Making Sense of Brain Games Apar S. Maniar,2010 Brain games have emerged as a new segment of games within serious games, over the last few years there is some research being done as to whether they are effective. This project aims to analyze current brain games from a game design perspective to find out whether they are good games. The research involved analyzing games from the four different brain domains of Attention, Visual Spatial, Memory and Language processing by characterizing them for the different forms of fun, and whether individual elements within the games such as sound effects, music, non-playing characters, fonts etc. were plain or pleasing. Using quantitative analysis we analyzed 33 randomly selected individual and brain fitness company brain games. Any casual observer who has tried some of these games has probably noticed that brain games tend to offer much less engaging game play than a typical successful online casual game. They appear not to be fun enough to attract players unless the player is overly concerned about brain fitness. In fairness, serious games are not expected to be as fun or as well designed as high budget blockbuster commercial games and we wanted to test that hypothesis and provide a systematic analysis of the brain games in the market.

Connect-D3 in a Row Claude Ziad El-Bayeh,2020-05-04 Why Brain Games? Brain games and brain teasers have captivated the attention of millions of people around the world from different ages and backgrounds throughout history. These kinds of games are not only fun and entertaining for the readers, but also help them to increase their intelligence, and develop their problem-solving skills, logic, attention, accuracy, memory, focus, analysis, computational speed, strategy, etc. Brain games and brain teasers sometimes can replace the traditional education system in which people can learn the same information but enjoyably in the form of a game. For example, mathematical calculations and multiplication tables are learned at schools. However, students don't like to memorize or to study them. Hence, to incite the students to learn and memorize the multiplication table, new games were created in a way to do the main job amusingly and enjoyably. Why this book, and why a new brain game? There are lots of new brain games that are created every year. Some of them are designed for a particular purpose, while others

are just for fun. Nowadays, most of the brain games appear in the form of computer software or mobile application. However, there are lots of people who prefer to have the game in the form of a book. The book format does not allow competition between many players. The main goal of this book is to let the player compete with other players using a book and not an online application. Hence, the game should be designed to allow multi-players and to create a competitive environment with his friends and family. What is new in this book? In this book, Connect-D3 in a Row is a new brain game created by the author, which somehow looks similar to Connect 4. However, instead of a rectangular shape, a diamond shape is used, and new rules are developed. Hence, the game becomes more complex and challenging. In addition, different grid sizes are presented to raise difficulty levels. This book includes 500 Puzzles. The first section is designed for only 2 players, while the second is suitable for 3 players. Finally, the last one is for 4 players. The book starts with the easiest levels and ends with the hardest and most challenging levels. The game is formed by a grid that contains at least one filled box with a JOKER, which can be used by players to complete the formation of a straight line, while Connect 4 does not have any filled boxes. This new variation creates additional challenges for players. Therefore, new strategies and methods should be developed to win the game. People who love brain games and social games and who want to improve their intelligence, concentration, memory, reflection speed, etc., are invited to try this new game and provide their comments and suggestions to the author. LET'S TRY SOMETHING NEW AND CHALLENGING!!!

Winning the Brain Game: Fixing the 7 Fatal Flaws of Thinking Matthew E. May, 2016-05-27 Mindful thinking is the new competitive edge Science confirms the distinction between the biological brain and the conscious mind. Each day, a game of mind versus matter plays out on a field defined by the problems we must solve. Most are routine, and don't demand a more mindful approach. It's when we're faced with more difficult challenges that our thinking becomes vulnerable to brain patterns that can lead us astray. We leap to solutions that simply don't work. We fixate on old mindsets that keep us stuck in neutral. We overthink problems and make them worse. We kill the ideas of others, as well as our own. Worse, we keep doing these things, over and over again, naturally and instinctively. But it doesn't have to be that way. In Winning the Brain Game, author and creative strategist Matthew E. May explains these and other "fatal flaws" of thinking, catalogued over the course of ten years and hundreds of interactive creative sessions in which he gave more than 100,000 professionals a thought challenge based on a real case far less complex than their everyday problems. Not only did less than 5% arrive at the best and most elegant solution, but the solutions given were remarkably similar, revealing seven observable problem-solving patterns that can block our best thinking. Calling on modern neuroscience and psychology to help explain the seven fatal flaws, May draws insights from some of the world's most innovative thinkers. He then blends in a super-curated, field-tested set of "fixes" proven through hundreds of creative sessions to raise our thinking game to a more mindful level. Regardless of playing field, mindful thinking is the new competitive advantage, and the seven fixes are a magic set of tools for achieving it. Winning the Brain Game will lead you to better decision-making, higher levels of creativity, clearer strategies, and overall success in business, work and life. Matthew E. May is a five-time author and recognized thought leader on strategy and innovation. A popular speaker, facilitator, and seminar leader, he confidentially coaches executives, artists, and athletes, and conducts custom thinking sessions for leading organizations all over the world.
