### **The Usual Suspects** Maurice Broaddus, 2019-05-21

Fans of Jason Reynolds and Sharon M. Draper will love this oh-so-honest middle grade novel from writer and educator Maurice Broaddus. Thelonius Mitchell is tired of being labeled. He’s in special ed, separated from the “normal” kids at school who don’t have any “issues.” That’s enough

to make all the teachers and students look at him and his friends with a constant side-eye. (Although his disruptive antics and pranks have given him a rep too.) When a gun is found at a neighborhood hangout, Thelonius and his pals become instant suspects. Thelonius may be guilty of pulling crazy stunts at school, but a criminal? T isn't about to let that label stick.

Game Feel Steve Swink, 2008-10-13 Game Feel exposes feel as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks whe

**Ball** Mary Sullivan,2013-04-02 A dog with a ball is one of the most relentlessly hopeful creatures on Earth. After his best little-girl pal leaves for school, this dog hits up yoga mom, baby, and even the angry cat for a quick throw. No luck. Forced to go solo, the dog begins a hilarious one-sided game of fetch until naptime's wild, ball-centric dream sequence. The pictures speak a thousand words in this comic book-style ode to canine monomania. Ball? Ball.

*Blindsight* Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps

to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
