Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.

Talk is Cheap James E. Gaskin,2005 Fed up with the high tolls charged by your ordinary telephone service? If you're itching to cut the copper cord with your costly, traditional phone service, you need Talk is Cheap, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. Technologies such as VoIP are gaining a great deal of attention these days as more people switch from standard telephone service to phone service via the Internet. But while the cost savings are outstanding, there are some issues with Internet telephony that you should know about. Are the connections reliable? Is the quality comparable? Will it include 911 services? James Gaskin's Talk is Cheap addresses these issues and many more by explaining how to make the switch and what the tradeoffs will be if you opt for Internet telephony over traditional phone services. Talk is Cheap focuses on the increasingly popular services from Vonage, which uses VoIP, and Skype--a free service that operates as a peer-to-peer (P2P) network with the ability to turn any PC, Mac, or Pocket PC into a telephone. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and drawbacks of both technologies

(including service offerings, quality, capabilities, completion rates, and more).Talk is Cheap then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones.A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone.

Black Code Ronald J. Deibert, 2013-05-14 Cyberspace is all around us. We depend on it for everything we do. We have reengineered our business, governance, and social relations around a planetary network unlike any before it. But there are dangers looming, and malign forces are threatening to transform this extraordinary domain. In *Black Code*, Ronald J. Deibert, a leading expert on digital technology, security, and human rights, lifts the lid on cyberspace and shows what's at stake for Internet users and citizens. As cyberspace develops in unprecedented ways, powerful agents are scrambling for control. Predatory cyber criminal gangs such as Koobface have made social media their stalking ground. The discovery of Stuxnet, a computer worm reportedly developed by Israel and the United States and aimed at Iran's nuclear facilities, showed that state cyberwar is now a very real possibility. Governments and corporations are in collusion and are setting the rules of the road behind closed doors. This is not the way it was supposed to be. The Internet's original promise

of a global commons of shared knowledge and communications is now under threat. Drawing on the first-hand experiences of one of the most important protagonists in the battle — the Citizen Lab and its global network of frontline researchers, who have spent more than a decade cracking cyber espionage rings and uncovering attacks on citizens and NGOs worldwide — Black Code takes readers on a fascinating journey into the battle for cyberspace. Thought-provoking, compelling, and sometimes frightening, it is a wakeup call to citizens who have come to take the Internet for granted. Cyberspace is ours, it is what we make of it, Deibert argues, and we need to act now before it slips through our grasp.

Music, Life and Changing Times: Selected Correspondence Between British Composers Elizabeth Maconchy and Grace Williams, 1927–77 Fik Meijer, Onno van Nijf, 1992 At this book's core is a critical edition of letters exchanged over 50 years between Anglo-Irish composer Elizabeth Maconchy (1907-1994) and the Welsh composer Grace Williams (1906-1977). These two innovative and talented women are highly regarded for their music, their professional activities and their roles in British musical life. The edition comprises around 200 letters from 1927 to 1977, none of which have been published before, along with scholarly introductions and contextualizations. Interwoven commentaries, in tandem with carefully constructed appendices, frame the letter texts. Moreover, the commentaries and introductory essays highlight and track the development of important themes and issues that characterize the study of twentieth-century British music today. This edition presents a dialogue, through both sides of a unique correspondence, offering an alternative commentary on musical and cultural developments of this period.

Squid Empire Danna Staaf, 2017-10-03 Before there were

mammals on land, there were dinosaurs. And before there were fish in the sea, there were cephalopods-the ancestors of modern squid and Earth's first truly substantial animals. Cephalopods became the first creatures to rise from the seafloor, essentially inventing the act of swimming. With dozens of tentacles and formidable shells, they presided over an undersea empire for millions of years. But when fish evolved jaws, the ocean's former top predator became its most delicious snack. Cephalopods had to step up their game. Many species streamlined their shells and added defensive spines, but these enhancements only provided a brief advantage. Some cephalopods then abandoned the shell entirely, which opened the gates to a flood of evolutionary innovations: masterful camouflage, fin-supplemented jet propulsion, perhaps even dolphin-like intelligence. Squid Empire is an epic adventure spanning hundreds of millions of years, from the marine life of the primordial ocean to the calamari on tonight's menu. Anyone who enjoys the undersea world-along with all those obsessed with things prehistoric-will be interested in the sometimes enormous, often bizarre creatures that ruled the seas long before the first dinosaurs.

European Founders at Work Pedro Gairifo Santos,2012-02-12 In *European Founders at Work*, several of the top European startup founders and venture capitalists are interviewed to explain their respective paths to building a successful company. It takes a similar approach to *Venture Capitalists at Work* and other books in Apress' elite *At Work* series but with a focus on the differences between building a successful company in Europe versus the U.S. These insightful interviews are presented in a way that will help readers understand the founders local or a global views, how they competed on the global scale, if and how they got funding and their main

challenges and opportunities. The companies chosen to be interviewed are a mix of unique worldwide ventures: European-only ventures and even a few copycats of already-proven concepts. As such, it provides a balanced view on the European scene. This mix also includes companies that started in Europe and moved to the U.S., companies who went IPO in their country of origin, companies with European venture capital backing, and companies that bootstrapped their way to success. Foreword by Saul Klein, Founder of LOVEFiLM and The Accelerator Group. Travel While You Work Mish Slade, 2015-08-15 All around the world, thousands of people are ditching the office and taking their working life on the road... Freelancers are packing up their laptops and setting up shop in Thai cafes and Spanish coworking spaces, while entire companies are realising that they can slash their costs and have happier employees by allowing them to work from wherever they want. Being able to see the world outside of a two-week vacation is pretty great, but it's not just about the travel. It's about doing away with all the constraints of office life - the commute, the cubicle, the bad coffee - and finding freedom in a more flexible way of working and living. Travel While You Work is your guide to how you can make this transition too - whether you're a freelancer or the head of your own company. Over the course of over 300 pages, you'll learn:

The art of getting down to work fast in a new environment How to stay productive despite the hassles and distractions of travel Essential information about currencies and payments - including cross-currency payments Tips, tools and important principles for communicating with clients abroad A system for reliably hiring the best contractors and employees without meeting them in person How to manage a team when you're all in different locations ... And everything else you need to make out of office your permanent reality. *Travel While You Work* also contains interviews with 13 very different business owners and freelancers - everyone from a management consultant to a circus school owner - sharing their tips for how they make their business work from anywhere in the world. PLUS interviews with three travelling families who successfully balance entrepreneurship and education along with a life of travel. This book won't teach you how to start a business, or what business you should start. But if you want to take an existing business mobile (whether as a solo freelancer or the head of your own company), *Travel While You Work* will give you all the inspiration, resources and practical guidance you need.

Alpha Girls Julian Guthrie, 2019-04-30 An unforgettable story of four women who, through grit and ingenuity, became stars in the cutthroat, high-stakes, male dominated world of venture capital in Silicon Valley, and helped build some of the foremost companies of our time. In *Alpha Girls*, award-winning journalist Julian Guthrie takes readers behind the closed doors of venture capital, an industry that transforms economies and shapes how we live. We follow the lives and careers of four women who were largely written out of history - until now. Magdalena Yesil, who arrived in America from Turkey with \$43 to her name, would go on to receive her electrical

engineering degree from Stanford, found some of the first companies to commercialize internet access, and help Marc Benioff build Salesforce. Mary Jane Elmore went from the corn fields of Indiana to Stanford and on to the storied venture capital firm IVP - where she was one of the first women in the U.S. to make partner - only to be pulled back from the glass ceiling by expectations at home. Theresia Gouw, an overachieving first-generation Asian American from a working-class town, dominated the foosball tables at Brown (she would later reluctantly let Sergey Brin win to help Accel Partners court Google), before she helped land and build companies including Facebook, Trulia, Imperva, and ForeScout. Sonja Hoel, a Southerner who became the first woman investing partner at white-glove Menlo Ventures, invested in McAfee, Hotmail, Acme Packet, and F5 Networks. As her star was still rising at Menlo, a personal crisis would turn her into an activist overnight, inspiring her to found an all-women's investment group and a national nonprofit for girls. These women, juggling work and family, shaped the tech landscape we know today while overcoming unequal pay, actual punches, betrayals, and the sexist attitudes prevalent in Silicon Valley and in male-dominated industries everywhere. Despite the setbacks, they would rise again to rewrite the rules for an industry they love. In *Alpha Girls*, Guthrie reveals their untold stories.

Social Reinforcement G. M. Heal, Howard Kunreuther, 2007 There are many social situations in which the actions of different agents reinforce each other. These include network effects and the threshold models used by sociologists (Granovetter, Watts) as well as Leibenstein's bandwagon effects. We model such situations as a game with increasing differences, and show that tipping of equilibria as discussed by Schelling, cascading and Dixit's results on clubs with

entrapment are natural consequences of this mutual reinforcement. If there are several equilibria, one of which Pareto dominates, then we show that the inefficient equilibria can be tipped to the efficient one, a result of interest in the context of coordination problems.

Don't Trust, Don't Fear, Don't Beg Ben Stewart, 2013-09-10 The true story of Greenpeace activists imprisoned in Russia—and the fight to free them: “A gripping story of tremendous courage that reads like a thriller” (Naomi Klein). “The most important prison motto is hope for the better, but every moment, literally every moment, be prepared for the worst. Don’t hope, don’t fear, don’t beg.” —Roman Dolgov, one of the Arctic 30 With rising temperatures, a military arms race, and a multi-national rush to exploit resources at any cost, the Arctic is now the stage on which our future will be decided. As the ice melts, Vladimir Putin orders Russia’s oil rigs to move further north. But one early September morning in 2013, thirty men and women from eighteen countries—the crew of Greenpeace’s Arctic Sunrise—decided to draw a line in the ice and protest Arctic drilling. Thrown together by a common cause, they are determined to stop Putin and the oligarchs. But their protest is met with brutal force as Russian commandos seize the Arctic Sunrise. Held under armed guard by masked men, they are charged with piracy and face fifteen years in Russia’s nightmarish prison system. Journalist and activist Ben Stewart spearheaded the campaign to release the Arctic 30. Now he tells their astonishing story—a tale of passion, courage, brutality, and survival. With wit, verve, and candor, Stewart chronicles the extraordinary friendships the activists made with their often murderous cellmates, their battle to outwit the prison guards, and the struggle to stay true to the cause that brought them there. “With its colorful dialogue, moral dilemmas, and scenes of physical danger,

Stewart’s book would make a great movie . . . the prison life the book reveals is eye-opening, and Stewart describes it with great verve.”
