Mammography Saves Lives ,2015

Pink Ribbon Blues Gayle A. Sulik,2010-10-28

Medical sociologist Gayle A. Sulik reveals the hidden costs of the pink ribbon as an industry, one in which breast cancer functions as a brand name with a pink ribbon logo. Based on historical and ethnographic research, analysis of awareness campaigns and advertisements, and hundreds of interviews, *Pink Ribbon Blues* shows that while millions walk, run, and purchase products for a cure, cancer rates continue to rise, industry thrives, and breast cancer is stigmatized anew for those who reject the pink ribbon model. Even as Sulik points out the flaws of pink ribbon culture, she outlines the positives and offers alternatives. The paperback includes a new Introduction investigating Susan G. Komen for the Cure and a color insert with images of, and reactions to, the pinking of breast cancer.

Stop Breast Cancer Before it Starts Samuel S. Epstein MD,2014-02-18 With pink buckets of Kentucky Fried Chicken, I'm here for the boobs t-shirts and coffee cups, and a pink ribbon celebrity dunk tank on *The Ellen Degeneres Show*, a Mardi Gras culture has arisen around a deadly disease over the last decade. The highly marketed pink ribbon, criticized for being tied to pharmaceutical interests, presents breast cancer as normal and pretty in pink. Yet, the statistics of breast cancer remain the same. Expert on the preventative causes of cancer, Dr. Samuel S. Epstein has been watching the debates around breast cancer for more than four decades. He asks,

with all the talk about early detection, mammograms, improved treatment, and the race for the cure, why don't we ever hear about breast cancer prevention? Dr. Epstein knows the substantial research that has directly associated many factors of daily life with the development of the disease. The steps that can be taken to prevent it are often amazingly simple, but rarely make the headlines. Here, the evidence is presented and preventative choices are carefully and accessibly outlined. In presenting this critical information that all Americans should know about, Stop Breast Cancer Before it Starts empowers women to take charge of their health and make a real difference in the fight against cancer.

Cancer Care in Countries and Societies in Transition Michael Silbermann,2016-02-02 This is a rare compilation of clinically focused chapters on the practice of oncology in more than 25 countries and areas around the world that experience ongoing or intensifying ethnic, religious, and

nationalistic conflict. Each chapter is written by an internationally respected local physician or nurse. Topics include the relationship between local culture and the local practice of mainstream modern medicine, critical clinical issues faced by local physicians, and options for when and how to incorporate palliative care. The book ends with chapters on the United States' current initiatives on promoting cancer care training in these regions, and another on clinical concepts for Western clinicians undertaking oncology practice in emerging countries. The audience includes oncologists around the world: those practicing medicine in similarly extreme circumstances; Western oncologists organizing or preparing for medical missions; and Western oncologists who wish to learn from the experiences of oncologists who practice under radically different conditions.

From Whispers to Shouts Elaine

Schattner, 2023-03-07 It's hard today to remember how recently cancer was a silent killer, a dreaded disease about which people rarely spoke in public. In hospitals and doctors' offices, conversations about malignancy were hushed and hope was limited. In this deeply researched book, Elaine Schattner reveals a sea change—from before 1900 to the present day—in how ordinary people talk about cancer. *From Whispers to Shouts* examines public perception of cancer through stories in newspapers and magazines, social media, and popular culture. It probes the evolving relationship between journalists and medical specialists and illuminates the role of women and charities that distributed medical information. Schattner traces the origins of patient advocacy and activism from the 1920s onward, highlighting how, while doctors have lost control of messages about cancer, survivors have gained visibility and voice. The book's final section lays out provocative questions facing the cancer community today—including distrust of oncologists, concerns over financial burdens, and disparities in cancer treatments and care. Schattner considers how

patients and their loved ones struggle to make decisions amid conflicting information and opinions. She explores the ramifications of so much openness, good and bad, and asks: Has awareness backfired? Instead, Schattner contends, we need greater understanding of cancer's treatability.

Health Fair Resource Guide ,1986

Closing the Cancer Divide Felicia Marie Knaul,2012-12-17 Cancer has become a leading cause of death and disability and a serious yet unforeseen challenge to health systems in low- and middle-income countries. A protracted and polarized cancer transition is under way and fuels a concentration of preventable risk, illness, suffering, impoverishment from ill health, and death among poor populations. Closing this cancer divide is an equity imperative. The world faces a huge, unperceived cost of failure to take action that requires an immediate and large-scale global response. Closing the Cancer Divide presents strategies for innovation in delivery, pricing, procurement, finance, knowledge-building, and leadership that can be scaled up by applying a diagonal approach to health system strengthening. The chapters provide evidence-based recommendations for developing programs, local and global policy-making, and prioritizing research. The cases and frameworks provide a guide for developing responses to the challenge of cancer and other chronic illnesses. The book summarizes results of the Global Task Force on Expanding Access to Cancer Care and Control in Developing Countries, a collaboration among leaders from the

global health and cancer care communities worldwide, originally convened by Harvard University. It includes contributions from civil society, global and national policy-makers, patients and practitioners, and academics representing an array of fields.
