Boston in Transit Steven Beaucher, 2023-03-07 A richly illustrated story of public transit in one of America's most historic cities, from public ferry and horse-drawn carriage to the MBTA. A lively tour of public transportation in Boston over the years, *Boston in Transit* maps the complete history of the modes of transportation that have kept the city moving and expanding since its founding in 1630—from the simple ferry serving an English settlement to the expansive network of the Massachusetts Bay Transportation Authority, or MBTA. The story of public transit in Boston—once dubbed the Hub of the Universe—is a journey through the history of the American metropolis. With a remarkable collection of maps and architectural and engineering drawings at hand, Steven Beaucher launches his account from the landing where English colonists established that first ferry, carrying passengers between what is now Boston's North End and Charlestown—and sparing them what had been a two-day walk around Boston Harbor. In the 1700s, horse-drawn coaches appeared on the scene, connecting Boston and Cambridge, with the bigger, better Omnibus soon to follow. From horse-drawn coaches, horse-drawn railways evolved, making way for the electric streetcar networks that allowed the city's early suburbs to sprout—culminating in the multimodal, regional public transportation network in place in Boston today. With photographs, brochures, pamphlets, guidebooks, timetables, and tickets, *Boston in Transit* creates a complete picture of the everyday experience of public transportation through the centuries. At once a practical reference, local history, and travelogue, this book will be cherished by armchair tourists, day-trippers, and serious travelers alike.

Boston's Blue Line Frank Cheney, 2004-04-01 Boston's rapid-transit Blue Line covers a distance of 5.94 miles, a twenty-three-minute commute that begins at Bowdoin station in downtown Boston, travels under the harbor, passes Revere Beach, and stops at Wonderland. Today's commuters might be surprised to learn that the line they are riding was once operated by trolley cars and narrow-gauge steam-powered commuter trains, for it was not until 1904 that the East Boston Tunnel under the harbor was completed. By 1917, the number of people riding the Blue Line had climbed to twenty-five thousand a day. Although significant advances had been made to accommodate high-volume commuter traffic, rush-hour congestion at downtown stations remained a problem. In the 1920s, with ridership exceeding forty-two thousand people a day, the Boston Elevated Railway and the Boston Transit Commission agreed to convert the tunnel to a rapid-transit operation with a transfer station at Maverick Square. Further expansion occurred in the 1950s, when the Blue Line was extended to Orient Heights, Suffolk Downs, and Revere Beach.
