*Bollywood Horrors* Ellen Goldberg,Aditi Sen,Brian Collins,2020-11-12 *Bollywood Horrors* is a wide-ranging collection that examines the religious aspects of horror imagery, representations of real-life horror in the movies, and the ways in which Hindi films have projected cinematic fears onto the screen. Part one, “Material Cultures and Prehistories of Horror in South Asia” looks at horror movie posters and song booklets and the surprising role of religion in the importation of Gothic tropes into Indian films, told through the little-known story of Sir Devendra Prasad Varma. Part two, “Cinematic Horror, Iconography and Aesthetics” examines the stereotype of the tantric magician found in Indian literature beginning in the medieval period, cinematic representations of the myth of the fearsome goddess Durga's slaying of the Buffalo Demon, and the influence of epic mythology and Hollywood thrillers on the 2002 film *Raaz*. The final part, “Cultural Horror,” analyzes elements of horror in Indian cinema's depiction of human trafficking, shifting gender roles, the rape-revenge cycle, and communal violence. This book also features images (colour in the hardback, black and white in the paperback).

**When in Doubt, Tell the Truth** Mark Twain,Brian Collins,1996 Representative works are interpreted in light of the two great political movements of the nineteenth century: the abolition of slavery and the women's rights movement. By reexamining Emerson, Poe, Melville, Douglass, Walt Whitman, Chopin, and Faulkner and others, Rowe assesses the degree to which major writers' attitudes toward race, class, and gender contribute to specific political reforms in nineteenth and twentieth-century American culture.

**The Head Beneath the Altar** Brian Collins,2014-01-01 In the beginning, says the ancient Hindu text the *Rg Veda*, was man. And from man's sacrifice and dismemberment came the entire world, including the hierarchical ordering of human society. *The Head Beneath the Altar* is the first book to present a wide-ranging study of Hindu texts read through the lens of René Girard's mimetic theory of the sacrificial origin of religion and culture. For those interested in Girard and comparative religion, the book also performs a careful reading of Girard's work, drawing connections between his thought and the work of theorists like Georges Dumézil and Giorgio Agamben. Brian Collins examines the idea of sacrifice from the earliest recorded rituals through the flowering of classical mythology and the ancient Indian institutions of the duel, the oath, and the secret warrior society. He also uncovers implicit and explicit critiques in the tradition, confirming Girard's intuition that Hinduism offers an alternative anti-sacrificial worldview to the one contained in the gospels.

**The Other Rāma** Brian Collins,2020-10-01 *The Other Rāma* presents a systematic analysis of the myth cycle of Paraśurāma (Rāma with the Axe), an avatāra of Viṣṇu best known for decapitating his own mother and annihilating twenty-one generations of the Kṣatriya warrior caste in an extermination campaign frequently referred to as genocide by modern scholars. Compared to Rāma and Kṛṣṇa, the other human forms of Viṣṇu, Paraśurāma has a much darker reputation, with few temples devoted to him and scant worshippers. He has also attracted far less scholarly attention. But dozens of important castes and clans across the subcontinent claim Paraśurāma as the originator of their bloodline, and his mother, Reṇukā, is worshipped in the form of a severed head throughout South India. Using the tools of comparative mythology and psychoanalysis, Brian Collins identifies three major motifs in the mythology of Paraśurāma: his hybrid status as a Brahmin warrior, his act of matricide, and his bloody one-man war to cleanse the earth of Kṣatriyas. Collins considers a wide variety of representations of the myth, from its origins in the *Mahābhārata* to contemporary debates online. He also examines Paraśurāma alongside the Wandering Jew of European legend and Psycho's matricidal serial killer Norman Bates. He examines why mythmakers once elevated this transgressive and antisocial figure to the level of an avatāra and why he still holds such fascination for a world that continues to grapple with mass killings and violence against women.

**The Generations of Heaven and Earth** Jon Garvey,2020-01-21 New science has surprised many by showing, contrary to received wisdom, that a real Adam and Eve could have lived amongst other humans in historical times and yet be the ancestors of every living person, as traditional Christianity has always taught. This theory was first published in book form in 2019, but Jon Garvey, familiar with it from its early days, believes it helps confirm the Christian account of reality by giving it a solid foundation in science and history. In this book he argues that the long existence of other people before and alongside Adam was in all likelihood known to the Bible's original authors. This conclusion helps build a compelling biblical big story of a new kind of created order initially frustrated by Adam's failure, but finally accomplished in Christ. This new creation theme complements that of the old creation covered in his first book, God's Good Earth. The two together contribute to a unified, and fully orthodox, understanding of the overall message of the Bible.

*Scientific advice and evidence in emergencies* Great Britain: Parliament: House of Commons: Science and Technology Committee,Andrew Miller,2011-03-02 In this report, the Science and Technology Committee examines how scientific advice and evidence is used in national emergencies, when the Government and scientific advisory system are put under great pressure to deal with atypical situations. The inquiry focused on four case studies: (i) the 2009-10 H1N1 influenza pandemic (swine flu); (ii) the April 2010 volcanic ash disruption; (iii) space weather; and (iv) cyber attacks. While science is used effectively to aid responses to emergencies, the detachment of the Government Chief Scientific Adviser (GCSA) from the National Risk Assessment (NRA) - the key process of risk evaluation carried out by the Cabinet Office - is a serious concern. The Committee recommends that the NRA should not be signed off until the GCSA is satisfied that all risks requiring scientific input and judgements have been properly considered. A new independent scientific advisory committee should be set up to advise the Cabinet on risk assessment and review the NRA. The Icelandic volcanic eruption in April 2010 is a stark example of the lack of scientific input in risk assessment: the risk of disruption to aviation caused by a natural disaster was dropped from the assessment process in 2009, despite warnings from earth scientists. There are concerns over how risk was communicated to the public during the 2009-10 swine flu pandemic are raised in the report, with sensationalised media reporting about the projected deaths from swine flu. The Scientific Advisory Groups in Emergencies, set up to advise government during emergencies, were found to work in an unnecessarily secretive way.
