigration and colonialization and the challenge of the post-colonial world. In examining a wide range of post-colonial texts and their relation to the cultures of diasporic Chinese and post-colonial society, the author shows that each of the new literatures has its own traditions which reflect local social, political and cultural history. The essays also show that the literature of Singapore or Malaysia has a tradition of its own, and writers of world class. Besides the Chinese literary tradition, a native literary tradition has been created successfully.

Chinese Music in Print YANG YUANZHENG,2023-01-11 Grounded in a desire to bring back to life rare items from the University of Hong Kong’s Fung Ping Shan Library that are entwined within the world of music and to place them in a context of books and images in American, British, and other Asian collections, Chinese Music in Print views the library as a repository not of information but of artifact, and then uses these artifacts as a means for generating scholarly narrative. It begins by assessing seminal texts in the Confucian canon set against the delicacy of the concubine and amanuensis Shen Cai’s calligraphy and poetry. Confucianism was itself a crucial aspect of courtly life, and an exploration of its ritual is the book’s second theme. Vernacular genres of opera and song are represented in the third chapter, while the Great Sage returns in the fourth for an exploration of the repertoire and richness of his favourite instrument, the qin. The final chapter ends the journey with discussion of the legacy of generations of Europeans who have visited China and their contribution to the understanding of a more vernacular instrument, the erhu. “Like the 2021 exhibition called ‘Music in Print’ that preceded it, this exploration of Chinese music history introduces many rare books from the University of Hong Kong Libraries. The essays combine professional expertise in musicology with an excellent grasp of traditional bibliography, which allows the one to illuminate the other. Bravo!” —J. S. Edgren, Princeton University “I am most impressed by the critical reading of the author who excels in classical studies, whose expertise in calligraphy, seals, editions, and other related disciplines in Sinology is admirable. His meticulous investigation into the complicated situation regarding the book printing business of dynastic China is professional and convincing.” —Yu Siu-wah, chief editor of Anthology of Chinese Folk and Ethnic Instrumental Music: The Hong Kong Volume “Such a wide-ranging but meticulously researched book that now contextualizes the dissemination and transmission of music into the discussion of manuscript and printed culture in China will clearly be an important addition to the holdings of libraries supporting Chinese studies and book studies broadly taken, as well as those supporting the study of music. Obviously, it will be of direct importance for specialists in East Asian book studies and for musicologists of East Asian traditions.” —Elizabeth Markham, University of Arkansas “This beautifully illustrated and carefully edited book is the first English-language monograph dedicated exclusively to the history of Chinese music as captured through the medium of print. It introduces a host of new sources and methodologies to the English-speaking public, fruitfully complicates established narratives of music history and of print cultures in both East and West, and offers a vital building-block for the creation of a truly global music history.” —Karl Kügle, University of Oxford

Women and the Literary World in Early Modern China, 1580-1700 Daria Berg,2013-07-24 Exploring the works of key women writers within their cultural, artistic and socio-political contexts, this book considers changes in the perception of women in early modern China. The sixteenth century brought rapid developments in technology, commerce and the publishing industry that saw women emerging in new roles as both consumers and producers of culture. This book examines the place of women in the cultural elite and in society more generally, reconstructing examples of particular women’s personal experiences, and retracing the changing roles of women from the late Ming to the early Qing era (1580-1700). Providing rich detail of exceptionally fine, interesting and engaging literary works, this book opens fascinating new windows onto the lives, dreams, nightmares, anxieties and desires of the authors and the world out of which they emerged.

Chinese Dialectics Chenshan Tian,2005 Dialectical thought is at the core of Karl Marx's work and all subsequent attempts to build on his legacy: Marxism. And, arguably, Marx's special departure into dialectics represents an anomaly in that tradition and all of Western philosophy. Marxism finds its philosophers in the academy; in trade unions; in former soviet states; in industrial and non-industrial nations and this makes it distinct from all other modern philosophies. It is certainly the most international modern philosophical movement. Chinese Dialectics From Yijing to Marxism is an unparalleled investigation into the conversation between Western Marxism and Chinese, or Eastern Marxism. An autochthonous version of Marxism persists in China coming to fruition through the work of Mao Zedong. Chenshan Tian contends that the conversation between Eastern and Western Marxism results in a striking feature of dialectics that pervades the everyday thinking and speech of ordinary persons in China. No study to date has undertaken the task of tracing the development of Marxism in China through it's ancient philosophical texts. This book is absolutely essential reading in the disciplines of comparative political theory, philosophy, and Asian studies.
