

Box Move Pro Clear All Boxes In One Move

Jonathan Stars, Janice Child, Nonie Bernard

Think Like a Cat Pam Johnson-Bennett, 2011-09-27 America's favorite cat behavior expert, author of *Catwise* and *Cat vs. Cat*, offers the most complete resource for cat owners of all stripes, now fully updated. The queen of cat behavior - Steve Dale, author of *My Pet World* Think it's impossible to train a cat? Think again! By learning how to think like a cat, you'll be amazed at just how easy it is. Whether you are a veteran cat lover, a brand-new owner of a sweet kitten, or the frustrated companion of a feline whose driving you crazy, Pam Johnson-Bennett will help you understand what makes your cat tick (as well as scratch and purr). Topics range from where to get a cat to securing a vet; from basic health care to treating more serious problems; choosing an irresistible scratching post and avoiding litterbox problems. A comprehensive guide to cat care and training, she helps you understand the instincts that guide feline behavior. Using behavior modification and play therapy techniques, she shares successful methods that will help you and your cat build a great relationship.

Coloured Petri Nets Kurt Jensen, 2013-04-17 This book presents a coherent description of the theoretical and practical aspects of Coloured Petri Nets (CP-nets or CPN). It shows how CP-nets have been developed - from being a promising theoretical model to being a full-fledged language for the design, specification, simulation, validation and implementation of large software systems (and other systems in which human beings and/or computers communicate by means of some more or less formal rules). The book contains the formal definition of CP-nets and the mathematical theory behind their analysis methods. However, it has been the intention to write the book in such a way that it also becomes attractive to readers who are more interested in applications than the underlying mathematics. This means that a large part of the book is written in a style which is closer to an engineering textbook (or a users' manual) than it is to

a typical textbook in theoretical computer science. The book consists of three separate volumes. The first volume defines the net model (i. e. , hierarchical CP-nets) and the basic concepts (e. g. , the different behavioural properties such as deadlocks, fairness and home markings). It gives a detailed presentation of many small examples and a brief overview of some industrial applications. It introduces the formal analysis methods. Finally, it contains a description of a set of CPN tools which support the practical use of CP-nets.

Office 2001 for Macintosh: The Missing Manual Nan Barber, David Reynolds, 2001-05-03 To the surprise of most Mac fans, the number one bestselling Macintosh software is Microsoft Office for the Macintosh. It's by far the most popular Macintosh software, and the first software purchase a new Mac user is likely to make. And for the first time, Office 2001 comes without a single page of printed instructions. The packaging is a five-inch-square clear plastic case housing the CD-ROM and little else. Fortunately, Pogue Press/O'Reilly is once again ready to embrace the befuddled and overwhelmed--with Office 2001 for Macintosh: The Missing Manual. It tackles each of the primary Office applications with depth, humor, and clarity, and provides relief for the hapless Mac user who'd rather read professionally written printed instructions than hunt through a maze of personality-free help screens. The book is structured to help the beginner as well as the seasoned user. Part One provides an overview of Word. From What's New, to Basic Word Processing, to Document Design, to Advanced Word Processing--with in-depth details on creating Web pages and performing mail merges using Word. Part Two covers the new Palm-syncable calendar in Entourage, including all aspects of email, how to best use the calendar and address book, and crucial information on the Palm Hotsync. Part three explains all the finer points of Excel, including Microsoft's exciting new List Manager, specifically designed for creating and manipulating lists without the prerequisite of learning

spreadsheet tools. Office 2001 for Macintosh: The Missing Manual is coauthored by a dream team of Missing Manual alumni: David Reynolds, executive editor of MacAddict magazine and coauthor of AppleWorks 6: The Missing Manual, and Nan Barber, whose efforts as the copy editor of the first four Missing Manual titles gave her an intuitive feeling for the friendly, funny, authoritative voice of the series. Once again, the authors are joined by series founder David Pogue, who has closely edited the book to ensure excellence of depth, accuracy, and prose.
