Korea's Online Gaming Empire Dal Yong Jin, 2010-10-01 The rapid growth of the Korean online game industry, viewed in social, cultural, and economic contexts. In South Korea, online gaming is a cultural phenomenon. Games are broadcast on television, professional gamers are celebrities, and youth culture is often identified with online gaming. Uniquely in the online games market, Korea not only dominates the local market but has also made its mark globally. In Korea's Online Gaming Empire, Dal Yong Jin examines the rapid growth of this industry from a political economy perspective, discussing it in social, cultural, and economic terms. Korea has the largest percentage of broadband subscribers of any country in the world, and Koreans spend increasing amounts of time and money on Internet-based games. Online gaming has become a mode of socializing—a channel for human relationships. The

Korean online game industry has been a pioneer in software development and eSports (electronic sports and leagues). Jin discusses the policies of the Korean government that encouraged the development of online gaming both as a cutting-edge business and as a cultural touchstone; the impact of economic globalization; the relationship between online games and Korean society; and the future of the industry. He examines the rise of Korean online games in the global marketplace, the emergence of eSport as a youth culture phenomenon, the working conditions of professional gamers, the role of game fans as consumers, how Korea's local online game industry has become global, and whether these emerging firms have challenged the West's dominance in global markets.

Raceball Rob Ruck, 2012-02-21 From an award-winning writer, the first linked history of African Americans and Latinos in Major League Baseball After peaking at 27 percent of all major leaguers in 1975, African Americans now make up less than one-tenth--a decline unimaginable in other men's pro sports. The number of Latin Americans, by contrast, has exploded to over one-quarter of all major leaguers and roughly half of those playing in the minors. Award-winning historian Rob Ruck not only explains the catalyst for this sea change; he also breaks down the consequences that cut across society. Integration cost black and Caribbean societies control over their own sporting lives, changing the meaning of the sport, but not always for the better. While it channeled black and Latino athletes into major league

baseball, integration did little for the communities they left behind. By looking at this history from the vantage point of black America and the Caribbean, a more complex story comes into focus, one largely missing from traditional narratives of baseball's history. Raceball unveils a fresh and stunning truth: baseball has never been stronger as a business, never weaker as a game.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-

depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
