Archery Dawson Albert, 2019-05-29 How To Hit A Bull's Eye In A Day With The Royal Discipline Of Archery "An archer cannot hit the bullseye if he doesn't know where the target is." Did you ever wish you could shoot arrows like Robin Hood, Hawkeye or Katniss Everdeen? Whenever you watch the Lord of the Rings, you imagine how powerful it must be to step in the shoes of Legolas... ...face your target ...draw back your bowand just shoot. Yet, you push the thought into the corner of stupid childhood dreams, knowing archery is just for entertaining movie scenes. You are wrong. The medieval way of hunting turned into a royal discipline for everyone who wants to improve their confidence and become quicker than the fastest animal in the world. Yes, your laser-sharp focus could even help you catch a cheetah. Yet, archery is much more than just a safari hunt. Archery was one of the first disciplines in the Olympic games and the latest gold medal winner Ku-Bon-Chan proves why it is a tough sport that needs practice and the right strategy. Becoming the next Legolas requires much more than randomly picking an arrow from your quiver. And even if you just want to rediscover your inner child, it is much more fun to shoot arrows in the woods if you know how to hit your target. No one wants to miss their goal. Good thing, if you follow this simple but effective plan to get to the next level, you can improve your skill set within just one practice. How many times have you started on something and given up within a week because you got frustrated? A lot of

people share this story. They start a new thing without any knowledge and expect themselves to be perfect within the first couple of shots. Perfection might never be possible in the golden sports of archery. Yet, you can instantly succeed and hit your first target if you know how. In "Archery", you'll discover: - How to start your Legolas journey and bring Lord of the Rings into reality - What are the Dos and Don'ts to build a strong foundation in archery - How to make sure your arrow doesn't hit your neighbor's dog - Where to look for the bullseye - How to practice without even touching your bow and arrow - 9 common mistakes to avoid and take the shortcut to success - Which bow will turn archery into a piece of cake - How to maintain your golden instrument - Tournaments for everyone from absolute beginner to Olympic star - How much pocket money you need to become an archer And much more. No matter if you want to go at your own pace and enjoy some exercise or if you want to become an Olympian. If you want to increase confidence, focus and quick response time, archery is your sport. Even if you are the most uncoordinated person in the world, the given strategies will help you to catch your perfect meal next time you are lost in the woods. Give it a shot, draw your bow and know how to shoot. Every childhood dream starts with the first action. Stop dreaming and start doing!

The ART of BAREBOW Shooting Martin L Godio,2020-10-02 There are many books about shooting Compound and Recurve bows but no book deals with the specific

problems of the BAREBOW archer, as this book does. It presents a systematic, biomechanically efficient BAREBOW technique. A starting point to help you decide how you shoot and settle on your own shooting style, it will still serve as your guide for many years of competitive and enjoyable archery. Archery is a performance sport, no matter how good your aim if you fail in the shot execution, you miss. The shooting process is what makes you accurate and a biomechanically efficient BAREBOW technique will make this easier. The techniques described in this book are relevant to any barebow or traditional archer, not just Stringwalkers. Correct use of muscles, joints, and bones is needed to ensure energy is not wasted. This requires good alignment, proper use of archer's back muscles, and the transfer of the archer's effort into the back before allowing expansion to happen naturally. This book explains how to achieve this and details training methods and tools, including some notes for those participating in 3D and Field Archery. Target Panic is the most overlooked problem of BAREBOW archery. It is vital to know how to prevent it. The essential mental control is integrated throughout the description of the shooting process. Once you already have it, you have only two options: to conquer it or to suffer from it for the rest of your archery life. Consequently, Target Panic is addressed in depth. The module devoted to the mental side of BAREBOW archery includes an explanation of Target Panic and presents methods to reassert control and overcome it. The mental systems used to learn how to prepare yourself for competition and then perform under

pressure are also explained. NOTE: This book does not set out to teach the very basics of how to shoot a bow. It is advisable to learn the early steps of shooting a bow under the supervision of a competent coach.
