Pink Ribbons, Inc. Samantha King, 2008-05-19 "Samantha King explains how, beyond being an all-too-frequent and still-too-lethal disease for many women, breast cancer is a corporate dream come true." —Herizons "Fascinating. King's deft and thoughtful interpretation of the pink ribbon phenomenon is an important wake-up call. Going against the grain, she takes a clear-eyed look at a trend that often seems to outshine the disease that put it on the map." —Women's Review of Books "King's criticisms of breast-cancer philanthropy provide a new means of looking at one of our culture's most celebrated causes. For anyone who has ever squirreled away yogurt lids for the cause, Pink Ribbons, Inc. is food for thought." —Bitch "A fascinating read for anyone whose life has been touched by breast cancer." —Curve "Breast cancer advocacy is being transformed from meaningful civic participation into purchasing products. To understand the personal, social, and political costs, read this book." —Barbara Brenner, Executive Director of Breast Cancer Action In Pink Ribbons, Inc., Samantha King traces how breast cancer has been transformed from a stigmatized disease and individual tragedy to a market-driven industry of survivorship. Here, for the first time, King questions the effectiveness and legitimacy of privately funded efforts to stop the epidemic among American women. Highly revelatory-at times shocking-Pink Ribbons, Inc. challenges the commercialization of the breast cancer movement. Samantha King is associate professor of physical and health education and women's studies at Queen's University, in Kingston, Ontario

So Much to Be Done Barbara Brenner, 2016-05-03 “What kind of cancer is it?” was the first question Barbara Brenner asked her doctor after hearing that the lump in her breast was malignant. His answer: “You don't need to know that.” Wrong response. Brenner, who was already an activist, made knowing her business and spreading knowledge her mission. The power behind Breast Cancer Action and its transformative Think Before You Pink® campaign, Barbara Brenner brought an abundance of wit, courage, and clarity to the cause and forever changed the conversation. What had been construed as an individual crisis could now be seen for what it was: a pressing concern of public health and social justice, with environmental issues at the center of prevention efforts. Collected in *So Much to Be Done*, and framed by personal accounts of Barbara and her influential work, Brenner’s columns and blog posts form a chronicle of breast cancer research and health care activism that is as inspiring as it is informative. As she takes on the corporate forces at work in breast cancer research and treatment and in the “pinkwashing” of fund-raising for the cause, Brenner, a self-described hell-raiser, contends with cancer herself, twice, and her words offer understanding and encouragement to all those whose lives are touched by the disease. When Brenner was diagnosed with ALS in 2011, she broadened her critique of health care while also writing about her own experience. Infused with her characteristic moxie, humor, anger, and compassion, these reflections from her last two years provide an in-depth, precisely observed portrayal of what it is to live with a terminal disease and to die on one’s own terms.

Breast Cancer Umberto Veronesi,Aron Goldhirsch,Paolo Veronesi,Oreste Davide Gentilini,Maria Cristina Leonardi,2017-11-03 This book provides the reader with up-to-date information on important advances in the understanding of breast cancer and innovative approaches to its management. Current and emerging perspectives on genetics, biology, and prevention are first discussed in depth, and individual sections are then devoted to pathology, imaging, oncological surgery, plastic and reconstructive surgery, medical oncology, and radiotherapy. In each case the focus is on the most recent progress and/or state of the art therapies and techniques. Further topics to receive detailed consideration include particular conditions requiring multidisciplinary approaches, the investigation of new drugs and immunological agents, lifestyle and psychological aspects, and biostatistics and informatics. The book will be an excellent reference for practitioners, interns and residents in medical oncology, oncologic surgery, radiotherapy, pathology, and human genetics, researchers, and advanced medical students.

WHO List of Priority Medical Devices for Cancer Management World Health Organization,2017-05-09 This is the model list and clearing house of appropriate, basic, and priority medical devices based on the list of clinical interventions selected from clinical guidelines on prevention, screening, diagnosis, treatment, palliative care, monitoring, and end of life care. This publication addresses medical devices that can be used for the management of cancer and specifically describes medical devices for six types of cancer: breast, cervical, colorectal, leukemia, lung, and prostate. This book is intended for ministries of health, public health planners, health technology managers, disease

management, researchers, policy makers, funding, and procurement agencies and support and advocacy groups for cancer patients.

From Pink to Green Barbara L. Ley, 2009-06-29 From the early 1980s, the U.S. environmental breast cancer movement has championed the goal of eradicating the disease by emphasizing the importance of reducing—even eliminating exposure to chemicals and toxins. From Pink to Green chronicles the movement's disease prevention philosophy from the beginning. Challenging the broader cultural milieu of pink ribbon symbolism and breast cancer awareness campaigns, this movement has grown from a handful of community-based organizations into a national entity, shaping the cultural, political, and public health landscape. Much of the activists' everyday work revolves around describing how the so called cancer industry downplays possible environmental links to protect their political and economic interests and they demand that the public play a role in scientific, policy, and public health decision-making to build a new framework of breast cancer prevention. From Pink to Green successfully explores the intersection between breast cancer activism and the environmental health sciences, incorporating public and scientific debates as well as policy implications to public health and environmental agendas.

Pink Ribbon Blues Gayle A. Sulik, 2010-10-28 Medical sociologist Gayle A. Sulik reveals the hidden costs of the pink ribbon as an industry, one in which breast cancer functions as a

brand name with a pink ribbon logo. Based on historical and ethnographic research, analysis of awareness campaigns and advertisements, and hundreds of interviews, *Pink Ribbon Blues* shows that while millions walk, run, and purchase products for a cure, cancer rates continue to rise, industry thrives, and breast cancer is stigmatized anew for those who reject the pink ribbon model. Even as Sulik points out the flaws of pink ribbon culture, she outlines the positives and offers alternatives. The paperback includes a new Introduction investigating Susan G. Komen for the Cure and a color insert with images of, and reactions to, the pinking of breast cancer.

Breast Cancer Awareness Betty Palmer, 2023-10-19 Breast cancer stands as an enduring and formidable global health challenge, affecting the lives of millions worldwide. It is a disease that knows no boundaries; while predominantly associated with women, it can strike individuals of any gender. In the face of this pervasive health concern, understanding and awareness are our most potent weapons. This book, *Breast Cancer Awareness: A Comprehensive Guide*, is designed to illuminate the path toward knowledge, empathy, and empowerment. Chapter 1 initiates our journey, unfurling the intricate tapestry of breast cancer, exploring its risk factors, and highlighting the profound significance of early detection. We delve into the complex terrain of breast cancer, examining its various forms, and thus setting the stage for the subsequent chapters. Chapter 2 delves into the emotional and physical odyssey that accompanies a breast cancer diagnosis. This chapter takes readers through the diagnostic process, emphasising the importance of communication between patients and healthcare providers. Chapter 3 equips readers with a deep understanding of breast cancer treatment options. From surgery to chemotherapy, we explore the choices and decision-

making processes, advocating for an informed and collaborative approach to treatment. Chapter 4 is a guide through the turbulent waters of coping with breast cancer treatment. It addresses the physical and emotional challenges patients face, empowering them with strategies to navigate this arduous journey. Chapter 5 is a glimpse into survivorship and life beyond breast cancer. It acknowledges that survivorship is a new phase of life, bringing its own set of challenges and opportunities, and underscores the importance of post-treatment follow-up care. Chapter 6 embarks on the realm of breast cancer advocacy and the journey towards a cure. It inspires readers to become advocates for change, support research initiatives, and strive for a world where breast cancer no longer poses a significant threat. As we embark on this journey, we invite you to explore the pages of this book with an open heart and mind. Breast cancer awareness is more than a buzzword; it's a call to action. It's a call for knowledge, empathy, and support for those affected by this disease.

A Breast Cancer Alphabet Madhulika Sikka, 2014-02-25 A definitive and approachable guide to life during, and after, breast cancer The biggest risk factor for breast cancer is simply being a woman. Madhulika Sikka's *A Breast Cancer Alphabet* offers a new way to live with and plan past the hardest diagnosis that most women will ever receive: a personal, practical, and deeply informative look at the road from diagnosis to treatment and beyond. What Madhulika Sikka didn't foresee when initially diagnosed, and what this book brings to life so vividly, are the unexpected and minute challenges that make navigating the world of breast cancer all the trickier. *A Breast Cancer Alphabet* is an inspired reaction to what started as a personal predicament. This A-Z guide to living with breast cancer goes where so many fear to tread: sex (S is for Sex - really?), sentimentality (J is for Journey - it's a cliché we need to dispense with), hair (H is for Hair - yes, you can make a federal case of it) and work (Q is for Quitting - there'll be days when you feel like it). She draws an

easy-to-follow, and quite memorable, map of her travels from breast cancer neophyte to seasoned veteran. As a prominent news executive, Madhulika had access to the most cutting edge data on the disease's reach and impact. At the same time, she craved the community of frank talk and personal insight that we rely on in life's toughest moments. This wonderfully inventive book navigates the world of science and story, bringing readers into Madhulika's mind and experience in a way that demystifies breast cancer and offers new hope for those living with it.

Meeting Psychosocial Needs of Women with Breast Cancer

National Research Council, Institute of Medicine, National Cancer Policy Board, 2004-04-12 In Meeting Psychosocial Needs of Women with Breast Cancer, the National Cancer Policy Board of the Institute of Medicine examines the psychosocial consequences of the cancer experience. The book focuses specifically on breast cancer in women because this group has the largest survivor population (over 2 million) and this disease is the most extensively studied cancer from the standpoint of psychosocial effects. The book characterizes the psychosocial consequences of a diagnosis of breast cancer, describes psychosocial services and how they are delivered, and evaluates their effectiveness. It assesses the status of professional education and training and applied clinical and health services research and proposes policies to improve the quality of care and quality of life for women with breast cancer and their families. Because cancer of the breast is likely a good model for cancer at other sites, recommendations for this cancer should be applicable to the psychosocial care provided generally to individuals with cancer. For breast cancer, and indeed probably for any cancer, the report finds that psychosocial services can provide significant benefits in quality of life and success in coping with serious and life-threatening disease for patients and their families.

The Breast Cancer Cookbook Mo Keshtgar,2015-09-10 Breast cancer is by far the most common cancer in women, affecting 1 in 8 women in the UK. It is now known that diet and lifestyle are significant risk factors in the development of the disease. Adopting a healthier diet can reduce the risk of getting breast cancer and improve the survival of patients who have been diagnosed. Breast cancer specialist Mo Keshtgar takes you through the risk factors and specific dietary associations with breast cancer, including phytoestrogens, fruit and vegetables, fats and dairy products. Advice on 'foods to avoid', 'foods to eat in moderation' and 'foods to eat more of' follows, with simple suggestions as to how to achieve these changes. The enticing collection of over 100 recipes covers breakfasts, soups, salads, fish and shellfish, poultry and meat, vegetarian dishes, treats and drinks. All the dishes have been specifically created to take in all the dietary considerations linked to breast cancer and the possible side effects of treatments.

Hiding Politics in Plain Sight Patricia Strach,2016 As late as the 1980s, breast cancer was a stigmatized disease, so much so that local reporters avoided using the word breast in their stories and early breast cancer organizations steered clear of it in their names. But activists with business backgrounds began to partner with corporations for sponsored runs and cause-marketing

products, from which a portion of the proceeds would benefit breast cancer research. Branding breast cancer as pink--hopeful, positive, uncontroversial--on the products Americans see every day, these activists and corporations generated a pervasive understanding of breast cancer that is widely shared by the public and embraced by policymakers. Clearly, they have been successful: today, more Americans know that the pink ribbon is the symbol of breast cancer than know the name of the vice president. *Hiding Politics in Plain Sight* examines the costs of employing market mechanisms--especially cause marketing--as a strategy for change. Patricia Strach suggests that market mechanisms do more than raise awareness of issues or money to support charities: they also affect politics. She shows that market mechanisms, like corporate-sponsored walks or cause-marketing, shift issue definition away from the contentious processes in the political sphere to the market, where advertising campaigns portray complex issues along a single dimension with a simple solution: breast cancer research will find a cure and Americans can participate easily by purchasing specially-marked products. This market competition privileges even more specialized actors with connections to business. As well, cooperative market activism fundamentally alters the public sphere by importing processes, values, and biases of market-based action into politics. Market activism does not just bring social concerns into market transactions, it also brings market biases into public policymaking, which is inherently undemocratic. As a result, industry and key activists work cooperatively rather than contentiously, and they define issues as consensual rather than controversial, essentially hiding politics in plain sight.
