*Football and Risk* Jan Andre Lee Ludvigsen,2022-06-27 This is the first book to look closely at the concept of 'risk' in elite and professional football from a social scientific perspective. Drawing on the wider sociological, criminological and management literature on risk, it shows how football helps us to understand global risk more generally in present-day society. The book explores how attitudes to risk have shaped the modern football business, and identifies those risks that pose a threat to the sustainability of football in the future. It draws upon the work of theorists including Ulrich Beck, Anthony Giddens and Michel Foucault, as well as digital media sources and policy documents, and covers a range of topics, cases and themes including political, environmental and terrorism risks, technologies, the governance of fans and risk resistance. In the context of the social, globalized and commercialized realm of football, as well as a global pandemic that has had a profound influence on attitudes to risk, the book argues that modern societies' preoccupation with risk has transformed the ways in which modern football is played on the pitch, organized off the pitch, covered in the media and attended by fans. Including an extended case study of the 2026 World Cup, to be held in the USA, Mexico and Canada, this is a thought-provoking read for any student, researcher or policy-maker with an interest in football, sport, events, sociology, criminology or risk management.

*The Business of the FIFA World Cup* Simon Chadwick,Paul Widdop,Christos Anagnostopoulos,Daniel Parnell,2022-04-08 The FIFA World Cup is arguably the biggest sporting event on earth. This book is the first to focus on the business and management of the World Cup, taking the reader from the initial stages of bidding and hosting decisions, through planning and organisation, to the eventual legacies of the competition. The book introduces the global context in which the World Cup takes place, surveying the history and evolution of the tournament and the geopolitical background against which bidding and hosting decisions take place. It examines all the key issues and debates which surround the tournament, from governance and corruption to security and the media, and looks closely at the technical processes that create the event, from planning and finance to marketing and fan engagement. Analysis of the Women's World Cup is also embedded in every chapter, and the book also considers the significance of World Cup tournaments at age-group level. No sport business or management course is complete without some discussion of the FIFA World Cup, so this book is essential reading for any student, researcher or sport business professional looking to fully understand global sport business today.

*You Don't Have to Carry It All* Paula Faris,2023-03-07 Award-winning journalist and mom-of-three Paula Faris gives insightful and practical steps for better working, momming, and living to millions of overwhelmed working moms. In Paula Faris's most important reporting yet, *You Don't Have to Carry It All* reveals a game plan that will not only make being a working mom work but will also reveal how and why society needs to value mothers first. Weaving together groundbreaking research with inspirational wisdom, she: recognizes the history of working moms in America and its lasting impact today, shows how motherhood has scientifically improved the minds and capabilities of women, encourages moms to link arms, not only with each other but also with men, and proves why corporate America is better with moms at

the helm. After interviewing countless experts, thought leaders and mothers, Faris believes we can join together to create a path forward for ditching the mom guilt, ending burnout, and finally giving working moms the support they so desperately need. Because with working moms on the job, there are literally no hands more capable of creating the change we need!

*Permanent Distortion* Nomi Prins, 2022-10-11 A riveting exposé of a permanent financial dystopia, its causes, and real-world consequences It is abundantly clear that our world is divided into two very different economies. The real one, for the average worker, is based on productivity and results. It behaves according to traditional rules of money and economics. The other doesn't. It is the product of years of loose money, poured by central banks into a system dominated by financial titans. It is powerful enough to send stock markets higher even in the face of a global pandemic and threats of nuclear war. This parting from reality has its roots in an emergency response to the financial crisis of 2008. "Quantitative Easing" injected a vast amount of cash into the economy—especially if you were a major Wall Street bank. What began as a short-term dependency became a habit, then a compulsion, and finally an addiction. Nomi Prins relentlessly exposes a world fractured by policies crafted by the largest financial institutions, led by the Federal Reserve, that have supercharged the financial system while selling out regular citizens and leading to social and political reckonings. She uncovers a newly polarized world of the mega rich versus the never rich, the winners and losers of an unprecedented distortion that can never return to "normal."

**European Football and Collective Memory** W. Pyta, N. Havemann, 2015-03-25 Is it possible for football matches or players to help forge a collective European identity? Pyta and Haverman seek to answer this question through a detailed analysis of how football is remembered across the continent. *European Football and Collective Memory* is the first book to deal with collective memory of football on a continental scale.

**Intersectionality** Patricia Hill Collins, Sirma Bilge, 2020-04-17 The concept of intersectionality has become a central topic in academic and activist circles alike. But what exactly does it mean, and why has it emerged as such a vital lens through which to explore how social inequalities of race, class, gender, sexuality, age, ability, and ethnicity shape one another? In this fully revised and expanded second edition of their popular text, Patricia Hill Collins and Sirma Bilge provide a much-needed introduction to the field of intersectional knowledge and praxis. Analyzing the emergence, growth, and contours of the concept of intersectionality, the authors also consider its global reach through an array of new topics such as the rise of far-right populism, reproductive justice, climate change, and digital environments and cultures. Accessibly written and drawing on a plethora of lively examples to illustrate its arguments, the book highlights intersectionality's potential for understanding complex architecture of social and economic inequalities and bringing about social justice-oriented change. Intersectionality will be an invaluable resource for anyone grappling with the main ideas, debates, and new directions in this field.

**Countdown to 2023: WHO report on global trans fat elimination 2021**, 2021-12-07 The annual progress report monitors global progress towards the 2023 target for global elimination of industrially produced trans-fatty acids (TFA), highlighting achievements from the past year; and discusses challenges and opportunities for future action. This is the third progress report that WHO is publishing following the first and second reports which were published in 2019 and 2020. In 2018, WHO called for the global elimination of industrially produced TFA by 2023. Since then, countries are responding to this call to action, building global momentum around TFA elimination.

**Colonial Policing and the Transnational Legacy** Conor O'Reilly, 2017-08-15 This compilation represents the first study to examine the historical evolution and shifting global dynamics of policing across the Lusophone community. With contributions from a multi-disciplinary range of experts, it traces the role of policing within and across settings that are connected by the shared legacy of Portuguese colonialism. Previously neglected within studies of the globalisation of policing, the Lusophone experience brings novel insights to established analyses of colonial, post-colonial and transnational policing. This compilation draws research attention to the policing peculiarities of the Lusophone community. It proposes new cultural settings within which to test dominant theories of policing research. It uncovers an important piece of the jigsaw that is policing across the globe. Key research questions that it addresses include: • What were the patterns of policing, and policing transfers, across Portuguese colonial settings? • How did Portugal's dual status as both fascist regime and imperial power shape its late colonial policing? • What have been the different experiences of post-colonial and transitional policing across the former Portuguese colonies? • In what ways are Lusophone nations contributing to, and indeed shaping, patterns of transnational policing? • What comparative lessons can be drawn from the Lusophone policing experience?

**Air Transport Security** Joseph S. Szyliowicz, Luca Zamparini, 2018-08-31 The growing number of terrorist attacks throughout the world continues to turn the interest of scholars and governments towards security issues. As part of the Comparative Perspectives on Transportation Security series, this book provides a multidisciplinary analysis of the security challenges confronting air transportation. The first part encompasses the industry's characteristics and the policy, economic and regulatory issues shaping the security environment. The second provides a comparative analysis of security policies and practices in several key countries.

**Intersecționalitate** Patricia Hill Collins, Sirma Bilge, Anca-Simina Martin, 2021-11-15 Collins și Bilge nu ne lasă nicio secundă să uităm că, în ciuda neliniștii în legătură cu ceea ce este intersecționalitatea, de unde vine și ce poate sau nu să facă, ea este despre justiția socială. Această carte e o contribuție remarcabilă a două dintre cele mai importante figuri ale câmpului. (Patrick R. Grzanka, University of Maryland) Patricia Hill Collins

și Sirma Bilge oferă un cadru bogat și nuanțat pentru înțelegerea semnificațiilor intersecționalității și de ce aceasta este atât de relevantă în abordarea problemelor de justiție socială ale acestor timpuri. (Barbara Smith, co-fondatoare Combahee River Collective) O introducere edificatoare și accesibilă în intersecționalitate, care observă tensiunile creative dintre cercetarea academică și practica politică. **The Politics of Presidential Term Limits** Alexander Baturo, Robert Elgie, 2019-06-20 Presidential term limits restrict the maximum length of time that presidents can serve in office. They stipulate the length of term the presidents can serve between elections and the number of terms that presidents are permitted to serve. While comparative scholarship has long studied important institutions such as presidentialism vs. parliamentarism and the effects of different electoral systems, we lack a comprehensive understanding of the role and effects of presidential term limits. Yet presidential term limits and term lengths are one of the most fundamental institutions of democracy. By ensuring compulsory rotation in office, they are at the heart of a democratic dilemma. What is the appropriate trade-off between allowing the unrestricted selection of candidates at presidential elections vs. restricting selection procedures to prevent the possibility of dictatorial takeover by presidents who are unwilling to step down? In the context of a long and on-going history of changes to presidential term limits and the many and varied ways in which term limits have been both applied and avoided, this book explains the factors behind the introduction, stability, abolition, and avoidance of presidential term limits, as well as the consequences of changes to presidential term limits, and it does so in the context of non-democracies, third-wave countries, and consolidated democracies. It includes comparative, theoretical, and practitioner-oriented chapters, as well as detailed country case studies of presidential term limits across the world and over time.

**Alpha Bravo Brazil** Lucélio Ferreira Martins Faria França, 2021-11-16 In Brazil, what is known as Criminal Faction, a term used in academic and journalistic circles that has no particular definition, does not correspond to what is understood as Criminal Organization. This notion comes from the Palermo Convention and offers the Italian perspective on an issue related to mafia groups. It also reflects that we try to find in other countries solutions to issues that we alone have and Brazilians' low-self-reliance dilemmas, which the playwright and writer Nelson Rodrigues referred to as the mongrel complex. This work, written by personnel of the police and the Public Prosecutor's Office, is a collection of studies conducted in Brazil that use Comparative Law to answer pressing national issues. It offers a new and fresh look at Public Safety and Police Science matters without being parochial or seeking for extraneous solutions.
