Parent-Child Interaction Therapy with Toddlers Emma I. Girard, Nancy M. Wallace, Jane R. Kohlhoff, Susan S. J. Morgan, Cheryl B. McNeil, 2018-09-20 This book presents an early treatment model for toddlers. It describes the early life span development, trajectory, and future potential of toddlers and how it may be powerfully influenced by the protection and guidance of caregivers to meet toddlers' physical and mental health needs. It offers an in-depth guide to Parent-Child Interaction Therapy with Toddlers (PCIT-T), an evidence-based program for addressing and preventing behavior problems affecting young children's development. The book details the innovative intervention design and how it guides clinicians in providing treatment for 12-month old to 24-month old toddlers with disruptive behaviors in addition to being used as a prevention model for caregivers experiencing stress of child rearing. PCIT-T focuses on core areas of social and emotional development, including behavior management and language skills, and can be used in dealing with difficulties as diverse as tantrums, language issues, autistic behaviors, and separation anxiety. Play therapy and compliance training in child-directed as well as parent-directed sessions are also examined. Initial chapters provide an overview of attachment and behavioral theory components that are foundational to the treatment model. Subsequent chapters provide a session-by-session guide and clinical manual for implementation of PCIT-T as well as the clinician tools needed to monitor treatment integrity and fidelity to the model. Topics featured in this book include: Core elements and treatment goals of PCIT-T A range of behavioral assessments used in PCIT-T. Instructions for room set-up, toy selection, and special considerations when providing PCIT-T treatment. Preparation guides for the pretreatment interview, assessment sessions, and weekly coaching sessions. The importance of child-directed interaction toddler (CDI-T) and parent-directed interaction toddler (PDI-T) in teaching children the necessary skills to regulate their emotions and develop self-control. Parent-Child Interaction Therapy with Toddlers is a must-have resource for clinicians and related professionals, researchers and professors, and graduate students in the fields of clinical child and school psychology, social work, pediatrics, infancy and early childhood development, child and adolescent psychiatry, primary care medicine, and related disciplines.

bookdown Yihui Xie, 2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Discovering Design Richard Buchanan, Victor Margolin, 1995-04-15 Discovering Design reflects the growing recognition that the design of the everyday world deserves attention not only as a professional practice but as a subject of social, cultural, and philosophic investigation. Victor Margolin, cofounder and an editor of the journal Design Issues, and Richard Buchanan, also an editor of the journal, bring together eleven essays by scholars in fields ranging from psychology, sociology, and political theory to technology studies, rhetoric, and philosophy. The essayists share the editors' concern, first made clear in Margolin's Design Discourse: History, Theory, Criticism, with the development of design studies as a field of interdisciplinary research. The contributors (Gianfranco Zaccai, Albert Borgmann, Richard Buchanan, Augusto Morello, Tufan Orel, Nigel Cross, Victor Margolin, Langdon Winner, Carl Mitcham, Tony Fry, and Ezio Manzini) focus on three broad themes that form a sequence of fundamental issues: how to shape design as a subject matter, how to distinguish the activity of designing in the complex world of action, and how to address the basic questions of value and responsibility that persistently arise in the discussion and practice of design. The editors' introduction provides a useful overview of these questions and offers a multidisciplinary framework for design studies. The essays discuss such topics as the relation of aesthetics to technology, the place of design in social action, the role of the consumer in design decisions, and the need for ethical practice in contemporary design. Manzini's concluding essay shows how the issue of ethics should connect responsible behavior to decisions made every day in the manufacture of objects.

The Second Chinese Revolution E. Bregolat, 2016-04-30 The Second Chinese Revolution explores some of the keys to understanding China, a country whose evolution already affects all of us. Beginning in 1978 - when China's GDP was only 6% of the USA's - the author takes us through the different aspects that have played a fundamental role in the country's change: China's eruption in world markets in the background of the West's economic crisis; its obsession with science and technology and its relentless march towards a 'knowledge society'; and a reassessment of the Tiananmen Square events of June 1989 and the ongoing debate on political reform. The book also includes a comparative analysis of the reforms in China and Russia in the last decades.

Love, Money, and Parenting Matthias Doepke, Fabrizio Zilibotti, 2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children. They show that in countries with increasing economic inequality, such as the United States, parents push harder to ensure their children have a path to security and success. Economics has transformed the hands-off parenting of the 1960s and '70s into a frantic, overscheduled activity. Growing inequality has also resulted in an increasing 'parenting gap' between richer and poorer families, raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds. The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation, and how economics can help shape policies that will contribute to the ideal of equal opportunity for all. --From publisher description.

Overview: MELQO UNESCO, UNICEF, World Bank, Brookings Institution (USA). Center for Universal Education, 2017-08-14 The Measuring Early Learning Quality and Outcomes (MELQO) initiative began in 2014 as part of the global emphasis on early childhood development (ECD). Led by UNESCO, the World Bank, the Center for Universal Education at the Brookings Institution and UNICEF, the initiative aims to promote feasible, accurate and useful measurement of children's development and learning at the start of primary school, and of the quality of their pre-primary learning environments. Items are designed for children between the ages of 4 and 6 years. Following the premise that many existing tools include similar items, the leading organizations' core team worked with a consortium of experts, non-governmental organizations (NGOs) and multilaterals to build upon current measurement tools to create a common set of items organized into modules for measuring: 1) early childhood development and

learning, and 2) the quality of pre-primary learning environments. The MELQO core team and experts also collaborated to outline a process for context-specific adaptation of the measurement modules resulting from lessons learned from field-testing in several countries in 2015 and 2016. The modules are designed to be implemented at scale, with an emphasis on feasibility for low- and middle-income countries (LMICs). A key question addressed by MELQO was the balance between a global tool suitable for use everywhere, and local priorities and goals for children's development. [Introduction, ed]

Match-Fixing in Sport Stacey Steele, Hayden Opie, 2017-11-20 Match-fixing represents a greater potential threat to the integrity of sport than doping. It has been linked to organised crime, illegal drugs and money-laundering. Law enforcement and sporting authorities are struggling to establish legal and regulatory responses to this emerging threat, particularly in light of cross-border internet gambling. This book examines match-fixing and the legal responses to it in three key Asian sporting nations: Australia, Japan and Korea. It explores the significance of legal, regulatory and cultural differences, and draws lessons in terms of best practice and enforcement for legal and sporting authorities around the world. Including key insights from players, the betting industry, law enforcement and prosecution authorities, it discusses the strengths and weakness of current anti-corruption strategies in the three jurisdictions. *Match-Fixing in Sport: Comparative Studies from Australia, Japan, Korea and Beyond* offers important insights for all students and scholars with an interest in sport studies, law, criminology and Asian studies.

Yo Puedo Elizabeth Silvaggio-Adams, Ma. Del Rocío Vallejo-Alegre, 2021-06-30 Perhaps you remembered what the title of your book means from your previous experiences with Spanish. That is a great start! As you begin the equivalent of a second semester Spanish course with these materials, some of you might think about how long it has been since you studied Spanish while others may come to the class with some background knowledge. We want you to know this book has been designed with many types of learners in mind. Our goals were to address the need for students to achieve the ability to communicate in written and spoken form. We sought to address a common statement by students that may have previous experiences, be they from secondary school or another college that say, I have studied Spanish for years and don't know how to speak or write it. We also sought to present a reasonable alternative to the expensive textbooks and online packages that don't seem to be practical or relevant. We sought to enhance second language learning by creating our own materials that take a new approach, the flipped classroom model, to learning a second language based upon the skills that we deem most useful and that will enable our students to confidently express themselves in Spanish-tú puedes con Yo puedo 2.

The Social Metabolism Manuel González de Molina, Víctor M. Toledo, 2014-06-30 Over this last decade, the concept of Social Metabolism has gained prestige as a theoretical instrument for the required analysis, to such an extent that there are now dozens of researchers, hundreds of articles and several books that have adopted and use this concept. However, there is a great deal of variety in terms of definitions and interpretations, as well as different methodologies around this concept, which prevents the consolidation of a unified field of new knowledge. The fundamental aim of the book is to conduct a review of the past and present usage of the concept of social metabolism, its origins and history, as well as the main currents or schools that exist around this concept. At the same time, the reviews and discussions included are used by the authors as starting points to draw conclusions and propose a theory of socio-ecological transformations. The theoretical and methodological innovations of this book include a distinction of two types of metabolic processes: tangible and intangible; the analysis of the social metabolism at different scales (in space and time) and a theory of socio-ecological change overcoming the merely "systemic" or "cybernetic" nature of conventional approaches, giving special protagonism to collective action.

Of Death Hilda Hilst, 2018 Poetry. Latinx Studies. Translated by Laura Cesarco Eglin. If life is no more than a prolonged flirtation with death, then Hilda Hilst's *OF DEATH. MINIMAL ODES* is the true account of a lifelong seduction. It is at once both a reverie and reliquary, as the poet imagines and reimagines that most paradoxical moment of disintegration--the corporeal flesh fusing with death's own dark corpus. With a visceral-mystical poetic voice that is as teasingly unrestrained as it is intellectually sublime, Hilst's odes enact a baroque danse macabre, where the poet revels in the incongruities of simultaneously seeking the sacred and profane. Translating the first collection of Hilda Hilst's significant body of poetry to appear in English, Laura Cesarco Eglin renders the imagery and philosophical complexity of these minimal odes with brio, while preserving the playful tone and lush melodies that mark *OF DEATH. MINIMAL ODES* as uniquely Hilstian. The spare but ornate poems in this collection are startling the way a menagerie of creatures can be startling when the creatures themselves are composed of animal bits: claw, fur, 'brain and hooves / in the pitch dark.' Each minimal ode addresses death who becomes at times a lover, a sister, a slow-moving and wild mammal ever arriving. Hilst builds 'passageways' for death with each line--corridors which are 'Intricate. In knots.' The reader cannot help but join the poet in calling out the various names for death: 'Amber / Bundle of flutes / Gutter / Light.' And these are rendered stunningly in English by Laura Cesarco Eglin, who carries over every verse with clarity and care as though she were holding up pieces of glass to sunlight.--Carolina Ebeid Before gaining notoriety for her highly original, experimental, and provocative works of fiction, Hilda Hilst engraved her name in Brazilian literary circles as a poet. *OF DEATH. MINIMAL ODES*, newly and assuredly translated by Laura Cesarco Eglin, shows Hilst the poet at her distilled best. As much a multimedia conversation with poetry as with life, death, and herself, Hilst poses essential questions whose answers lie at the core of these poems.--John Keene In *OF DEATH. MINIMAL ODES* by Brazilian writer Hilda Hilst, death and poetry are lifelong bedfellows. In fact, they engage in a natural partnership, or, to borrow from the poet herself, a sisterhood-in-dialogue that is at once serious and seductive, playful, perilous, and habitual. Hilst's creative wordplays and tonal spectrum, by contrast, are extraordinary, and Laura Cesarco Eglin's translation matches her inventiveness with equal illumination. Hilst's verses affirm the common ground that exists between life and death, and carry with them a vibrant, volatile charge that accompanies this complicit union.--Marguerite Itamar Harrison, Associate Professor of Portuguese and Brazilian Studies, Smith College The poetry of Hilda Hilst is fundamental--in every sense. Thanks to Laura Cesarco Eglin, who has accepted the challenge of translating these verses brimming with sensuality and music, a little more of Hilst's work is made known to the world. I welcome this partnership.--Adriana Lisboa

The Acquisition of Spanish Silvina Montrul, 2004-01-01 This is the first book on the acquisition of Spanish that provides a state-of-the-art comprehensive overview of Spanish morphosyntactic development in monolingual and bilingual situations. Its content is organized around key grammatical themes that form the empirical base of research in generative grammar: nominal and verbal inflectional morphology, subject and object pronouns, complex structures involving movement (topicalizations, questions, relative clauses), and aspects of verb meaning that have consequences for syntax. The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual, bilingual, child and adult early grammatical systems. While stressing their similarities with respect to linguistic representations and processes, the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition. It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages. This book is a must read for those interested in the acquisition of Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different contexts.
