Bow Bow Heritage Commission,2007 Bow, incorporated in 1727, is located just south of New Hampshire's capital, Concord. Colonists who settled in the area were granted parcels of land from the king of England. Most early settlers were farmers, and the town quickly became known for its agriculture. In the 1800s, the power of the town's waterways was harnessed and several mills opened. The sawmill and gristmill formed one of the town's first settlements, a section known as Bow Mills. Today Bow is a bedroom community with many active civic organizations. Improvements in the highway system, low property taxes, and excellent educational facilities have fueled Bow's growth.

Gauged Brickwork Gerard Lynch,2018-10-03 Gauged brickwork is a term used to describe the superior finish required in the details of an important brickwork elevation, such as moulded reveals, arches, string courses and other forms of ornamentation. This is achieved through shaping the individual bricks to produce a high degree of regularity, accurate dimensions and extreme fineness in the joints. This practical handbook combines simple diagrams and photographs to describe each stage of the process, from rubbing, cutting and shaping the bricks to laying and carving them. It emphasizes the importance of this skill in repairing and repointing rubbed and gauged brickwork and the damage that can be done by those unskilled in the craft. The second edition of this standard reference work has been substantially updated with new material, including additional photographs and illustrations to explain the various procedures and applications. It also now offers a fascinating and detailed historical perspective on the development of this important craft. The insights gleaned from this revised edition will be extremely valuable to architects and builders involved in conserving and repairing gauged brickwork, and also to those who are required to commission new decorative work to a high standard.
