**Lucid** Gardner Eeden, 2017-06-14 *Lucid: Awake in the World and the Dream* is a primer for the evolution of human consciousness. A biconscious writer, Gardner Eeden, lays the groundwork for how to live simultaneously in the world and the dream world, relating his unique experience as well as dissecting the current scientific and spiritual notions of what dreams are. This is a provocative, often irreverent work that blends fiction, science, real experience and metaphysical ideas that will guide readers to new possibilities in their own consciousness and will have readers wondering what they are truly capable of in the world and the dream.

**Spirit Tech** Wesley J. Wildman, Ph.D., Kate J. Stockly, Ph.D., 2021-05-18 Featuring a Foreword by Mikey Siegel, founder of Consciousness Hacking. Technology can now control the spiritual experience. This is a journey through the high-tech aids for psychological growth that are changing our world, while exploring the safety, authenticity and ethics of this new world. We already rely on technology to manage our health, sleep, relationships, and finances, so it's no surprise that we're turning to technological aids for the spiritual journey. From apps that help us pray or meditate, to cybernauts seeking the fast track to nirvana through magnetic brain stimulation, we are on the brink of the most transformative revolution in the practice of religion: an era in which we harness the power of "spirit tech" to deepen our experience of the divine. Spirit tech products are rapidly improving in sophistication and power, and ordinary people need a trustworthy guide. Through their own research and insiders' access to the top innovators and early adopters, Wesley J. Wildman and Kate J. Stockly take you deep inside an evolving world: - Find out how increasingly popular "wearables" work on your brain, promising a shortcut to transformative meditative states. - Meet the inventor of the "God Helmet" who developed a tool to increase psychic skills, and overcome fear, sadness, and anger. - Visit churches that use ayahuasca as their sacrament and explore the booming industry of psychedelic tourism. - Journey to a mansion in the heart of Silicon Valley where a group of scientists and entrepreneurs are working feverishly to bring brain-based spirit tech applications to the masses. - Discover a research team who achieved brain-to-brain communication between individuals thousands of miles apart, harnessing neurofeedback techniques to sync and share emotions among group members. Spirit Tech offers readers a compelling glimpse into the future and is the definitive guide to the fascinating world of new innovations for personal transformation, spiritual growth, and pushing the boundaries of human nature.

**Finally Focused** James Greenblatt, M.D., Bill Gottlieb, CHC, 2017-05-09 *DISCOVER THE ADHD SOLUTION FOR YOUR CHILD* Dr. James Greenblatt has seen thousands of children and adults struggling with the symptoms of ADHD – hyperactivity, inattentiveness, impulsiveness, and often irritability and combativeness. Rather than simply prescribing medication for their ADHD symptoms, he tailors remedies to his patients' individual needs, detecting and treating the underlying causes of the disorder. Finally Focused provides proven natural and medical methods to easily treat problems such as nutritional deficiencies or excesses, dysbiosis (a microbial imbalance inside the body), sleeping difficulties, and food allergies, all of which surprisingly can cause or worsen the symptoms of ADHD. Using Dr. Greenblatt's effective Plus-Minus Healing Plan, parents will first understand the reasons

behind their child's symptoms, and then be able to eliminate them by addressing the child's unique pattern of biological weakness. Adults with ADHD can do the same for themselves. And if conventional medication is still necessary, this integrative approach will minimize or even eliminate troublesome side effects. Using Dr. Greenblatt's expert advice, millions of children and adults with ADHD finally will get the help they need to achieve true wellness.

*Mega Brain* Michael Hutchinson, 1996-09 Scientists have learned more about the brain in the last decade than in all of previous history, and the implications of the latest research are clear: The human brain is far more powerful, and has the potential for immensely greater growth and transformation, than was ever before imagined. These discoveries may constitute the most significant development in learning since the invention of writing. Michael Hutchison captures all the drama, excitement, and adventure as we finally begin to comprehend the most mysterious and complex structure in the universe, the source of human culture, a still untapped reservoir of power and skills. He looks at the recently developed machines and devices that may soon allow us to increase brain size and intelligence; regenerate brain cells; trigger specific brain states such as euphoria, long- and short-term memory, sexual excitement, and creativity; and control the brain's electrical activity in order to alter such involuntary mechanisms as blood pressure, heart rate, and the secretion of hormones. Megabrain is a lucid and lively account of where the pioneers in brain research are headed - and where they are taking us.

The Enchanted Time Traveller Mal Mohanlal,2012

Mind Wars Marie D. Jones,Larry Flaxman,2015-04-20 From the dawn of humanity, the desire to control the thoughts, behaviors, and actions of others has been a pervasive one. From the use of coercive persuasion by ancient Egyptians and the Knights Templar to today's claims of electronic harassment and microwave "bombing," we have always been at the mercy of those who wish to reprogram our thoughts and reshape our beliefs. *Mind Wars* includes fascinating stories of: Ancient attempts at mind control using spell casting, potions, and rituals. Cults and the use of mental reprogramming. More modern mind-control techniques, from hypnosis, drugs, and electroshock to radiation and psychic driving. The inside story of the quest for a real Manchurian Candidate-MKUltra and the CIA connection. The brave new world of electronic harassment, "voice to skull" technology, and gang-stalking. The inner frontier of the human mind is the last bastion of privacy. But are we really in control of our own minds? The answer may shock you!

Dreaming: A Very Short Introduction J. Allan Hobson,2005-04-21 What is dreaming, and what causes it? Why are dreams so strange and why are they so hard to remember? Replacing dream mystique with modern dream science, J. Allan Hobson provides a new and increasingly complete picture of how dreaming is created by the brain. Focusing on dreaming to explain the mechanisms of sleep, this book explores how the new science of dreaming is affecting theories in psychoanalysis, and how it is helping our understanding of the causes of mental illness. J. Allan Hobson investigates his own dreams to illustrate and explain some of the fascinating discoveries of modern sleep science, while challenging some of the traditionally accepted theories about the meaning of dreams. He reveals how dreaming maintains and develops the mind, why we go crazy in our dreams in order to avoid doing so when we are awake, and why sleep is not just good for health but essential for life. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Dream a Lottery Win Tonight** Larry Vingelman, 2013-10-27 When I host book signings and give lectures on lottery prediction, people always ask, If lotteries are random draws, how can they be predicted? I always answer the same way. Lotteries are predictable because we have the ability to redirect subtle energy. With about 20 to 30 people present, I always ask how many are familiar with subtle energies. No one has ever raised their hand. And, why should they! It's only been within the last 30 to 40 years that Science discovered subtle energies and their role in manifesting human desire. It's only been within the last 10 years that this research and experimentation has been available to the general public in books like Lynne McTaggart's *The Intention Experiment* or Dr. Tiller's *Conscious Acts of Creation*. As a matter of fact, it has only been this year (2013) that Dr. Peter Higgs won the Nobel Prize for his work on the God Particle. The first subtle energy particle ever found at the new CERN accelerator. With these discoveries and experiments on the redirection of subtle energy, Scientists believe that a new technology has been born. Significantly more powerful than electromagnetic energy, significantly more powerful than nuclear energy, subtle energy technology

will bring about new ways for human populations to interact, and new ways to communicate. It will significantly change our health care industry and influence the movement towards world peace. Most interesting, are the time and space attributes of subtle energy that allow the human mind to predict the future and consequently win lotteries. In the science of Quantum Mechanics, experimenting at the level of subtle energy, scientists found that their observations were affecting the outcome of the experiments. Somehow, the experimenter's consciousness was having an effect on our everyday reality of atoms and elements. This led to other experiments many concerning time displacement. As it turns out, subtle energy does not conform to the way you and I experience sequential time. Subtle energy is unbound by time and space - giving it predictive potential. A few daring researchers now understand subtle energy to be a vast field of potential energy supporting our everyday reality and somehow this energy is intimately interconnected with our minds. Consequently, at this stage of subtle energy technology research, researchers are studying ways that the mind can amplify subtle energies to manifest human desires for better health, wealth and abundance, world peace, lasting vitality, and prophetic vision. Dream a Lottery Win Tonight, specializes in the application of subtle energy and its prophetic vision attributes. We accomplish this by activating an energized intention near the mind's source of subtle energy. In this way, we amplify the intention to win a lottery. Of course, we could amplify any intention including those for better health or world peace. We decided on lottery prediction not because it was easy but because it was difficult and because the results are quantitative not subjective. In developing the skill of prophetic vision to win a lottery, we use an energized intention activated as close to the mind's Source of subtle energy as possible. To get close to the Source, we use mantras. These mantras resonate frequencies that are specific to the results we seek. In this case, we use the Lakshmi Mantra, used since antiquity to enhance ones abilities at games of chance. Once close to the source, we activate an energized intention. The intention is energized with emotion and bright sense visualizations. We perform this meditation just before retiring enhancing our dreams allowing us to predict a winning number. In this way, we use subtle energies to win the lottery. Larry Vingelman Author

*The High-Performance Mind* Anna Wise, 1997-01-27 Her purpose here is to discuss and illustrate the four types of brain waves—beta, alpha, theta, and delta—with emphasis on what they do, how they work together, and whether we can use their power.—Booklist.

**Brain Art** Anton Nijholt, 2019-05-25 This is the first book on brain-computer interfaces (BCI) that aims to explain how these BCI interfaces can be used for artistic goals. Devices that measure changes in brain activity in various regions of our brain are available and they make it possible to investigate how brain activity is related to experiencing and creating art. Brain activity can also be monitored in order to find out about the affective state of a performer or bystander and use this knowledge to create or adapt an interactive multi-sensorial (audio, visual, tactile) piece of art. Making use of the measured affective state is just one of the possible ways to use BCI for artistic expression. We can also stimulate brain activity. It can be evoked externally by exposing our brain to external events, whether they are visual, auditory, or tactile. Knowing about the stimuli and the effect on the brain makes it possible to translate such external stimuli to decisions and

commands that help to design, implement, or adapt an artistic performance, or interactive installation. Stimulating brain activity can also be done internally. Brain activity can be voluntarily manipulated and changes can be translated into computer commands to realize an artistic vision. The chapters in this book have been written by researchers in human-computer interaction, brain-computer interaction, neuroscience, psychology and social sciences, often in cooperation with artists using BCI in their work. It is the perfect book for those seeking to learn about brain-computer interfaces used for artistic applications.
