Being Sober Harry Haroutunian,2013-08-27 Featured on The Dr. Oz Show in Special Addiction Episode with Steven Tyler The disease of addiction affects 1 out of 10 people in the United States, and is a devastating—often, fatal—illness. Now, from the physician director of the renowned Betty Ford Center, comes a step-by-step plan with a realistic one-day-at-a-time approach to a disease that so often seems insurmountable. With a focus on reclaiming the power that comes from a life free of dependency, Being Sober walks readers through the many phases of addiction and recovery without judgment or the overly cultish language of traditional 12-step plans. It also addresses the latest face of this disease: the highly functioning addict, or someone who is still able to achieve personal and professional success even as they battle a drug or alcohol problem. Dr. Haroutunian tackles this provocative issue head-on, offering new insight into why you don't have to bottom out to get help. Dr. Haroutunian is himself a recovering alcoholic and knows firsthand the challenges of sobriety. His background and expertise in the field of alcohol and drug treatment give him a powerful edge and perspective that is unparalleled in his field. With a foreword written by Steven Tyler, Being Sober uses clear, straightforward language and offers a proven path toward an emotional sobriety and a rewarding new life based on gratitude, dignity, and self-respect.

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services,2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.
