Local Language Testing Xun Yan,Slobodanka Dimova,April Ginther,2023-07-18 This book describes language testing practices that exist in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in language testing literature. Drawing empirical research on a variety of languages, the volume discusses local language tests' ability to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research. Although local testing practices have been grounded in the theoretical principles of language testing, the authors in this volume supplement the theoretical content with practical examples of how local tests can be designed to effectively function within and across different institutional contexts.

Sign Languages of the World Julie Bakken Jepsen,Goedele De Clerck,Sam Lutalo-Kiingi,William B. McGregor,2015-10-16 Although a number of edited collections deal with either the languages of the world or the languages of particular regions or genetic families, only a few cover sign languages or even include a substantial amount of information on them. This handbook provides information on some 38 sign languages, including basic facts about each of the languages, structural aspects, history and culture of the Deaf communities, and history of research. This information will be of interest not just to general audiences, including those who are deaf, but also to linguists and students of linguistics. By providing information on sign languages in a manner accessible to a less specialist audience, this volume fills an important gap in the literature.

The Linguistics of British Sign Language Rachel Sutton-Spence,Bencie Woll,1999-03-18 This is the first British textbook dealing solely with sign linguistics.

British Sign Language [Book/DVD Pack] Paul Redfern,Laraine Callow,2010-10-29 This product contains a book and DVD. Do you want to be able to understand and use British Sign Language confidently? All you need is this best-selling course. Learn everyday, useful BSL through real-life situations that make the grammar and vocabulary easy and memorable. Hundreds of line illustrations throughout the book and constant references to video clips on the DVD make learning fast and fun. British Sign Language (BSL) is used in the United Kingdom. The number of Deaf people in the UK using BSL has been put at about 50,000; there are in addition many more hearing people who use BSL to communicate with Deaf users. Sign languages are not related to spoken languages and BSL is completely different, for example, from American Sign Language. Sign language conveys meaning through the

use of space and movement of the hands, body, face and head. We know that many hearing people are keen to learn BSL (it is a very popular evening class course, for example). But there is a lack of good teaching materials written in English for hearing learners of BSL, which this course fills. Get Started in British Sign Language follows the BSL curricula taught currently in colleges (Council for the Advancement of Communication with Deaf People CACDP and Institute of BSL) and therefore will be able to be used as support material by learners, as well as providing a complete grounding in the structure and grammar of BSL. Flexible Learn in your own time and at your own pace Time saving Learn quickly with one- and five-minute essentials Expert Written by Deaf authors Informative Sections of Deaf culture Jargon-free Learn the grammatical features of BSL with ease Practical Reinforce your learning with examples and exercises Authentic Learn everyday BSL through real-life situations DVD (MP4 compatible) Video clips provided on a 60-minute DVD Teach Yourself British Sign Language includes: Chapter 1: Starting out with BSL structure Chapter 2: More about Deaf people Chapter 3: BSL Structures Chapter 4: Deaf culture and BSL etiquette Chapter 5: Introduction to facial expressions Chapter 6: Asking 'wh-' questions Chapter 7: Asking 'yes/'no' questions Chapter 8: More about questions Chapter 9: How to use facial expressions Chapter 10: BSL mouth patterns Chapter 11: Starting out with fingerspelling Chapter 12: Learning to fingerspell Chapter 13: Reading fingerspelling Chapter 14: Fingerspelling signs Chapter 15: Using fingerspelling in conversation Chapter 16: Other fingerspelt words: months Chapter 17: Starting out with placement Chapter 18: Describing a room Chapter 19: Introduction to referent handshapes Chapter 20: Understanding switching Chapter 21: Describing a room from memory Chapter 22: Understanding someone describing a scene from memory Chapter 23: Starting out with directions Chapter 24: Directions - describing localities Chapter 25: Complex directions: adding more information Chapter 26: Using directions with landmarks Chapter 27: Colours Chapter 28: What next? Multilingual Aspects of Signed Language Communication and Disorder David Quinto-Pozos,2014-01-29 This book provides a synthesis of work on communication disorders of child and adult users of signed languages. The chapters investigate linguistic impairments caused by deficits in visual processing and motor movements, as well as neurological decline. The volume also contains in-depth descriptions of child language acquisition in the signed modality and suggestions about how signed languages might guard against communication disorder.

Visual language Wendy Sandler,Marianne Gullberg,Carol Padden,2019-11-04 Traditionally, research on human language has taken speech and written language as the only domains of investigation. However, there is now a wealth of empirical studies documenting visual aspects of language, ranging from rich studies of sign languages, which are self-contained visual language systems, to the field of gesture studies, which examines speech-associated gestures, facial expressions, and other bodily movements related to communicative expressions. But despite this large body of work, sign language and gestures are rarely treated together in theoretical discussions. This volume aims to remedy that by considering both types of visual language jointly in order to transcend (artificial) theoretical divides, and to arrive at a comprehensive account of the human language faculty. This collection seeks to pave the way for an inherently multimodal view of language, in which visible actions of the body play a crucial role. The 19 papers in this volume address four broad and overlapping topics: (1) the multimodal nature of language; (2) multimodal representation of meaning; (3) multimodal and multichannel prosody; and (4) acquisition and development of visual language in children and adults.

Computer Vision - ECCV 2004 Tomas Pajdla,Jiri Matas,2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer - vision! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong – 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the number of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers.

Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages.

ThepreparationofECCV2004wentsmoothlythankstotheeffortsoftheorganizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

The Legal Recognition of Sign Languages Maartje De Meulder, Joseph J. Murray, Rachel L. McKee, 2019-06-17 This book presents the first ever comprehensive overview of national laws recognising sign languages, the impacts they have and the advocacy campaigns which led to their creation. It comprises 18 studies from communities across Europe, the US, South America, Asia and New Zealand. They set sign language legislation within the national context of language policies in each country and show patterns of intersection between language ideologies, public policy and deaf communities' discourses. The chapters are grounded in a collaborative writing approach between deaf and hearing scholars and activists involved in legislative campaigns. Each one describes a deaf community's expectations and hopes for legal recognition and the type of sign language legislation achieved. The chapters also discuss the strategies used in achieving the passage of the legislation, as well as an account of barriers confronted and surmounted (or not) in the legislative process. The book will be of interest to language activists in the fields of sign language and other minority languages, policymakers and researchers in deaf studies, sign linguistics, sociolinguistics, human rights law and applied linguistics.

The Signs of Language Revisited Karen Emmorey,Harlan L. Lane,2013-04-15 The burgeoning of research on signed language during the last two decades has had a major influence on several disciplines concerned with mind and language, including linguistics, neuroscience, cognitive psychology, child language acquisition, sociolinguistics, bilingualism, and deaf education. The genealogy of this research can be traced to a remarkable degree to a single pair of scholars, Ursula Bellugi and Edward Klima, who have conducted their research on signed language and educated scores of scholars in the field since the early 1970s. The Signs of Language Revisited has three major objectives: * presenting the latest findings and theories of leading scientists in numerous specialties from language acquisition in children to literacy and deaf people; * taking stock of the distance scholarship has come in a given field, where we are now, and where we should be headed; and * acknowledging and articulating the intellectual debt of the authors to Bellugi and Klima--in some cases through personal reminiscences. Thus, this book is also a document in the sociology and history of science.

Bilingualism and Bilingual Deaf Education Marc Marschark,Gladys Tang,Harry Knoors,2014-06-02 In Bilingualism and Bilingual Deaf Education, volume editors Marc Marschark, Gladys Tang, and Harry Knoors bring together diverse issues and evidence in two related domains: bilingualism among deaf learners - in sign language and the written/spoken vernacular - and bilingual deaf education. The volume examines each issue with regard to language acquisition, language functioning, social-emotional functioning, and academic outcomes. It considers bilingualism and bilingual deaf education within the contexts of mainstream education of deaf and hard-of-hearing students in regular schools, placement in special schools and programs for the deaf, and co-enrollment programs, which are designed to give deaf students the best of both educational worlds. The volume offers both literature reviews and new findings across disciplines from neuropsychology to child development and from linguistics to cognitive psychology. With a focus on

evidence-based practice, contributors consider recent investigations into bilingualism and bilingual programming in different educational contexts and in different countries that may have different models of using spoken and signed languages as well as different cultural expectations. The 18 chapters establish shared understandings of what are meant by bilingualism, bilingual education, and co-enrollment programming, examine their foundations and outcomes, and chart directions for future research in this multidisciplinary area. Chapters are divided into three sections: Linguistic, Cognitive, and Social Foundations; Education and Bilingual Education; and Co-Enrollment Settings. Chapters in each section pay particular attention to causal and outcome factors related to the acquisition and use of these two languages by deaf learners of different ages. The impact of bilingualism and bilingual deaf education in these domains is considered through quantitative and qualitative investigations, bringing into focus not only common educational, psychological, and linguistic variables, but also expectations and reactions of the stakeholders in bilingual programming: parents, teachers, schools, and the deaf and hearing students themselves.

Launching Your Career in Nursing and Midwifery Annabel Smoker, 2015-12-01 Gaining a first job as a nurse or midwife is becoming not only highly competitive but an increasingly more complex process. This practical guide will help students get ahead of other applicants by picking apart the experience of applying for a job from start to finish. Readers will discover a wealth of information on career planning, continuing professional development and next steps. Accessible and user-friendly, this is an essential text for student nurses and midwives at any stage in their pre-registration education, and more especially for those in their final year, as they prepare for the move into qualified employment or further discipline specific study.

Sign Language Research, Uses and Practices Laurence Meurant, Aurélie Sinte, Mieke Van Herreweghe, Myriam Vermeerbergen, 2013-06-26 The uses and practices of sign languages are strongly related to scientific research on sign languages and vice versa. Conversely, sign linguistics cannot be separated from Deaf community practices, including practices in education and interpretation. Therefore, the current volume brings together work on sign language interpreting, the use of spoken and sign language with deaf children with cochlear implants and early language development in children exposed to both a spoken and sign language, and reports on recent research on aspects of sign language structure. It also includes papers addressing methodological issues in sign language research. The book presents papers by more seasoned researchers and new kids on the block, as well as papers in which the two collaborate. The contributions will be of interest to all those interested in linguistics, sociolinguistics, cultural studies, interpreting

and education. It will have particular relevance to those interested in sign linguistics, sociolinguistics of deaf communities, Deaf studies, Deaf culture, sign language interpretation, sign language teaching, and (spoken/signed) bilingualism. Given the scarcity of literature on Deaf studies, the book will also appeal widely beyond the traditional academic milieu. As a result, it has relevance for those teaching and learning sign languages, for professional and student interpreters and for teachers of the deaf.

Claiming India from Below Vipul Mudgal, 2015-12-14 Going beyond electoral politics and government, this volume broadens the scope of the functioning of democracy in India, and explores citizens' role in the implementation of public policy. It looks at the ways in which extra-parliamentary power monitoring devices such as public institutions, citizens' associations or assemblies, and the mainstream and emerging forms of the media, permeate through the political order. The volume: • brings participation and communication in governance and policy making to the centrestage; • examines case studies of state and citizen engagement from across India; and • presents perspectives of practitioners, activists and scholars to provide a comprehensive view of the debates surrounding the idea of Indian democracy. This book will be useful to scholars and researchers in politics, political science, media studies, public administration, sociology and social anthropology, as well as the interested general reader.

The Oxford Handbook of Deaf Studies, Language, and Education, Volume 1, Second Edition Marc Marschark, Patricia Elizabeth Spencer, 2011-01-11 In this updated edition of the landmark original volume, a range of international experts present a comprehensive overview of the field of deaf studies, language, and education. Written for students, practitioners, and researchers, The Oxford Handbook of Deaf Studies, Language, and Education, Volume 1, is a uniquely ambitious work that has altered both the theoretical and applied landscapes.

The Routledge Handbook of Linguistic Anthropology Nancy Bonvillian, 2015-08-11 The Routledge Handbook of Linguistic Anthropology is a broad survey of linguistic anthropology, featuring contributions from prominent scholars in the field. Each chapter presents a brief historical summary of research in the field and discusses topics and issues of current concern to people doing research in linguistic anthropology. The handbook is organized into four parts – Language and Cultural Productions; Language Ideologies and Practices of Learning; Language and the Communication of Identities; and Language and Local/Global Power – and covers current topics of interest at the intersection of the two fields, while also contextualizing them within discussions of fieldwork practice. Featuring 30 contributions from leading scholars in the field, The Routledge Handbook of Linguistic Anthropology is an

essential overview for students and researchers interested in understanding core concepts and key issues in linguistic anthropology.
