Reading for Real Kathy Collins, 2008 Just as adults join clubs to share and talk about common interests, reading clubs allow kids to immerse themselves in topics and ideas they care about - whether it's turtles, fairy tales, a beloved author, a favorite new series, or the desire to get better at reading aloud to a baby brother or sister. While they are reading and talking about their interests and passions, students in reading clubs are also orchestrating all of the reading skills and strategies they've learned and applying them in real-life ways. While Kathy presents ideas for implementing reading clubs during reading workshop in a balanced literacy framework, the information she provides will be helpful for any teacher who wants to foster the joy of reading by offering students support and opportunities to read for authentic purposes and to have conversations about topics that interest and engage them. After all, we don't just want kids to learn to read, we want them to love to read.--BOOK JACKET.

Teach Them ALL to Read Elaine K. McEwan, 2009-07-15 Featuring vignettes, graphic organizers, instructional strategies, up-to-date research, and more, this updated bestseller helps educators understand the most effective ways to teach all students to read.

Growing Readers Kathy Collins, 2004 Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four Getting Ready sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens.

Great Habits, Great Readers Paul Bambrick-Santoyo, Aja Settles, Juliana Worrell, 2013-06-10 A book that brings the habits of reading to life Great readers are not made by genetics or destiny but by the habits they build—habits that are intentionally built by their teachers. Still Learning to Read Franki Sibberson, Karen Szymusiak, 2023 Authors Franki Sibberson and Karen Szymusiak are back with an updated version of Still Learning to Read: Teaching Students in Grades 3-6, 2nd Edition. In the years since the first edition, prevalence of testing and Common Core State Standards have redefined requirements and what is expected of both teachers and students. This new edition focuses on the needs of students in grades 3-6 in for the following areas: reading workshops, read-alouds, classroom design, digital tools, fiction and nonfiction, and close reading. The authors examine current trends in literacy and introduce a new section on intentional instructional planning, as well as a new chapter on scaffolding for reading nonfiction. Expanded examples of lessons and routines to promote deeper thinking about learning are also included. In Still Learning to Read, you'll also find online videos that provide insight into classrooms. Finally, updated and expanded book lists, recommendations for digital tools, lesson cycles, and sections for school leaders round out this foundational resource.

More Than Guided Reading Cathy Mere, 2005 Is there too much emphasis on guided reading in primary classrooms? It's a question that many educators, like kindergarten teacher and literacy coach Cathy Mere, are starting to ask. Guided reading provides opportunities to teach students the strategies they need to learn how to read increasingly challenging texts, but Cathy found that she needed to find other ways to help students gain independence. While maintaining guided reading as an important piece of their reading program, teachers need to offer students opportunities during the day to develop as readers, to learn to choose books, to find favorite genres and authors, and to talk about their reading. In More Than Guided Reading, Cathy shares her journey as she moved from focusing on guided reading as the center of her reading program to placing children at the heart of literacy learning--not only providing more time for students to discover their reading lives, but also shaping instruction to meet the needs of the diverse learners in her classroom. By changing the structure of the day, Cathy found she was better able to adjust the support she was providing students, allowing time for whole-class focus lessons, conferences, and opportunities to share ideas, as well as reading from self-selected texts using the strategies, skills, and understandings acquired in reader's workshop. The focus lesson is the centerpiece of the workshop. It is often tied to a read-aloud and connected to learning from the previous day, helping to build skills, extend thinking, and develop independence over time. This thoroughly practical text offers numerous sample lessons, questions for conferences, and ideas for revamping guided reading groups. It will help teachers tweak the mix of instructional components in their reading workshops, and provoke school-wide conversations about the place of guided reading in a complete literacy curriculum.

Adventuring with Books Amy A. McClure, Janice V. Kristo, National Council of Teachers of English. Committee to Revise the Elementary School Booklist, 2002 In this 13th edition of *Adventuring with Books*, teachers and librarians will find descriptions of more than 850 texts (published between 1999 and 2001) suitable for student use in background research, unit study, or pleasure reading, and children will find books that delight, amuse, and entertain. The texts described in the book are divided into 24 general topics, including Science Nonfiction; Struggle and Survival; Fantasy Literature; Sports; Games and Hobbies; and Mathematics in Our World. To highlight literature that reflects the schools' multiple ethnicities, the booklist also introduces readers to recent literature that celebrates African American, Asian and Pacific Island, Hispanic American, and indigenous cultures. Each chapter begins with a brief list of selection criteria, a streamlined list of all annotated titles in that chapter, and an introduction in which chapter editors discuss their criteria and the status of available books in that subject area. While the reviews were written by adults, the voices and opinions of children are often included as well, lending credence to adult choices of the quality children's books. (NKA).
