Designing and Constructing Prestressed Bridges Jiří Stránský,Radim Necas,2021 Designing and Constructing Prestressed Bridges shows how designs using prestressing methods can be utilised in the building of bridge structures. Prestressed bridges can be used in a variety of locations and styles and it can often be difficult to understand the intricacies of the design. This book solves this concern by discussing the aspects of bridge design in order to find the most appropriate solution. The book focuses on troubleshooting the problems that are connected with finding the correct structural solution of bridges, the methods of their construction and the corresponding arrangement of prestressing steel.--Publisher’s website.

Intercultural Competences in Social Services Council of Europe. Directorate General III--Social Cohesion,European Commission. Directorate-General for Employment, Social Affairs and Inclusion,2011-01-01 If we are to build an inclusive institutional culture within the increasingly pluralist societies of 21st century Europe, focusing solely on the development of skills and knowledge is not enough. There have to be changes in the way in which administrative authorities and the organisations providing services to the public view their role and in the action they take. While it is essential for migrants to learn the language of their host country, understanding the codes of conduct, standards, allegiances, rules and exceptions is perhaps an even greater challenge. This clearer understanding of the institutional fabric is an inevitable part of what is termed integration and also applies to minorities. Since this process does not occur unassisted, this guide puts forward a number of proposals to help acquire the institutional skills which are vital for understanding, dialogue, guidance, negotiation and conflict resolution, to name but a few. These are all aspects inherent in interaction processes and essential for respecting diversity. This guide is an indispensable tool for public and private operators, social workers, mediators and all other stakeholders aware of the need to incorporate these aspects into their exchanges, particularly when rights and human dignity are at stake. This will help nurture confidence in public institutions and avoid the development of fear or any other barrier which could lead to unequal access - or indeed no access - to social, health-care or other services. Through this work, the Council of Europe reminds us that in pluralist societies the most effective guarantee of successful integration and harmonious co-existence is social justice.

Tom Paine’s Iron Bridge: Building a United States Edward G. Gray,2016-04-25 The little-known story of the architectural project that lay at the heart of Tom Paine’s political blueprint for the United States. In a letter to his wife Abigail, John Adams judged the author of *Common Sense* as having “a better hand at pulling down than building.” Adams’s dismissive remark has helped shape the prevailing view of Tom Paine ever since. But, as Edward G. Gray shows in this fresh, illuminating work, Paine was a builder. He had a clear vision of success for his adopted country. It was embodied in an architectural project that he spent a decade planning: an iron bridge to span the Schuylkill River at Philadelphia. When Paine arrived in Philadelphia from England in 1774, the city was thriving as America’s largest port. But the seasonal dangers of the rivers dividing the region were becoming an obstacle to the city’s continued growth. Philadelphia needed a practical connection between the rich grain of Pennsylvania’s backcountry farms and its port on the Delaware. The iron bridge was Paine’s solution. The bridge was part of Paine’s answer to the central political challenge of the new nation: how to sustain a republic as large and as geographically fragmented as the United States. The iron construction was Paine’s brilliant response to the age-old challenge of bridge technology: how to build a structure strong enough to withstand the constant battering of water, ice, and wind. The convergence of political and technological design in Paine’s plan was Enlightenment genius. And Paine drew other giants of the period as patrons: Benjamin Franklin, George Washington, Thomas Jefferson, and for a time his great ideological opponent, Edmund Burke. Paine’s dream ultimately was a casualty of the vicious political crosscurrents of revolution and the American penchant for bridges of cheap, plentiful wood. But his innovative iron design became the model for bridge construction in Britain as it led the world into the industrial revolution.

Fighting for Credibility Frank P. Harvey,John Mitton,2017-01-18 When Bashar al-Assad used chemical weapons against his own people in Syria, he clearly crossed President Barack Obama’s red line. At the time, many argued that the president had to bomb in order to protect America’s reputation for toughness, and therefore its credibility, abroad; others countered that concerns regarding reputation were overblown, and that reputations are irrelevant for coercive diplomacy. Whether international reputations matter is the question at the heart of *Fighting for Credibility*. For skeptics, past actions and reputations have no bearing on an adversary’s assessment of credibility; power and interests alone determine whether a threat is believed. Using a nuanced and sophisticated theory of rational deterrence, Frank P. Harvey and John Mitton argue the opposite: ignoring reputations sidesteps important factors about how adversaries perceive threats. Focusing on cases of asymmetric US encounters with smaller powers since the end of the Cold War including Bosnia, Kosovo, Iraq, and Syria, Harvey and Mitton reveal that reputations matter for credibility in international politics. This dynamic and deeply documented study successfully brings reputation back to the table of foreign diplomacy.

*The Wind of the Hundred Days*Jagdish N. Bhagwati,2002-02-22 Provocative essays on international trade, with particular focus on U.S. foreign trade policy. In *The Wind of the Hundred Days*, a new collection of public policy essays, Jagdish Bhagwati applies his characteristic wit and accessible style to the subject of globalization. Notably, he argues that the true Clinton scandal lay in the administration’s mismanagement of globalization—resulting in the paradox of immense domestic policy success combined with dramatic failure on the external front. Bhagwati assigns the bulk of the blame for the East Asian financial and economic crisis—a disaster that prompts him to use as his title the poet Octavio Paz’s image of devastation I met the wind of the hundred days—to the administration’s hasty push for financial liberalization in the region. The administration, Bhagwati claims, has also mishandled the freeing of trade. The administration-

HOSTED WTO MEETING IN SEATTLE ENDED IN CHAOS AND THE LAUNCH OF A NEW ROUND OF MULTILATERAL TRADE NEGOTIATIONS WAS DASHED. BHAGWATI SHOWS HOW THE ADMINISTRATION’S FAILURE TO GET CONGRESS TO RENEW FAST-TRACK AUTHORITY CAN BE ATTRIBUTED TO AN UNIMAGINATIVE RESPONSE TO THE DEMANDS OF A GROWING CIVIL SOCIETY. IN SEVERAL ESSAYS, HE SHOWS HOW FREE TRADE AND SOCIAL AGENDAS BOTH COULD HAVE BEEN PURSUED SUCCESSFULLY IF THE CONCERNS OF HUMAN-RIGHTS, ENVIRONMENTAL, CULTURAL, AND LABOR ACTIVISTS HAD BEEN MET THROUGH CREATIVE PROGRAMS AT APPROPRIATE INTERNATIONAL AGENCIES SUCH AS THE INTERNATIONAL LABOUR ORGANIZATION INSTEAD OF THE WTO AND VIA TRADE TREATIES. BHAGWATI ALSO CRITICIZES THE CLAIM THAT GLOBALIZATION NEEDS A HUMAN FACE, ARGUING THAT IT ALREADY HAS ONE. HE FAULTS THE ADMINISTRATION FOR EMBRACING UNSUBSTANTIATED ANTI-GLOBALIZATION RHETORIC THAT HAS MADE ITS OWN PREFERRED OPTION OF PURSUING GLOBALIZATION THAT MUCH MORE DIFFICULT.
