Walking Tours of Boston's Made Land Nancy S. Seasholes,2006-09-18 Exploring Boston's past and present: 12 walks that trace the creation of the city's man-made land in the central waterfront, Back Bay, South End, Charlestown, and elsewhere. At its founding, Boston was a small peninsula; over the last 375 years the city has doubled in size by filling in the surrounding tidal flats—areas covered with water at high tide and exposed at low. In *Walking Tours of Boston's Made Land*, historian Nancy Seasholes outlines twelve walks that trace where and why Boston's man-made land was created, and, along the way, uncovers fascinating and little-known pieces of Boston history. In the course of these walks—around the central waterfront, Back Bay, Beacon Hill, the South End, Charlestown, and elsewhere—she shows us how Boston's past is always just below the surface of its present. Each walk is accompanied by a map that shows the route and original shoreline. The walks are illustrated with historical maps, historical photographs and views, and current photographs. All walks are accessible by public transportation.

Boston Women's Heritage Trail Polly Welts Kaufman,2006 Women have played active, prominent roles in Boston history since the days of Anne Hutchinson - the colonial freethinker who bravely challenged the authority of ruling Puritan ministers in 1638. Hutchinson's action is only one of more than 200 stories of Boston women told in the newly expanded guidebook from the Boston Women's Heritage Trail. Several maps indicate the sites where these historic women walked, worked, and lived, while photographs and other illustrations help bring these women to life once again. The updated guidebook will take you on seven walks through seven distinctly different Boston neighborhoods. Hutchinson's story is told by her statue on the grounds of the Massachusetts State House, while Rose Fitzgerald Kennedy's is found at the site of her birthplace in the North End. An underground railway stop on Beacon Hill reveals the dramatic escape of enslaved Ellen and William Craft to Boston. Other trails lead walkers to new statues of Underground Railroad conductor Harriet Tubman in the South End and of Abigail Adams, Lucy Stone and Phillis Wheatley - three women who used the pen for change - portrayed in bronze in the recently dedicated Boston Women's Memorial on Commonwealth Avenue. The Boston Women's Heritage Trail guidebook is a must for visitors, students, and residents of Boston alike. Its lively descriptions show the significant role Boston women played in shaping the history and the future of both Boston and the nation.

She the People Jen Deaderick,2019-03-05 A sweeping, smart, and smart-ass graphic history of women's ongoing quest for equality In March 2017, Nevada surprised the rest of America by suddenly ratifying the Equal Rights Amendment--thirty-five years after the deadline had passed. Hey, better late than never, right? Then, lo and behold, a few months later, Illinois followed suit. Hurrah for the Land of Lincoln! That left the ERA just one state short of the congressional minimum for ratification. One state--and a legacy of shame--are what stand between American women and full equality. *She the People* takes on the campaign for change by offering a cheekily illustrated, sometimes sarcastic, and all-too-true account of women's evolving rights and citizenship. Divided into twelve historical periods between 1776 and today, journalist, historian, and activist Jen Deaderick takes readers on a walk down the ERA's rocky road to become part of our Constitution by highlighting changes in the legal status of women alongside the significant cultural and social influences of the time, so women's history is revealed as an integral part of U.S. history, and not a tangential sideline. Clever and dynamic, *She the People* is informative, entertaining, and a vital reminder that women still aren't fully accepted as equal citizens in America.

The Complete Guide to Boston's Freedom Trail Charles Bahne,2013-05

Boston's Central Artery Yanni K. Tsipis,2001-02-01 Fifty years ago, the Central Artery snaked its way through Boston, destroying century-old neighborhoods and bustling commercial districts in the very heart of the city. Designed to open Boston's downtown to convenient car and truck access, the highway cut a two-mile-long gash through the nation's oldest and most historic city, destroying or casting a shadow over some of its most architecturally significant buildings. By the time the Central Artery was completed in 1959, many former supporters had already realized that it was a colossal mistake. Drawing on recently uncovered Massachusetts Department of Public Works archives and numerous other sources, Boston's Central Artery tells the story of the highway's construction and of the neighborhoods that it destroyed. The book is a vivid document of an era when roadways tore through the nation's downtown centers and displaced thousands of residents and businesses along the way. Written by an engineer-historian, Boston's Central Artery will appeal to not only those fascinated by the history of Boston but also those interested in urban history, architecture, and construction.

Gaining Ground Nancy S. Seasholes, 2018-04-20 Why and how Boston was transformed by landmaking. Fully one-sixth of Boston is built on made land. Although other waterfront cities also have substantial areas that are built on fill, Boston probably has more than any city in North America. In *Gaining Ground* historian Nancy Seasholes has given us the first complete account of when, why, and how this land was created. The story of landmaking in Boston is presented geographically; each chapter traces landmaking in a different part of the city from its first permanent settlement to the present. *Seasholes* introduces findings from recent archaeological

investigations in Boston, and relates landmaking to the major historical developments that shaped it. At the beginning of the nineteenth century, landmaking in Boston was spurred by the rapid growth that resulted from the burgeoning China trade. The influx of Irish immigrants in the mid-nineteenth century prompted several large projects to create residential land—not for the Irish, but to keep the taxpaying Yankees from fleeing to the suburbs. Many landmaking projects were undertaken to cover tidal flats that had been polluted by raw sewage discharged directly onto them, removing the pestilential exhalations thought to cause illness. Land was also added for port developments, public parks, and transportation facilities, including the largest landmaking project of all, the airport. A separate chapter discusses the technology of landmaking in Boston, explaining the basic method used to make land and the changes in its various components over time. The book is copiously illustrated with maps that show the original shoreline in relation to today's streets, details from historical maps that trace the progress of landmaking, and historical drawings and photographs.
