**Developing Zeami** Shelley Fenno Quinn,2005-07-31 The great noh actor, theorist, and playwright Zeami Motokiyo (ca. 1363-1443) is one of the major figures of world drama. His critical treatises have attracted international attention ever since their publication in the early 1900s. His corpus of work and ideas continues to offer a wealth of insights on issues ranging from the nature of dramatic illusion and audience interest to tactics for composing successful plays to issues of somaticity and bodily training. Shelley Fenno Quinn's impressive interpretive examination of Zeami's treatises addresses all of these areas as it outlines the development of the playwright's ideas on how best to cultivate attunement between performer and audience. Quinn begins by tracing Zeami's transformation of the largely mimetic stage art of his father's troupe into a theater of poesis in which the playwright and actors aim for performances wherein dance and chant are re-keyed to the evocative power of literary memory. Synthesizing this remembered language of stories, poems, phrases, and their prosodies and associated auras with the flow of dance and chant led to the creation of a dramatic prototype that engaged and depended on the audience as never before. Later chapters examine a performance configuration created by Zeami (the nikyoku santai) as articulated in his mature theories on the training of the performer. Drawing on possible reference points from Buddhist and Daoist thought, the author argues that Zeami came to treat the nikyoku santai as a set of guidelines for bracketing the subjectivity of the novice actor, thereby allowing the actor to reach a certain skill level or threshold from which his freedom as an artist might begin.

**Booku** Annette Rochelle Aben,2016-08-27 It's the time of year. Spooky voices must be heard. Magic is in the air. The Mistress of Halloween, gathers her subjects together in preparation for the one night when skeletons, goblins and ghosts, come to life. She sets free her rats, snakes and bats and fills the trees with the body parts of those who shall remain nameless... The chains rattle, the ravens cry amidst the eerie glow of candle light to spook those seeking treats on Halloween night. Ah yes, the things that go bump in the night cast their spells well enough when the time is right but what are they really thinking? Eaves drop on the conversations, thoughts and rants of the gruesome gang during the harmless light of day. Don't be afraid to laugh... their ghoul in life, is to entertain you! Presented in living color, Booku is the spirit of trick or treat, told in the format of Haiku poetry. Designed to hauntingly remind the grown up, little beggars of yesteryear, of the fun behind Halloween. Come on and enjoy a few snickers and get enough to share!

*Rotaviruses* Robert F. Ramig,1994 The proliferation of information on rotaviruses in the twenty years since their description as human pathogens has made it difficult to keep up with the latest developments in the field. Numerous aspects of rotavirus biology have been addressed in reviews, but these have been infrequent and quite selective in the material covered. The time appeared right to attempt to gather, into a single source, an overview of what we have learned. This volume is the result of that attempt. I hope that the reader will find in this single source, the core of information covering our current state of knowledge. I acknowledge my debt to the authors of the various chapters, for it is they who performed the tedious process of reviewing the literature and synthesizing and organizing it into concise works. R.F. **Pseudo-Noun Incorporation and Differential Object Marking** Imke Driemel,2023-03-07 This book provides a detailed cross-linguistic study of pseudo-noun incorporation, a phenomenon whereby an argument forms a 'closer than usual' relation with the verb. Imke Driemel draws on data from Tamil, Mongolian, Korean, Turkish, and German, and applies diagnostic tests across eleven noun types in each of the languages under consideration. What emerges is a coherent effect of pseudo-incorporated arguments that maps loss of case marking to obligatory narrow scope, lack of binding and control relations, and a potentially restricted movement pattern. The book provides a unifying theory that is able to capture all properties with a single assumption: pseudo-incorporation effects result from noun phrases that are made up of a nominal and a verbal category feature; implemented in a derivational framework, the nominal feature is active early in the derivation, being responsible for c-selection and nominal modification, while the verbal feature is active late and crucially derives the effects we have come to recognize as pseudo-noun incorporation. One important empirical contribution of this study stems from the observation that pseudo-incorporation does not have to be the only reason for optional case marking. Tamil and Korean provide evidence that only a subset of optionally case-marked noun types also show a correlation with scope, binding, control, and movement constraints. This insight enforces the conclusion that the same language can make use of both pseudo-noun incorporation and differential object marking.

**Zeami’s Style** Thomas Blenman Hare,1996-03-01 This is the first full-length study of Zeami Motokiyo (1363–1443), generally recognized as the greatest playwright of Japan's classical Noh theater. The book begins with a biography based on the known documents relating to Zeami's life. It then examines the documentary evidence for authorship and explains the various technical aspects of Noh. Subsequent chapters explore the role of the old man in noh (particularly in the play Takasago), as well as Zeami's plays about women and warriors, with primary attention to Izutsu and Tadanori. The book concludes with a general discussion of Zeami's style and the relationship between his dramatic theory and his plays.
