**The Pocket Book of Weather** Michael Bright, 2014-05-20 Featuring three thousand essential facts and figures, illustrated with more than fifty color photographs and diagrams, this entertaining and informative guide explains how the weather shapes our planet and affects all our lives. From the weather you face each day to the glory of rainbows and lightning and the drama of tornadoes, solar storms, and monsoons, Michael Bright explores: - How clouds develop - What makes the wind blow - Why no two snowflakes are the same - What causes tornadoes - Why deserts are so dry and rainforests so wet - What the El Niño effect is - How rainbows form - How to read a weather map And much more. After marveling at lightning, explaining thunder, and finding there is no end of the rainbow, Bright investigates how weather will become even more important in the future, both as a result of climate change, and because of new ways of harnessing the awesome power of nature to generate energy. The Pocket Book of Weather is a fascinating compendium of useful and entertaining information, to be enjoyed at home or while hiking, biking, or otherwise outdoors.

*Weather Explained* Michael Bright, 2014-12-15 Weather affects much more than how we dress, where we go, or whether or not we carry an umbrella—all life reacts and responds to weather in one way or another. Careful observation would show us that crickets are nature's thermometers, garden ants swarm when summer thunderstorms approach, and sharks swim into deep water when air pressure drops. This fact-filled volume examines the fundamentals of atmospheric science as well as the cultural impact of weather, surveying historic record-breaking conditions across the world, the behavioral and physiological impact of weather on plant and animal life, and human responses to climate change.

**On the Same Day in March** Marilyn Singer,2001-12-24 On the same day in March... Polar bears ride on Arctic ice. People in French cafes turn up their faces to the sun. Hailstones roll over Indian hillsides. Rain makes a river in Kenya. On the same day that it's icy cold in the Arctic, it's foggy in Louisiana, sunny in Barbados, and blowing wild winds called willy-willies in Australia. In this poetic exploration of longitude and weather, with bright and detailed paintings of seventeen different places, Marilyn Singer and Frane Lessac show us what's happening from the poles to the equator-- all on the same day in March.
