The South's Forgotten Fire-Eater Chris McIlwain, 2020-12-05

The story of the American Civil War is typically told with particular interest in the national players behind the war: Davis, Lincoln, Lee, Grant, and their peers. However, the truth is that countless

Americans on both sides of the war worked in their own communities to sway public perception of abolition, secession, and government intervention. In north Alabama, David Hubbard was an ardent and influential voice for leaving the Union, spreading his increasingly radical view of states' rights and the need to rebel against what he viewed an overreaching federal government. You have likely never heard of Hubbard, the grandson of a Revolutionary War soldier who fought under Andrew Jackson in the War of 1812. He was much more than that stereotype of antebellum Alabama politicians, being an early speculator in lands coerced from Native Americans; a lawyer and cotton planter; a populist; an influential member of the Board of Trustees of the University of Alabama; and a key promoter of the very first railroad built west of the Allegheny mountains. Alabama's Forgotten Fire Eater is the story of Hubbard's radicalization, describing his rise to becoming the most influential and prominent secessionist in north Alabama. Despite growing historical interest in the fire eaters who whipped the South into a frenzy, there has been little mention until now of Hubbard's integral involvement in Alabama's relationship with the Confederacy. Now historian Chris McIlwain offers Hubbard's story as a cautionary tale of radical politics and its

consequences.

The Monk's Cell Paula Pryce, 2017-11-22 The call to contemplative Christianity is not an easy one. Those who answer it set themselves to the arduous task of self-reformation through rigorous study and practice, learned through the teachings of monks and nuns and the writings of ancient Christian mystics, often in isolation from family and friends. Those who are dedicated can spend hours every day in meditation, prayer, liturgy, and study. Why do they come? Indeed, how do they find their way to the door at all? Based on nearly four years of research among semi-cloistered Christian monastics and a dispersed network of non-monastic Christian contemplatives across the United States and around the globe, The Monk's Cell shows how religious practitioners in both settings combined social action and intentional living with intellectual study and intensive contemplative practices in an effort to modify their ways of knowing, sensing, and experiencing the world. Organized by the metaphor of a seeker journeying towards the inner chambers of a monastic chapel, The Monk's Cell uses innovative intersubjective fieldwork methods to study these opaque, interiorized, often silent communities, in order to show how practices like solitude, chant, contemplation, attention,

and a paradoxical capacity to combine ritual with intentional unknowing develop and hone a powerful sense of communion with the world.
