Forbidden Touches Rena Marks, 2018-12-05 If it's winged babies she's interested in, he'd be more than happy to oblige. Dr. Irina Mescar has been a doctor to the Xeno Sapiens in their newly created city, Xenia. She loves her job despite the inappropriate, infuriating, sexy, winged male, Blaze. She can make a list of inappropriate sayings that pop out of his mouth, which include referring to her as beautiful and offering to make her a mother. If only Blaze knew that a relationship with a patient when she began her career got her lover killed. She has sworn never to make that mistake again. Blaze is aware Dr. Irina Mescar is his. Not only does he crave her with every breath; every cell in his body screams to possess her. Every person around them

knows their odd relationship is beyond that of strangers, beyond that of a doctor and patient, and beyond that of the category she keeps trying to put them in: friendship. It's love, plain and simple. Everyone knows this but his gorgeous doctor. So if playing doctor is how she needs the relationship to be, so be it. * The story behind the series: When futuristic Earth finds alien DNA and creates a new species of hybrids in hidden labs, Dr. Robyn Saraven helps the creatures escape. She uses her connections to establish their own city on Earth-Ground where they can learn, grow, and avoid the corruption and greed that created them. * Each book can be read as a standalone, but will be richer if read in order. Other books in the Genetically Altered Humans Series: Book 1 - Xeno Sapiens Book 2 - Earth-Ground Book 3 - Siren Book 4 - Beast's Beauty Book 5 - Almost Human Book 6 - Forbidden Touches Book 7 - Coveting Ava Book 8 - For Everly Book 9 - Assassin's Mate Book 10- Sextet Book 11- Tempting Tempest Book 12- Falling for Trance Book 13- Damaged Goods Book 14- Alien's Bride Book 15- Dual Lives Book 16- Reson's Lesson Book 17- A Mate For Max Book 18- Dragon's Mate Book 19- Fated I've been waiting for Blaze's story ever since Dr. Irina helped his wings emerge. It's worth the wait!

Blaze Stephen King, 2007-06-12 Master storyteller Stephen King (writing as Richard Bachman) presents this gripping and remarkable New York Times bestselling crime novel about a damaged young man who embarks on an ill-advised kidnapping plot—a work as taut and riveting as anything he has ever written. Once upon a time, a fellow named Richard Bachman wrote Blaze on an Olivetti typewriter, then turned the machine over to Stephen King, who used it to write Carrie. Bachman died in 1985 (“cancer of the pseudonym”), but this last gripping Bachman novel resurfaced after being hidden away for decades—an unforgettable crime story tinged with sadness and suspense. Clayton Blaisdell, Jr., was always a small-time delinquent. None too bright either, thanks to the beatings he got as a kid. Then Blaze met George Rackley, a seasoned pro with a hundred cons and one big idea. The kidnapping should go off without a hitch, with George as the brains behind their dangerous scheme. But there's only one problem: by the time the deal goes down, Blaze's partner in crime is dead. Or is he?

Boxing My Unbridled Brain Linda Hotchkiss, 2019-05-31 Untamed as wild horses her mind roams free; sometimes drifting as clouds in a lazy blue sky, other times skipping like a stone across a body of work to be done. As deadlines approach her scattered thoughts begin gathering into a pile for sorting. Finally able to focus she sits motionless, eyes fixed on papers spread over a desk while her mind explodes with ideas in all directions. It's as if her body switches off while her soul on fire climbs up into her head, splits into several parts, and goes to work processing the ream of information before her. Brain synapses buzz working an angle, then fathoms a system until a That's it! rush floods her spirit back into hands quickly sorting, tearing, stapling, noting, tossing, graphing, sketching, not eating bringing the project into elaborately detailed charts, folders, and binders. Done! They praise her and wait expectantly. That's where she struggles. Her devil is in bringing the details to fruition in a timely manner. If she realizes the key is in her own processes she will finally overcome that nagging little report card comment from way back in grammar school does not make wise use of time

The Blaze Chad Dundas,2020 In Dundas' assured hands, one man's search for answers makes for a lyrical, riveting meditation on memory.--EW One man knows the connection between two extraordinary acts of arson, fifteen years apart, in his Montana hometown--if only he could remember it. Having lost much of his memory from a traumatic brain injury sustained in Iraq, army veteran Matthew Rose is called back to Montana after his father's death to settle his affairs, and hopefully to settle the past as well. It's not only a blank to him, but a mystery. Why as a teen did he suddenly become sullen and vacant, abandoning the activities and people that had meant most to him? How did he, the son of hippy activists, wind up enlisting in the first place? Then on his first night back, Matthew sees a house go up in flames, and it turns out a local college student has died inside. And this event sparks a memory of a different fire, an unsolved crime from long ago, a part of Matthew's past that might lead to all the answers he's been searching for. What he finds will connect the old fire and the new, a series of long-unsolved mysteries, and a ruthless act of murder.

Taming Your Outer Child Susan Anderson,2015-01-09 Take Control of Your Life Chances are, you've already had run-ins with your Outer Child — the self-sabotaging, bungling, and impulsive part of your personality. This misguided, hidden nemesis blows your diet, overspends, and ruins your love life. Your Outer Child acts out and fulfills your legitimate childlike needs and wants in the wrong place, at the wrong time, and in counterproductive ways: It goes for immediate gratification and the quick fix in spite of your best-laid plans. Now, in a revolutionary rethinking of the link between emotion and behavior, veteran psychotherapist Susan Anderson offers a three-step program to tame your Outer Child's destructive behavior. This dynamic, transformational set of strategies — action steps that act like physical therapy for the brain — calms your Inner Child, strengthens your Adult Self, releases you from the self-blame and shame at the root of Outer Child issues, and paves new neural pathways that can lead to more productive behavior. The result is happiness, fulfillment, self-mastery, and self-love.

Brain Storm: An Electrifying Journey Kate Recore,2019-03-16 The most difficult thing about being misdiagnosed with a mental illness is the more you fight it, the crazier you seem. At the age of twenty-three, Kate Recore began to suffer from a common brain disease. Although signs pointed directly at epilepsy, her neurologists misdiagnosed her with mental illness. For almost a year, Kate struggled against her worsening mind-altering seizures without any medical help. She lost her memory of the past, and her dreams for the future. After finally being tested and properly diagnosed, her journey through epilepsy began. Many years of failed drug therapies stretched before her. She battled against doctors who refused to consider the importance of their patient's quality of life, never changing course to help her manage her disease. Finally finding a true caregiver, Kate became well again. With a new drug and a new place to call home, she learned to let go of who she was, and love who she is. Misdiagnosis affects over twelve million people in the United State every year, and is considered the country's third-leading cause of death. While told against the backdrop of one patient's life, Brain Storm: An Electrifying Journey resonates with anyone fighting the overpriced, inadequate American healthcare system. By fearlessly adding her voice to the demand for better care, Kate Recore hopes to blaze a trail for all patients calling for help, and needing to be heard.It seems

inappropriate to call an autobiographical account of epilepsy and medical malfunction a page turner but, in fact, that is what BRAIN STORM is—a story that keeps you turning the pages. Kate Recore educates us on the reality of health insurance, doctoring, diagnosis, functional brain damage, epilepsy, and familial influence without losing the thread of her plot, a plot created from lived experience. You will read because it is interesting. You will learn because it is unavoidable. You will be inspired because you will be awakened. Don't miss this one. Dr. Lynette Louise (The Brain Broad - www.lynettelouise.com) award-winning neurotherapist, humanitarian, director, speaker, writer, brain-change expert, author of MIRACLES ARE MADE: A Real-Life Guide to Autism

The Shallows: What the Internet Is Doing to Our Brains Nicholas Carr, 2011-06-06 Finalist for the 2011 Pulitzer Prize in General Nonfiction: “Nicholas Carr has written a Silent Spring for the literary mind.”—Michael Agger, Slate “Is Google making us stupid?” When Nicholas Carr posed that question, in a celebrated Atlantic Monthly cover story, he tapped into a well of anxiety about how the Internet is changing us. He also crystallized one of the most important debates of our time: As we enjoy the Net’s bounties, are we sacrificing our ability to read and think deeply? Now, Carr expands his argument into the most compelling exploration of the Internet’s intellectual and cultural consequences yet published. As he describes how human thought has been shaped through the centuries by “tools of the mind”—from the alphabet to maps, to the printing press, the clock, and the computer—Carr interweaves a fascinating account of recent discoveries in neuroscience by such pioneers as Michael Merzenich and Eric Kandel. Our brains, the historical and scientific evidence reveals, change in response to our experiences. The technologies we use to find, store, and share information can literally reroute our neural pathways. Building on the insights of thinkers from Plato to McLuhan, Carr makes a convincing case that every information technology carries an intellectual ethic—a set of assumptions about the nature of knowledge and intelligence. He explains how the printed book served to focus our attention, promoting deep and creative thought. In stark contrast, the Internet encourages the rapid, distracted sampling of small bits of information from many sources. Its ethic is that of the industrialist, an ethic of speed and efficiency, of optimized production and consumption—and now the Net is remaking us in its own image. We are becoming ever more adept at scanning and skimming, but what we are losing is our capacity for concentration, contemplation, and reflection. Part intellectual history, part popular science, and part cultural criticism, *The Shallows* sparkles with memorable vignettes—Friedrich Nietzsche wrestling with a typewriter, Sigmund Freud dissecting the brains of sea creatures, Nathaniel Hawthorne contemplating the thunderous approach of a steam locomotive—even as it plumbs profound questions about the state of our modern psyche. This is a book that will forever alter the way we think about media and our minds.
