Four Decades of Terms-of-Trade Booms Gustavo
Adler,Mr. Nicolas E. Magud,2013-05-09 We study the
history of terms-of-trade booms (during 1970–2012), with a
focus on Latin America, through the prisms of a simple
metric that quantifies the associated income windfall. We
also document saving patterns during these episodes and
propose a measure of how much of the income windfall was
saved. We find that Latin America's terms-of-trade shocks
of the last decade have not differed much in magnitude
from those observed during the 1970s, but that the
associated windfall have been substantially larger. While
aggregate saving increased more than in past episodes, the
share of the windfall saved (the marginal saving rate)
seems to be lower, suggesting that greater aggregate
saving reflects mainly the sheer size of the windfall rather
than a greater 'effort' to save it. Finally, we find evidence
that, while savings during the boom help to increase post-
boom income, the composition of such savings matters.

Specifically, in past episodes, savings allocated to foreign asset accumulation appear to have contributed more to post-boom income than those devoted to domestic investment.

COVID-19 Disinformation: A Multi-National, Whole of Society Perspective Ritu Gill, Rebecca Goolsby, 2022-05-03 The COVID-19 pandemic is not only a threat to our health and economy, but also has strong implications for defence and security. Indeed, defence leaders have highlighted a second fight surrounding the spread of COVID-19, namely disinformation and preparing to face adversaries willing to exploit the public health crisis for nefarious purposes. The current pandemic is a breeding ground for the propagation of disinformation, as it represents the first major global health event in which large social media platforms have become the main distributor of information. This multi-national edited volume consists of contributions from Defence Science, academia and industry, including NATO Headquarters, United States, Netherlands, Singapore, United Kingdom and Norway. The content is aimed at a diverse audience, including NATO members, researchers from defence and security organizations, academics, and militaries including analysts and practitioners, as well as policy makers. This volume focuses on various aspects of COVID-19 disinformation, including identifying global dominant disinformation narratives and the methods used to spread disinformation, examining COVID-19 disinformation within the broader context of the cognitive domain, examining the psychological effects of COVID-19 disinformation and COVID-19 disinformation on instant messaging platforms, along with examining various countermeasures to

disinformation.
