The Grammar of Japanese Mimetics Noriko Iwasaki, Peter Sells, Kimi Akita, 2016-12-01 Mimetic words, also known as 'sound-symbolic words', 'ideophones' or more popularly as 'onomatopoeia', constitute an important subset of the Japanese lexicon; we find them as well in the lexicons of other Asian languages and sub-Saharan African languages. Mimetics play a central role in Japanese grammar and feature in children's early utterances. However, this class of words is not considered as important in English and other European languages. This book aims to bridge the gap between the extensive research on Japanese mimetics and its availability to an international audience, and also to provide a better understanding of grammatical and structural aspects of sound-symbolic words from a Japanese perspective. Through the accounts of mimetics from the perspectives of morpho-syntax, semantics, language development and translation of mimetic words, linguists and students alike would find this book particularly valuable.

America's Japan Grant Kohn Goodman, 2005 This book is not only a personal chronicle of Grant Goodman's unique experience in Japan. Moving deftly between his role as an Army officer gathering essential information and as a young scholar fascinated by Japanese culture, he provides a vividly drawn portrait of daily life in occupied Tokyo. Here he looks back at signal events: Japan's responses to occupation, the writing of the new constitution and the de-deification of the Emperor, the International Military Tribunal and the issue of Japanese war crimes, reactions by ordinary Japanese to American occupiers, and much more.

The Myth of Chinese Capitalism Dexter Roberts, 2020-03-10 The untold story of how restrictive policies are preventing China from becoming the world's largest economy Dexter Roberts lived in Beijing for two decades working as a reporter on economics, business and politics for Bloomberg Businessweek. In *The Myth of Chinese Capitalism*, Roberts explores the reality behind today's financially-ascendant China and pulls the curtain back on how the Chinese manufacturing machine is actually powered. He focuses on two places: the village of Binghuacun in the province of Guizhou, one of China's poorest regions that sends the highest proportion of its youth away to become migrants; and Dongguan, China's most infamous factory town located in Guangdong, home to both the largest number of migrant workers and the country's biggest manufacturing base. Within these two towns and the people that move between them, Roberts focuses on the story of the Mo family, former farmers-turned-migrant-workers who are struggling to make a living in a fast-changing country that relegates one-half of its people to second-class status via household registration, land tenure policies and inequality in education and health care systems. In *The Myth of Chinese Capitalism*, Dexter Roberts brings to life the problems that China and its people face today as they attempt to overcome a divisive system that poses a serious challenge to the country's future development. In so doing, Roberts paints a boot-on-the-ground cautionary picture of China for a world now held in its financial thrall. Dexter Roberts is an award-winning journalist and a regular commentator on the U.S.-China trade and political relationship. His prior speaking engagements include traditional news media outlets (NPR, Fox News, CNN International) as well as universities and institutes (George Washington University, Council on Foreign Relations, and the Overseas Press Club). He is available for virtual classroom visits to courses that adopt *The Myth of Chinese Capitalism*. Please contact academic@macmillan.com for more information.

Historians as Expert Judicial Witnesses in Tobacco Litigation Ramses Delafontaine, 2015-04-23 Historian Ramses Delafontaine presents an engaging examination of a controversial legal practice: the historian as an expert judicial witness. This book focuses on tobacco litigation in the U.S. wherein 50 historians have witnessed in 314 court cases from 1986 to 2014. The author examines the use of historical arguments in court and investigates how a legal context influences historical narratives and discourse in forensic history. Delafontaine asserts that the courtroom is a performative and fact-making theatre. Nonetheless, he argues that the civic responsibility of the historian should not end at the threshold of the courtroom where history and truth hang in the balance. The book

is divided into three parts featuring an impressive range of European and American case studies. The first part provides a theoretical framework on the issues which arise when history and law interact. The second part gives a comparative overview of European and American examples of forensic history. This part also reviews U.S. legal rules and case law on expert evidence, as well as extralegal challenges historians face as experts. The third part covers a series of tobacco-related trials. With remunerations as high as hundreds of thousands of dollars and no peer-reviewed publications or communication on the part of the historians hired by the tobacco companies the question arises whether some historians are willing to trade their reputation and that of their university for the benefit of an interested party. The book further provides 50 expert profiles of the historians active in tobacco litigation, lists detailing the manner of the expert's involvement, and West Law references to these cases. This book offers profound and thought-provoking insights on the post-war forensification of history from an interdisciplinary perspective. In this way, Delafontaine makes a stirring call for debate on the contemporary engagement of historians as expert judicial witnesses in U.S. tobacco litigation.

Boom Jean Tay, Welcome to the surreal world of Boom, where civil servants wake the dead, corpses are terrified of cremation, old women are besieged in their homes, and Ah Bengs still dream of being Superman. Boom tells the story of an elderly woman and her property agent son in Singapore, who are struggling over the potential en bloc sale of their home. Their destinies become interwoven with that of an idealistic civil servant, Jeremiah, who is facing the greatest challenge of his career—persuading a reluctant corpse to yield its memories. Boom is a quirky yet poignant tale about the relocation of both dead and living, and how personal stories get left behind in the inexorable march of progress. Written by economist-turned-playwright Jean Tay, Boom was conceptualised at the Royal Court Theatre in London in 2007, and developed and staged by the Singapore Repertory Theatre in September 2008. It was nominated for Best Original Script for The Straits Times' Life! Theatre Awards in 2009 and is now an 'O'- and 'N'-Level Literature text in Singapore schools.

Variability and Consistency in Early Language Learning Michael C. Frank, Mika Braginsky, Daniel Yurovsky, Virginia A. Marchman, 2021-03-16 A data-driven exploration of how children's language learning varies across different languages, providing both a theoretical framework and reference. The Wordbank Project examines variability and consistency in children's language learning across different languages and cultures, drawing on Wordbank, an open database with data from more than 75,000 children and twenty-nine languages or dialects. This big data approach makes the book the most comprehensive cross-linguistic analysis to date of early language learning. Moreover, its data-driven picture of which aspects of language learning are consistent across languages suggests constraints on the nature of children's language learning mechanisms. The book provides both a theoretical framework for scholars of language learning, language, and human cognition, and a resource for future research.

Boom's Blues Wim Verbei, 2017-05-09 Boom's Blues stands as both a remarkable biography of J. Frank G. Boom (1920-1953) and a recovery of his incredible contribution to blues scholarship originally titled The Blues: Satirical Songs of the North American Negro. Wim Verbei tells how and when the Netherlands was introduced to African American blues music and describes the equally dramatic and peculiar friendship that existed between Boom and jazz critic and musicologist Will Gilbert, who worked for the Kultuurkamer during World War II and had been charged with the task of formulating the Nazi's Jazzverbod, the decree prohibiting the public performance of jazz. Boom's Blues ends with the annotated and complete text of Boom's The Blues, providing the international world at last with an English version of the first book-length study of the blues. At the end of the 1960s, a series of thirteen blues paperbacks edited by Paul Oliver for the London publisher November Books began appearing. One manuscript landed on his desk that had been written in 1943 by a then twenty-three-year-old Amsterdammer Frank (Frans) Boom. Its publication, to which Oliver gave the title Laughing to Keep from Crying, was announced on the back jacket of the last three Blues Paperbacks in 1971 and 1972. Yet it never was published and the manuscript once more disappeared. In October 1996, Dutch blues expert and publicist Verbei went in search of the presumably lost manuscript and the story behind its author. It only took him a couple of months to track down the manuscript, but it took another ten years to glean the full story behind the extraordinary Frans Boom, who passed away in 1953 in Indonesia.
