**Fundamentals of EU VAT Law** Frank Nellen, Ad van Doesum, Simon Cornielje, Herman van Kesteren, 2020-08-19 Parties to cross-border disputes arising anywhere in the vast Portuguese-speaking world – a community of more than 230 million in a space that offers a wide array of investment opportunities across four continents – increasingly seek Portugal as their preferred seat of arbitration. A signatory to all relevant international conventions, Portugal has proven to be an 'arbitration-friendly' jurisdiction. This volume is the first and so far only book in English that provides a thorough, in-depth analysis of international arbitration law and practice in Portugal. Its contributing authors are among the most highly regarded legal names in the country, including scholars, arbitrators, and practitioners. The authors describe how international arbitration proceedings are conducted in Portugal, what cautions should be taken, and what procedural strategies may be suitable in particular cases. They provide insightful answers to questions such as the following: What matters can be submitted to arbitration under Portuguese law? What are the validity requirements for an arbitration agreement? How do the State courts interact with arbitration proceedings and what is the attitude of such courts toward international arbitration? What are the rules governing evidentiary matters in arbitration? How is an arbitration tribunal constituted? How are arbitrators appointed? How may they be challenged? How can an international arbitral award be recognized and enforced? How does the Portuguese legal system address the issue of damages and what specific damages are admitted? How are the costs of arbitration proceedings estimated and allocated? The book includes analyses of arbitration related to specific fields of the law, notably sports, administrative, tax, intellectual property rights (especially regarding reference and generic medicines), and corporate disputes. Each chapter provides, for the topics it addresses, an examination of the applicable laws, rules, arbitration

practice, and views taken by arbitral tribunals and state courts as well as those of the most highly considered scholars. As a detailed examination of the legal framework and of all procedural steps of an arbitration in Portugal, from the drafting of an arbitration agreement to the enforcement of an award, this book constitutes an invaluable resource for parties involved in or considering an international arbitration in this country. The guidance that it seeks to provide in respect of any problem likely to arise in this context can be useful to arbitrators, judges, academics, and interested lawyers.

**Jurisdiction in International Law** Cedric Ryngaert, 2015 This fully updated second edition of *Jurisdiction in International Law* examines the international law of jurisdiction, focusing on the areas of law where jurisdiction is most contentious: criminal, antitrust, securities, discovery, and international humanitarian and human rights law. Since F.A. Mann's work in the 1980s, no analytical overview has been attempted of this crucial topic in international law: prescribing the admissible geographical reach of a State's laws. This new edition includes new material on personal jurisdiction in the U.S., extraterritorial applications of human rights treaties, discussions on cyberspace, the Morrison case. *Jurisdiction in International Law* has been updated covering developments in sanction and tax laws, and includes further exploration on transnational tort litigation and universal civil jurisdiction. The need for such an overview has grown more pressing in recent years as the traditional framework of the law of jurisdiction, grounded in the principles of sovereignty and territoriality, has been undermined by piecemeal developments. Antitrust jurisdiction is heading in new directions, influenced by law and economics approaches; new EC rules are reshaping jurisdiction in securities law; the U.S. is arguably overreaching in the field of corporate governance law; and the universality principle has gained ground in European criminal law and U.S. tort law. Such developments have given rise to conflicts over competency that struggle to be resolved within traditional jurisdiction theory. This study proposes an innovative approach that departs from the classical solutions and advocates a general principle of international subsidiary jurisdiction. Under the new proposed rule, States would be entitled, and at times even obliged, to exercise subsidiary jurisdiction over internationally relevant situations in the interest of the international community if the State having primary jurisdiction fails to assume its responsibility.

What's Wrong with International Law? Cedric Ryngaert, Erik J. Molenaar, Sarah Nouwen, 2015-04-30 Honoring Professor A.H.A. Soons, scholar and practitioner of international law, this *Liber Amicorum* identifies gaps or 'wrong norms' in specific fields of international law, and addresses the fundamental question of what is wrong with international law as a system for creating global public order.

**Between Empowerment and Manipulation** Marijn Sax, 2021-09-28 Popular health apps are commercial services. Despite the promise of empowerment they offer, the tensions introduced by their data-driven, dynamically adjustable digital environments engender a potential for manipulation to which their designers and operators can easily succumb. In this important book, the author develops an ethical framework to evaluate the commercial practices of for-profit health apps, proceeding to a detailed proposal of how to legally address the exploitation, for financial gain, of users' need for health. Focusing on the intricate tracking of users over time, coupled with the possibility to personalize the environment based on knowledge gained from tracking, the book's in-depth analysis of popular for-profit health apps engages

with such particulars as the following: the strategic framing of health in health apps; the cultural tendency to presume we are unhealthy until we have proven we are healthy; the key concepts of autonomy, vulnerability, trust, and manipulation; how health apps develop ongoing profitable relationships with users; and use of misleading and aggressive commercial practices. The author argues that the European Union's Unfair Commercial Practices Directive, when informed by ethical considerations, offers promising legal solutions to the manipulation concerns raised by popular for-profit health apps. The book will be welcomed not only for its incisive scrutiny of the health app phenomenon but also for the light it sheds on the wider problems inherent in the digital society—what digital environments know about their users, how they use that knowledge, and for which purpose. Its progress from an ethical approach to legal solutions will recommend the book to lawyers concerned with business practices, human resources professionals, policymakers, and academics interested in the intersection of ethics and law.

The Story of Work Jan Lucassen, 2021-07-27 The first truly global history of work, an upbeat assessment from the age of the hunter-gatherer to the present day We work because we have to, but also because we like it: from hunting-gathering over 700,000 years ago to the present era of zoom meetings, humans have always worked to make the world around them serve their needs. Jan Lucassen provides an inclusive history of humanity's busy labor throughout the ages. Spanning China, India, Africa, the Americas, and Europe, Lucassen looks at the ways in which humanity organizes work: in the household, the tribe, the city, and the state. He examines how labor is split between men, women, and children; the watershed moment of the invention of money; the collective action of workers; and at the impact of migration, slavery, and the idea of leisure. From peasant farmers in the first agrarian societies to the precarious existence of today's gig workers, this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today.

*The Practice of Justice* William H. Simon, 2009-06-30 Should a lawyer keep a client's secret even when disclosure would exculpate a person wrongly accused of crime? The Practice of Justice is a fresh look at this and other traditional questions about the ethics of lawyering.

**Concurrence in European Private Law** DE GRAAFF, Ruben de Graaff, 2020-06-24 In the multi-level legal order, it is not unusual for a legal relationship between private parties to be governed by multiple Union rules on, for instance, non-discrimination, free movement, competition and the internal market more broadly. Nor is it uncommon that, on the face of it, national private law creates rights and duties as well. In such situations of concurrence, the question that arises is whether the interested party may elect the rule of his choice. Is he entitled to choose the rule which appears to him to be the most advantageous? This book offers a scheme of analysis by which this question can be debated and solved. Inspired by the experiences gained from examining several national systems of private law, the book starts from the premise that each rule, however founded, should be realised to the greatest possible extent. In principle, the existence of one rule does not, therefore, affect the scope of application of another rule. The book demonstrates that this principle also runs through the texts adopted by the Union legislature and through the judgments delivered by the Court of Justice of the European Union. It makes a clear case that in situations of concurrence, the substance of the rules should be decisive, and not merely their formal relationship

*European Union Law* Catherine Barnard, Steve Peers, 2017 Written by experts, this innovative textbook offers students a relevant, case-focused account of EU law. Under the experienced editorship of Catherine Barnard and Steve Peers, the text draws together a range of perspectives on EU law designed to introduce students to the key debates and case law which shape this vast subject.

Justice, Home Affairs and Security. European and international institutional and policy development G. Vermeulen, W. De Bondt, 2017-02-15 This book offers an insight into the historical, institutional and topical development of the EU policy in the areas of justice, home affairs and security, well-embedded in a broader international context. The main part of the book, dedicated to the EU, is therefore preceded by a part on relevant cooperation on the Benelux and Schengen levels and followed by a part on cooperation in the areas concerned on Council of Europe, NATO, OSCE, G8, OECD and UN levels. Without a proper understanding of those cooperation levels, the development and functioning of the EU would be hard to fully grasp. Before addressing the actual policy dimension, all parts start with a historical introduction and a sketch of institutional structures and functioning. For students and professionals in criminology, law and political science, and every one interested in European and international criminal policy making this book will prove relevant or insightful.

Sharing the pie : taxing multinationals in a global market Maarten Floris de Wilde, 2017 Resumen del editor: Complaints in society about how multinationals pay corporate tax are familiar. Multinationals seem able to arrange their affairs in a way that allows them to avoid contributing their fair share. Governments help them to attract investment. Workers and customers, meanwhile, face ever-increasing tax bills. What is the problem in corporate taxation? It is broader than any one country or company. Today's tax regime passed its sell-by date long ago. Back in the 1920s - the early days of international taxation, when international business primarily revolved around bulk trade and bricks-and-mortar industries - levying a percentage of a company's profit in the way we still do today made sense. Businesses tended to be close to their customers and had a strong local physical presence. Today's markets, however, operate in a different reality. Companies now structure business on a regional - or even global - basis, while the Internet means physical presences are no longer necessary to service national markets. Globalization and internationalization have made the gap between tax and market reality even wider. Taxation now influences business processes. Countries distort business decisions by not treating cross-border activities on a par with domestic equivalents. The lack of an internationally coordinated approach gives rise to double (non-)taxation issues.

*Constitutional Review in Europe* Maartje de Visser, 2013-11-22 Constitutions serve to delineate state powers and enshrine basic rights. Such matters are hardly uncontroversial, but perhaps even more controversial are the questions of who (should) uphold(s) the Constitution and how constitutional review is organised. These two questions are the subject of this book by Maartje de Visser, which offers a comprehensive, comparative analysis of how 11 representative European countries answer these questions, as well as a critical appraisal of the EU legal order in light of these national experiences. Where possible, the book endeavours to identify Europe's common and diverse constitutional traditions of constitutional review. The *raison d'être*, jurisdiction and composition of constitutional courts are explored and so too are core features of the constitutional adjudicatory process. Yet, this book also deliberately draws attention to the role of non-judicial actors in upholding the Constitution, as well as the complex interplay amongst constitutional courts and other actors at the national and European level. The Member States featured are: Belgium, the Czech Republic, Finland, France, Germany, Italy, Hungary, the Netherlands, Spain, Poland, and the United Kingdom. This book is intended for practitioners, academics and students with an interest in

(European) constitutional law.

Political Accountability and European Integration L. F. M. Verhey, Philipp Kiiver, Sandor Loeffen, 2009  
This volume addresses the future of political control and accountability in a European and comparative perspective. It is based on the contributions to an international conference hosted by the Montesquieu Institute (Center of European Parliamentary History and Constitutional Development) at Maastricht in March 2008. The conference concluded a larger research project that was devoted to identifying features of domestic constitutional law that could help develop a system of effective accountability for the European Union.
