Karen Solomon

The Adventures of a Plastic Bottle Alison Inches, 2009 A plastic bottle describes its journey from the refinery through a recycling plant, after which it was used as part of a space suit.

Making a Green Machine Finn Arne Jørgensen, 2011-07-11 Consider an empty bottle or can, one of the hundreds of billions of beverage containers that are discarded worldwide every year. Empty containers have been at the center of intense political controversies, technological innovation processes, and the modern environmental movement. Making a Green Machine examines the development of the Scandinavian beverage container deposit-refund system, which has the highest return rates in the world, from 1970 to present. Finn Arne Jørgensen investigates the challenges the system faced when exported internationally and explores the critical role of technological infrastructures and consumer convenience in modern recycling. His comparative framework charts the complex network of business and political actors involved in the development of the reverse vending machine (RVM) and bottle deposit legislation to better understand the different historical trajectories empty beverage containers have taken across markets, including the U.S. The RVM has served as more than a hole in the wall—it began simply as a tool for grocers who had to handle empty refillable glass bottles, but has become a green machine to redeem the empty beverage container, helping both business and consumers participate in environmental actions.

Beer Crafts Shawn Gascoyne-Bowman, 2013-05-14 While author and crafter extraordinaire Shawn Bowman would like to think she came up with the idea on her own, inspiration really came from her eight-year-old daughter, who spent a summer obsessed with making jewelry out of her parents' discarded bottle caps. Finding the note on her desk, "My crafting involves you to open a beer," the author had what can only be called an epiphany: "ALL crafting should involve me opening a beer." She raised her daughter's allowance, and set down to writing this book. But first, she opened a beer. Beer Crafts shows you how to repurpose not just the caps but also labels, bottles, and even cans into useful, hip, and quirky items — from attention-getting (if not downright sexy) garter belts to the classic

crochet beer can hat, to beer bottle tags, to refrigerator magnets, and more. The projects are super fun, easy to make (even for a first-time crafter), and most of the supplies are things you probably already have on hand or chilling in the fridge. Beer Crafts has jewelry and accessories for guys and gals. From cowboy hats made from beer case boxes and masculine bottle label belt buckles and wallets to flowery bottle top flip-flops and cute-as-a-button beer cap headbands, there's a little something for everyone – even beer can jackets for the family dog! Beer bottles themselves get dressed up with insulating crochet cozies and fancy charm necklaces, ending all arguments over whose drink is whose, when they're all clearly marked "mine"! There are even funky home decor projects, including candle holders, patio lanterns, bird feeders, and a memo board. And with plenty of beer quotes and trivia, Beer Crafts is recommended bar reading for those who don't craft. Tie one on – then braid it, glue it, and embellish it – with Beer Crafts.

Revolution in a Bottle Tom Szaky, 2013-03-26 The amazing story of what Inc. magazine called "the coolest little startup in America." Tom Szaky dropped out of Princeton a decade ago to found TerraCycle, a company that makes the nonrecyclable recyclable. TerraCycle is now at the forefront of the eco-capitalist movement, partnering with more than 35 million people in twenty countries in the collection of waste and transforming that waste into useful products. Creating trash cans from chip bags and plastic benches from cigarette butts, TerraCycle has redefined recycling. Revolution in a Bottle is a rollicking tale of entrepreneurial adventure and an essential guide to creating a company that's good for people, good for profits, and good for the planet. Since Revolution in a Bottle was first published in 2009, TerraCycle has grown dramatically from a small company offering worm poop in a soda bottle to a pioneer of recycling worldwide. This completely revised and expanded edition continues the story of this incredible company.

Keg Bottle Can Luke Robertson, James Smith, 2018-08 The book celebrates the best of Australian craft beer, from easy-to-drink crisp lagers and pale ales to stouts, porters and sours. Keg Bottle Can presents 150 Australian brews, organised by beer-drinking occasion: from the refreshing after-work beverage to beers that challenge your perception and palate, to art appreciation through beers with well-considered labels. The book includes key information on the beers, as well as the backstory about the brewer and the beer itself, along with food pairings and additional top picks from the brewery. The book opens with a history of craft beer in Australia and describes the brewing process in detail. Rounded off with a useful glossary of beer terminology, it's the perfect tome for all beer lovers. Ultimately, Keg Bottle Can's message is that the beer world is a broad church - and there really is something for everyone. And that while it's fine to drink a beer out of a bottle at a barbecue, if you pair it with food there are nice glasses for it too. Readers will walk away with the confidence and knowledge to do both, rather than feeling bound by hard and fast rules.

How to Give Up Plastic Will McCallum,2019-07-16 An accessible guide to the changes we can all make—small and large—to rid our lives of disposable plastic and clean up the world’s oceans *How to Give Up Plastic* is a straightforward guide to eliminating plastic from your life. Going room by room through your home and workplace, Greenpeace activist Will McCallum teaches you how to spot disposable plastic items and find plastic-free, sustainable alternatives to each one. From carrying a reusable straw, to catching microfibers when you wash your clothes, to throwing plastic-free parties, you’ll learn new and intuitive ways to reduce plastic waste. And by arming you with a wealth of facts about global plastic consumption and anecdotes from activists fighting plastic around the world, you’ll also learn how to advocate to businesses and leaders in your community and across the country to commit to eliminating disposable plastics for good. It takes 450 years for a plastic bottle to fully biodegrade, and there are around 12.7 million tons of plastic entering the ocean each year. At our current pace, in the year 2050 there could be more plastic in the oceans than fish, by weight. These are alarming figures, but plastic pollution is an environmental crisis with a solution we can all contribute to.

Antique Trader Bottles Michael Polak,2016-03-23 Antique Trader Bottles Identification and Price Guide is known as the Bottle Bible and is the only full-colour bottle book on the market. It is the definitive guide to one of the oldest, largest, and most organised segments of the antiques field (more than 100,000 active collectors). Antique Trader Bottles Identification and Price Guide is the only full-color bottle price guide on the market. It's loaded with information: from listings and current market values, to more than 700 color photographs that capture the beauty and allure of the hobby. The extensive content is important because collectors can use it in the field while searching for bottles, at shows, while antiquing or at home while searching for finds on the Internet. Interest in bottle collecting continues to grow, and new bottle clubs continue to form throughout the United States and Europe. Because bottles are non-organic and don't decay, they can survive for centuries and can be found in ghost towns, in rivers and lakes, in old outhouses, in abandoned homes, shacks, and mines. They are one of the most common collectibles and are found in almost all antique shops and flea markets. Covering more than 50 bottle categories from the 19th and 20th centuries, the book offers a wealth of information for the new and advanced collector (See outline). Readers will discover tips for finding, identifying, researching buying, selling, displaying and caring for their bottles. Collectors get the detailed descriptions, trademarks, and color photos they need to make a positive identification of their bottles. Also, bottle collectors will have accurate, up-to-date prices and a state-of-the-market report, as well as collecting tips on reproductions, rarity, and factors that determine value compiled by one of the leading bottle collecting authors in the country.
